Section 1 12 Questions · 18 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

His _____ speaking style notwithstanding, William Perkins has long been seen as the moderate face of his political party.

- ○**A** genteel
- ○**B** mundane
- ○**C** affable
- ○**D** captivating
- ○**E** vehement

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

The prime minister's spokesman faces a difficult task in defending his boss from what he sees as the (i) _____ of a decidedly prejudiced press. To make his defense effectively, he will certainly have to give specific examples of the media coverage he finds so (ii) _____.

Blank (i)	Blank (ii)
overwrought panegyrics	objectionable
lowly calumnies	confusing
justified fulminations	unexciting

Question 3 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

The power of laughter to affect the perceived funniness of television programming is (i) _____: most researchers have found that the inclusion of laughter on a program's soundtrack (ii) _____ the overall perception of humor, although it appears that it can (iii) _____ humor at specific points and thus boost the total comic appeal of the program.

Blank (i)	Blank (ii)	Blank (iii)
cumulative	allows variations in	dampen
measurable	tends to accentuate	enhance
unclear	has little effect on	mask

Questions 4 to 5 are based on the following passage.

Calculating hydroelectric plants' environmental impact is not simple. Dam building requires steel and cement, the manufacture of which entails greenhouse gas emissions. Estimates for these emissions are relatively straightforward to make and show that the consequences are small compared to the benefits of generating greenhouse gas-free hydroelectric power. But more difficult-to-estimate greenhouse gas contributions occur during the plants' operation. The submerging of large areas behind dams results in the microbial decomposition of vegetation, which produces substantial quantities of methane—a potent greenhouse gas. Furthermore, eradicating vegetation eliminates the consumption of the greenhouse gas CO_2 by that vegetation. Estimating amounts of these gases is difficult, and amounts vary depending upon the specific location, terrain, and power intensity of the dam with its associated lake.

Question 4 RC

Select one answer choice.

The author would most likely agree with which of the following assertions about the environmental impact of hydroelectric power plants?

○**A** It cannot be inferred from calculations of the environmental impact of a few hydroelectric plants.

○**B** It is not primarily determined by the effects of dam building on vegetation.

○**C** It cannot be calculated with sufficient accuracy to justify the requirement of environmental impact studies prior to plant construction.

○**D** It could be significantly improved if the amounts of steel and cement used for dam building could be decreased.

○**E** It is too substantial, when all factors are considered, to justify the building of new dams.

Question 5 RC

Select one answer choice.

The highlighted sentence ("Estimates for these emissions ~ hydroelectric power") serves primarily to

○**A** support a claim made at the beginning of the passage

○**B** acknowledge a problem inherent in a particular kind of calculation

○**C** anticipate and respond to a possible criticism of the author's overall argument

○**D** introduce a problem that will be explored later in the passage

○**E** point out an exception to a general claim

Question 6 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

While the _____ of reliable sources in later narratives make many details of the early history of China's Zhou dynasty unverifiable, the Zhou rulers' successful rise to power is certain.

- ☐ **A** dearth
- ☐ **B** ambiguity
- ☐ **C** paucity
- ☐ **D** opacity
- ☐ **E** authenticity
- ☐ **F** credibility

Question 7 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Asteroids of diameter less than 100 km never melted but asteroids with larger diameters did so and became _____ with the heavier Fe-Ni material forming the core and the silicates forming the crust.

- ☐ **A** stratified
- ☐ **B** destabilized
- ☐ **C** weakened
- ☐ **D** liquefied
- ☐ **E** differentiated
- ☐ **F** distinguished

Question 8 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Despite the _____ of medical information available through e-mail, the Internet, and mobile devices, not many patients are taking advantage of the potential of electronic communications for health-related needs.

- ☐ **A** wealth
- ☐ **B** complexity
- ☐ **C** intricacy
- ☐ **D** profusion
- ☐ **E** resurgence
- ☐ **F** overload

Question 9 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Scrupulous accounting by businesses tends to be swept aside during periods when frenzied investing and speculation seem to promise huge profits, demonstrating once again that _____, in the presence of lucre, may erode honesty.

- ☐ **A** enthusiasm
- ☐ **B** insight
- ☐ **C** eagerness
- ☐ **D** acumen
- ☐ **E** optimism
- ☐ **F** persistence

Questions 10 to 12 are based on the following passage.

Historically, more cold-adapted antelope species originating in Eurasia have migrated into Africa, where the climate is generally warmer, than have warm-adapted African species into Eurasia. A likely explanation for this involves the fact that intercontinental migrations require both a land bridge connecting the two continents and the suitable habitat both on and across that land bridge. During periods of climatic cooling, such as the various ice ages, the land bridge is open for a long time (because sea level remains low) and is usable by cold-adapted species because cool habitats then extend across it. Thus, during cooling most migrants would be expected to travel toward Africa, which is near the equator, since this is the direction dictated by habitat changes on a cooling Earth. In contrast, when the Earth is warm, the land bridge is reduced or gone because sea level is relatively high then. Only during the short lag between onset of global temperature change and sea level response can warm-adapted species migrate from the equator toward higher latitudes.

Question 10 RC

Select one answer choice.

According to the passage, which of the following is true of a Eurasia-Africa land bridge during ice ages?

- ○ **A** It offers suitable habitats for cold-adapted species of antelope.
- ○ **B** It encourages migration from Africa to Eurasia of cold-adapted species of antelope.
- ○ **C** It allows the survival of warm-adapted species of antelope that might otherwise become extinct.
- ○ **D** It is more likely to exist early in an ice age than later in an ice age.
- ○ **E** The habitats it offers change more quickly than do those offered by land bridges during other periods.

Question 11 RC

Select one answer choice.

The author of the passage implies that during the "short lag," a land bridge between Africa and Eurasia would

○**A** be inhabited primarily by species of antelope originating in Eurasia

○**B** be characterized by areas of widely varying elevation above sea level

○**C** be inhabited by a wide diversity of antelope species

○**D** contain habitats that could sustain warm-adapted antelope species

○**E** contain habitats similar to habitats at much higher latitudes in Eurasia

Question 12 RC

Select one answer choice.

According to the passage, which of the following best accounts for the apparent bias in antelope-migration direction?

○**A** Warm-adapted antelope species are rarely able to tolerate cool habitats, whereas cold-adapted antelope species usually can tolerate warm habitats.

○**B** During global warming periods, land bridges, when present, lack habitats suitable for sustaining warm-adapted antelope species.

○**C** Under most climatic conditions, Africa offers a larger number of suitable antelope habitats than does Eurasia.

○**D** Many more species of antelope have originated in Eurasia than have originated in Africa.

○**E** Land bridges are more likely to exist when climate change favors migration to warmer climates than when climate change favors migration to cooler climates.

Section 2 15 Questions · 23 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

Some film historians argue that film narrative was inspired in large part by stage plays, whereas others argue that the theater, far from being a _____, obstructed the development of film narrative.

- ○**A** hindrance
- ○**B** by-product
- ○**C** successor
- ○**D** catalyst
- ○**E** rival

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

He was never (i) _____: he was nothing if not (ii) _____, so he forbore for the present to declare his passion.

Blank (i)	Blank (ii)
chivalrous	boorish
impetuous	circumspect
thoughtful	spontaneous

Question 3 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

Animals whose behavioral traits are (i) _____ thereby have a level of (ii) _____ when environmental conditions vary. However, studies of animal personality also suggest that the behavior of individual animals can be constrained to certain behavioral types, leading to consistent differences between individuals.

Blank (i)	Blank (ii)
plastic	camouflage
habitual	constancy
understood	flexibility

Question 4 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

The guarantee of academic freedom to professors is intended to encourage intellectual independence. But so long as faculty members receive training in a specific academic discipline and are appointed to positions defined by discipline, and so long as colleges and universities are organized by departments that (i) _____ long-standing disciplinary traditions, academic freedom will also (ii) _____ unique discipline-specific expectations. Yet the right to (iii) _____ disciplinary paradigms is also fundamental to academic freedom.

Blank (i)	Blank (ii)	Blank (iii)
flout	tend to embody	resist
inherit	fail to communicate	delineate
reinvent	begin to transcend	perpetuate

Questions 5 to 6 are based on the following passage.

Conspicuous structural inconsistencies distinguish Xenophon's《Ephesiaka》from other ancient Greek novels. Its narrative texture is uneven, the story's pace varies erratically, and, compared with other novels, it is inferior in composition. The quality of the《Ephesiaka》was first questioned by Burger, who maintained that much of the work is an epitome (i.e., a summary). This idea was used to account for the work's narrative shortcomings: the choppy pace, the lack of motivation for certain events, the abrupt introduction of characters. However, it is doubtful that《Ephesiaka》is an epitome because, as an epitome, it is a worse job than it is as a novel. Even in passages Burger thinks to be epitomized, inconsequential details such as Anthia feeding her dogs are retained, but potentially significant actions of gods are excised.

Question 5 RC

(Highlighted portion: "Anthia feeding her dogs")

Select one answer choice.

The author mentions "Anthia feeding her dogs" primarily in order to support

- ○**A** a comparison between the《Ephesiaka》and other ancient Greek novels
- ○**B** a criticism of Burger's view about what the《Ephesiaka》is
- ○**C** an explanation of the《Ephesiaka》's narrative shortcomings
- ○**D** a reassessment of the《Ephesiaka》's quality as a work of literature
- ○**E** a claim about the effect of inconsequential details on the overall quality of《Ephesiaka》

Question 6 RC 복수

Consider each of the choices separately and select all that apply.

It can be inferred that the author of the passage disagrees with Burger about which of the following?

- □**A** Whether it can be determined which ancient Greek texts are epitomes
- □**B** The explanation for some apparent deficiencies in the《Ephesiaka》
- □**C** The overall literary quality of the《Ephesiaka》

Questions 7 to 9 are based on the following passage.

Archaeologists in Australia have never found sites where large extinct animals were killed, and it seems likely that many species of megafauna had become extinct prior to the arrival of humans. This might mean that there was minimal coexistence between humans and megafauna; yet there are sites that may well display temporal overlap, such as Cuddie Springs. If humans exploited megafauna, then why are there no kill sites? While Flannery (1990) argued that the rapid speed of the extermination may be responsible, it is more likely that lack of preservation of material dating to more than 40,000 years ago is responsible. Nevertheless, environmental signatures consistently point to the reduction in range and density of large animals, if not their final extinction, between 40,000 and 50,000 years ago, coincident with the arrival of people, and so the appearance of human hunters in the landscape is implicated in the extinction process. The timing of extinction trends in these mega-animals coincides with intensification of long-term continental drying, reductions in resource levels, and restructuring of the environment, and so even low levels of predation by the new human hunters may have tipped some species into terminal declines or accelerated declines already underway. Most likely, it was not intensive or exclusive hunting of these large animals that reduced their populations perilously, but merely the addition of a new social carnivore to stressful ecological circumstances.

Question 7 RC

Select one answer choice.

The highlighted sentence serves to

○**A** offer a possible explanation for why archaeologists have never found evidence of megafaunal killings in Australia

○**B** substantiate the belief that the demise of Australian megafauna was inevitable with the arrival of humans

○**C** provide evidence of how human hunters expedited the rate of the extinction of Australian megafauna

○**D** document that archaeologists had drastically overestimated the assumed ranges of Australian megafauna

○**E** suggest that the megafaunal extinction in Australia coincided with megafaunal extinctions in other locations

Question 8 RC

(Highlighted portion: "low levels of predation by the new human hunters")

Select one answer choice.

The author discusses the possible impact of "low levels of predation by the new human hunters" primarily to

○**A** explain why humans probably had a negligible impact on megafauna in Australia

○**B** suggest why the megafauna in Australia lasted as long as they did

○**C** establish the primary cause of the megafauna extinction in Australia

○**D** point to an important consequence of continental drying for megafauna in Australia

○**E** suggest the precarious state of megafauna when humans arrived in Australia

Question 9 RC 복수

Consider each of the choices separately and select all that apply.

According to the passage, which of the following can be verified about Australian megafauna?

- ☐ **A** The majority of them went extinct approximately 50,000 years ago.
- ☐ **B** Between 40,000 and 50,000 years ago, their population was drastically affected.
- ☐ **C** A reduction in their food supply was the primary culprit leading to their extinction.

Question 10 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Sokari Douglas Camp was _____ in the early 1990s by many of London's commercially driven art dealers and galleries, some of whom apparently found her themes difficult to market.

- ☐ **A** criticized
- ☐ **B** lionized
- ☐ **C** misrepresented
- ☐ **D** neglected
- ☐ **E** forsaken
- ☐ **F** eulogized

Question 11 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Millville has its share of suburban eyesores—cement-block strip malls, rows of fast-food restaurants, and _____ split-level homes marching up hillsides denuded of trees.

- ☐ **A** magnificent
- ☐ **B** superlative
- ☐ **C** abysmal
- ☐ **D** banal
- ☐ **E** lackluster
- ☐ **F** diminutive

Question 12 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The tools of science are so specialized that we accept them as a kind of _____ machinery for producing knowledge: we know that they work, but cannot explain why.

- ☐ **A** occult
- ☐ **B** efficacious
- ☐ **C** potent
- ☐ **D** arcane
- ☐ **E** impersonal
- ☐ **F** reliable

Question 13 is based on the following passage.

Many Namibian farmers raise cattle on farmland that is part of a cheetah's territory. Cheetahs are solitary hunters that hunt in and defend exclusive territories. For decades the farmers have been trapping and killing cheetahs on their land but have found that the frequency with which cheetahs are trapped has not decreased during this period. The Namibian cheetah population, therefore, must not have suffered any significant reduction as a result of the farmers' practice.

Question 13 CR

Select one answer choice.

Which of the following is an assumption on which the argument depends?

○**A** The average size of a Namibian cattle herd has not significantly increased in the past several decades.

○**B** The killing of adult cheetahs by farmers does not often result in the death of cheetah cubs from starvation or predators.

○**C** Cheetahs do not hunt healthy adult cattle.

○**D** Cheetahs are seldom killed except on farmland.

○**E** Namibian cheetah territories located away from farmland have not been increasingly likely to be abandoned in favor of territories that include at least some farmland.

Questions 14 to 15 are based on the following passage.

Experiments and field observations show that in a Mediterranean plant community, drought has a counterintuitively positive effect on shrub seedling establishment. Due to decreased competition by annuals, droughts increase opportunities for shrub seedlings. Under nondrought conditions, annuals competed with shrub seedlings more effectively, confirming the experimenters' assumption that annuals benefit more than shrub seedlings from an increase in water availability. This may be attributed to their faster or more efficient uptake of soil resources. Similar patterns can be observed in other semi-arid communities. Jurena and Archer showed for a savanna community that root biomass of grasses increased in wetter conditions, decreasing grassland susceptibility to encroachment by shrub seedlings.

Question 14 RC

(Highlighted portion: "positive effect")

Select one answer choice.

It can be inferred from the passage that the "positive effect" occurs because

○**A** water ceases to be a limiting factor

○**B** seedlings require less water than mature plants do

○**C** the growth of certain other plants is inhibited

○**D** drier conditions favor diverse species of annuals

○**E** shrub seedlings use soil resources more efficiently than other seedlings

Question 15 RC

Select one answer choice.

The author of the passage would most likely agree with which of the following statements about the growth of shrub seedlings?

○**A** In naturally occurring conditions, water availability is positively correlated with seedling growth.

○**B** In semi-arid climates, wetter than normal conditions have no appreciable effect on seedling growth.

○**C** When seedlings are grown in isolation, water restriction will not positively affect their growth.

○**D** Where there is competition among annual plants, shrub seedling growth will benefit from increased rainfall.

○**E** Where annual plants are well established, drought will have a negative elect on shrub seedling growth.
