S2	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
답															

Section 1 12 Questions · 18 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

While Zora Neale Hurston never avowed an affiliation with surrealism, an artistic movement celebrating the unconscious mind's creative power, French surrealist Guy Ducornet's citing her as an inspiration seems quite _____ given Hurston's intensely imaginative work.

- ○**A** tenable
- ○**B** arcane
- ○**C** audacious
- ○**D** prescient
- ○**E** eccentric

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

Shark teeth are among the most (i) _____ of all vertebrate fossils. While such (ii) _____ may befit creatures renowned for their appetites, it contrasts with the rarity of shark skeletons.

Blank (i)	Blank (ii)
durable	utility
useful	abundance
common	stability

Question 3 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Some critics claim that because medical journals receive (i) _____ selection of findings from clinical trials—mainly those trials that show (ii) _____ results for the drugs being tested—readers of those journals believe that some medications are more (iii) _____ than they really are, even when those medications are little more than placebos.

Blank (i)	Blank (ii)	Blank (iii)
a heterogeneous	controversial	expensive
an predictable	inconclusive	prevalent
a winnowed	positive	effective

Questions 4 to 5 are based on the following passage.

Some studies have shown that red-backed salamanders (RBS) are scarce in areas with acidic soils and that those present in such conditions have smaller-than-average bodies. Explanations have included the possibility that young RBS are adversely affected by acidic soil, that adult RBS can sense and may avoid acidic soil conditions, or that loss of RBS prey populations due to acidic soil could result in reduced RBS populations. Yet researchers found fairly high densities of large-bodied RBS at Lake Claire Watershed, where soil conditions are acidic. One hypothesis is that intraspecific geographical variation in acidity tolerance (i.e., local adaptation to an acidic environment) could exist for RBS. Previous studies showed potential local adaptation of some salamander species to acidity.

Question 4 RC

Select one answer choice.

The primary purpose of the passage is to

○**A** cite evidence that appears to contradict a widely held assumption

○**B** present contrasting interpretations of a particular research finding

○**C** explain how a particular environmental change can produce diverse outcomes

○**D** note an unexpected finding and summarize new possible explanation for it

○**E** identify a correlation and explain why one hypothesis about it is more persuasive than others

Question 5 RC

Select one answer choice.

Which of the following can be inferred about the studies mentioned in the highlighted portion of the passage?

○**A** They may have undercounted RBS in their study areas due to faulty methodology.

○**B** They focused less on adult RBS than on RBS in the early stages of their development.

○**C** They found evidence that acidic conditions adversely affect the prey on which RBS depend.

○**D** They drew unsubstantiated conclusions about the possible adverse effects of acidic conditions on RBS.

○**E** They were conducted in areas where the soil conditions were similar to those at Lake Claire Watershed.

Question 6 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

By and large, the writing of professional philosophers over the last century gets high marks for lucidity, though one can certainly point to a few whose prose is notably _____.

☐**A** slipshod

☐**B** muddled

☐**C** pretentious

☐**D** turbid

☐**E** methodical

☐**F** systematic

Question 7 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Miller reminded his clients that labor relationships are inherently _____; the interests of business owners are diametrically opposed to those of employees.

- ☐ **A** adversarial
- ☐ **B** exploitative
- ☐ **C** mercenary
- ☐ **D** antagonistic
- ☐ **E** variable
- ☐ **F** changeable

Question 8 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

His own writing style was _____: colorful and tart in its choice of language, willing to run risks in its allusions, metaphors, and verbal juxtapositions, prone to irreverent conclusions designed to surprise or startle.

- ☐ **A** effusive
- ☐ **B** audacious
- ☐ **C** lyrical
- ☐ **D** striking
- ☐ **E** ornate
- ☐ **F** emotional

Question 9 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Even the cleverest use of time management techniques is powerless to _____ sum of minutes in a person's life, so people squeeze as much as they could into each one of them.

- ☐ **A** justify
- ☐ **B** quantify
- ☐ **C** augment
- ☐ **D** enrich
- ☐ **E** measure
- ☐ **F** extend

Questions 10 to 12 are based on the following passage.

Many theorists now doubt that heat loss from Earth's core and radioactive decay are sufficient by themselves to produce all the energy driving the tectonic plates whose movements have helped shape Earth's surface. This leaves a loose end in current geological theory. Herbert Shaw argues that because scientists have underestimated the input of substantial amounts of energy from extraterrestrial impactors (asteroids and comets striking Earth), they have difficulty accounting for the difference between the quantity of energy produced from sources intrinsic to Earth and that involved in plate tectonics. Whereas most geologists have treated the addition of energy through the bombardment of Earth's surface by such impactors as a process separate and independent from the movement of Earth's tectonic plates, Shaw asserts that these processes are indivisible. Shaw's revolutionary "open-system" view recognizes a continuum between terrestrial and extraterrestrial dynamics, whereas modern plate tectonic theory, like the classical geology developed during the nineteenth century, is founded on the view that Earth's geological features have changed through gradual, regular processes intrinsic to Earth, without reference to unique catastrophic events. Classical geology borrowed a decisive, if unspoken, premise from Newton—the independence of Earth's processes from any astronomical context.

Question 10 RC

Select one answer choice.

The author's primary purpose is to

○**A** identify the influences informing a particular geological theory about the processes that have shaped Earth's surface

○**B** identify differences between two views of the extraterrestrial impactors and argue that the phenomenon has influenced the development of plate tectonic theory

○**C** argue that an explanation is based on dubious evidence and propose an alternative explanation

○**D** discuss an explanation and place that explanation under theoretical context

○**E** suggest that an apparent discrepancy poses a serious problem for a particular theory that many have believed

Question 11 RC

(Highlighted portion: "Shaw's revolutionary "open-system" view recognizes a continuum between terrestrial and extraterrestrial dynamics")

Select one answer choice.

The author of the passage mentions the "continuum" in order to

○**A** point out a relationship between plate tectonics and the nineteenth-century geology

○**B** explain how a theory of Newton's could influence geology and plate tectonic theory

○**C** distinguish between two sources of energy that contributed to the development of Earth's surface

○**D** point out a similarity between the surface of impactors and the surface of Earth

○**E** identify a feature of Shaw's view that deviates from current scientific theories

Question 12 RC

Select one answer choice.

The passage suggests which of the following about tectonic theory?

○**A** It has led scientists to overlook an important contribution to classical geologists from Newton.

○**B** It has been more successful than was classical geology in accounting for heat loss from Earth's core.

○**C** It is based on a premise about Earth's processes discerned in Newton's thought.

○**D** It has correctly explained the effects of extraterrestrial impactors on Earth's surface.

○**E** It corrects a fundamental flaw in classical geology.

Section 2 15 Questions · 23 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

Many creative photographers were delighted to find in instant photography a mode that encouraged them to stop viewing photography as _____ and start viewing it as something they could handle with spontaneity, even derision.

- ○**A** sacrosanct
- ○**B** ephemeral
- ○**C** malleable
- ○**D** egalitarian
- ○**E** autonomous

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

During the decade 2000–2010 in the United States, the increase in self-employed Hispanic entrepreneurs (i) _____ the increase in Hispanic workers overall. Historically, Hispanics have been (ii) _____ in the self-employment sector, so this change reduced the amount by which the Hispanic self-employment rate trailed the overall self-employment rate.

Blank (i)	Blank (ii)
catalyzed	underrepresented
tracked	undercompensated
exceeded	underappreciated

Question 3 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

The origin tales of the Native American Koasati people, which offer explanations of how the universe came into being, use two different strategies: some are direct, presenting an explanation that is central to the tale, while others are (i) _____ in that the explanation is (ii) _____ the tale.

Blank (i)	Blank (ii)
oblique	incidental to
episodic	explicit in
veracious	dependent on

Question 4 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

For whom is Shipton's《A New History of Jazz》intended? It is written in (i)_____ language and contains no extended musical analysis, suggesting that it is meant for amateurs. But as it is twice as long as the next-longest history of the subject, my guess is that general readers will be put off by its (ii)_____. On the other hand, its great length is precisely what enables Shipton to avoid (iii)_____ the story of jazz's development.

Blank (i)	Blank (ii)	Blank (iii)
accessible	paucity of exposition	belaboring
ornate	proliferation of detail	oversimplifying
graphic	preponderance of jargon	extolling

Questions 5 to 6 are based on the following passage.

We take it for granted that island populations must have a continental origin, and not the other way around. The number of islands that acquire their biota [i.e., plant and animal life] from a larger source supports this notion. There is, however, no fundamental mechanism in the equilibrium theory of island biogeography to preclude island species from colonizing the mainland. The belief in one-way biogeographic traffic has only begun to erode as phylogenetic analyses have revealed island origins for continental rodents and lizards. Among plants, the genus Exostema has successfully diversified in the continental Neotropics, while two populations in the angiosperm genus Erithalis have colonized Florida. At least two Neotropical bat lineages can be added to the growing list of island-to-continent colonizers.

Question 5 RC

(Highlighted portion: "There is, however, no fundamental mechanism in the equilibrium theory of island biogeography to preclude island species from colonizing the ")

Select one answer choice.

According to the passage, which of the following is true of the "equilibrium theory"?

- ○**A** It implies that very few island populations are able to colonize continental areas.
- ○**B** It can accommodate two-way biogeographic traffic between islands and the mainland.
- ○**C** It necessarily assumes that island species originate on continents.
- ○**D** It has been undermined recently by phylogenetic analyses.
- ○**E** It questions the distinction between island and continental populations.

Question 6 RC 문장선택

Select the sentence in the passage that answers the question.

Select the sentence that presents a presupposition.

Questions 7 to 9 are based on the following passage.

In 2018, the U.S. Congress passed the "45Q legislation," which significantly increases corporate tax credits for various uses of CO_2 (carbon dioxide). The most controversial use is "enhanced oil recovery." An oil company purchases CO_2, transports it by pipeline and injects it into depleted oil wells, pushing out extra oil it could not extract by conventional means. A climate change solution that entails producing more fossil fuels may sound Orwellian, and some environmental critics have attacked 45Q as just another fossil-fuel subsidy program in disguise. But enhanced oil recovery appears to reduce current emissions because the CO_2 typically captured from natural gas or ethanol refineries gets sequestered underground. Some environmentalists, such as Kurt Waltzer of the Clean Air Task Force, argue that turning carbon capture into an energy technology rather than an emission technology is the first step toward broad commercial adoption of CO_2 removal. It turns recaptured CO_2 into a product to be bought or sold rather than simply a cost to be endured.

Question 7 RC

Select one answer choice.

The passage is primarily concerned with

○**A** discussing a controversial aspect of specific legislation relating to CO_2

○**B** explaining the science of a new process for capturing CO_2

○**C** highlighting the shortcomings of a specific method of combating climate change

○**D** arguing that emission technologies are the most effective method of combating climate change

○**E** summarizing the advantages of relying on legislation to combat climate change

Question 8 RC

(Highlighted portion: "some environmental critics have attacked 45Q as just another fossil-fuel subsidy program in disguise")

Select one answer choice.

According to the passage, "some environmental critics" object to the 45Q legislation on which of the following grounds?

○**A** It will drive up the price of captured CO_2.

○**B** The process of extracting extra oil could have unforeseen environmental consequences.

○**C** Fossil fuels extracted via enhanced oil recovery typically produce more carbon emissions than ethanol or natural gas.

○**D** It will replace current subsidy programs that have been proven effective.

○**E** Its proponents' claims that it is part of a climate change solution are misleading.

Question 9 RC

Select one answer choice.

The passage suggests that Kurt Waltzer would likely agree with which of the following statements about the 45Q legislation?

○**A** It will likely replace some of the fossil-fuel subsidy programs that are currently in effect.

○**B** It is likely to impede the development of economically efficient ways of recapturing CO_2 for sequestration.

○**C** The positive effects of other portions of the legislation will likely outweigh the environmental harm caused by its controversial aspects.

○**D** The incentives it provides for the production of more fossil fuel are an ineffective means of reducing the production of CO_2 byproducts.

○**E** Its provision of corporate tax credits for using CO_2 for enhanced oil recovery may offer a net gain in environmental terms.

Question 10 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Restoring the old practice of producing fish in rice fields does not just make environmental and economic sense; it has the added advantage that it _____ benefits the very poor.

☐**A** abnormally

☐**B** predominantly

☐**C** eminently

☐**D** moderately

☐**E** particularly

☐**F** unnaturally

Question 11 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The early stages of being trained to ride a motorcycle are all about developing muscle memory, repeating combinations of hand-foot movements until they are _____ and precise.

☐**A** aberrant

☐**B** innate

☐**C** reflexive

☐**D** inborn

☐**E** automatic

☐**F** calculated

Question 12 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The auditors are relying on the failing bank to make changes that it has steadfastly resisted for years and even now does not seem _____ to carry out.

- ☐ **A** able
- ☐ **B** impatient
- ☐ **C** destined
- ☐ **D** disinclined
- ☐ **E** loath
- ☐ **F** keen

Question 13 is based on the following passage.

> A law has been proposed requiring the cargo boxes of trucks carrying gravel to be covered by a tarpaulin, because vehicles driving close behind open-topped gravel trucks can be damaged by gravel flying off these trucks. The law is unlikely to substantially reduce such damage, however: flying gravel is much less likely to come from the cargo box itself than from the grooves of the tires, in which gravel can become wedged during loading.

Question 13 CR

Select one answer choice.

Which of the following, if true, provides the strongest support for the argument given?

- ○ **A** The drivers of vehicles behind a gravel truck are more likely to remain close behind the truck if the trucks cargo box is covered than if it is uncovered.
- ○ **B** Most trucks that carry gravel already carry tarpaulins that their drivers use to cover the cargo box when they are carrying sand, which can blow out of the cargo box in significant quantities.
- ○ **C** Of all the damage that occurs to vehicles on the highway, debris that flies off trucks is the cause of only a very small fraction.
- ○ **D** The proposed law allows open-topped trucks on the highway to have uncovered cargo boxes whenever their cargo boxes are empty.
- ○ **E** Because of the great weight of a load of gravel, the driver of a gravel truck is often driving much more slowly than most of the other vehicles on the road.

Questions 14 to 15 are based on the following passage.

One reason researchers have long believed that Mars never enjoyed an extensive period of warm and wet climate is that much of the surface not covered by wind-borne dust appears to be composed of unweathered material. If water flowed for an extended period, researchers reasoned, it should have altered and weathered the volcanic minerals, creating clays or other oxidized, hydrated phases (minerals that incorporate water molecules in their crystal structure).

It turns out, though, that the scientists were not looking closely enough. New high resolution mapping data and close-up surface studies have revealed clays and other hydrated minerals in many regions. The clay deposits are scattered all over, in ancient volcanic surfaces and heavily cratered highland regions, some of which have apparently been exposed by erosion only recently.

Question 14 RC

Select one answer choice.

According to the passage, scientists are able to discover weathered material on the Martian surface because they have benefited from which of the following?

○**A** A new method to analyze volcanic craters created on the Martian surface

○**B** An improved ability to detect hydrated materials on the Martian surface

○**C** A more sophisticated understanding of the effect of wind-borne dust on the Martian surface

○**D** A decision to look for water primarily in heavily cratered highland regions

○**E** A better understanding of how erosion might affect clay deposits

Question 15 RC 복수

Consider each of the choices separately and select all that apply.

It can be inferred from the passage that the author would agree with which of the following statements regarding the reasoning discussed in the highlighted sentence?

☐**A** It provides the basis for an explanation of why water on Mars has been difficult to find until recently.

☐**B** It correctly identifies a consequence of water flowing on the Martian surface.

☐**C** It depends on a false assumption about how water and volcanic materials interact on Mars.
