Section 1 12 Questions · 18 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

The prime minister's reputation for _____ was sullied when it was revealed that he had known of fraudulent activities taking place in the country's banking system but failed to report them.

- ○**A** solicitude
- ○**B** impassivity
- ○**C** probity
- ○**D** diplomacy
- ○**E** forbearance

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

Although trains may use energy more (i) _____ than do automobiles, the latter move only when they contain at least one occupant, whereas railway carriages spend a considerable amount of time running up and down tracks (ii) _____, or nearly so.

Blank (i)	Blank (ii)
lavishly	vacant
efficiently	unimpeded
routinely	overloaded

Question 3 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Whatever the level of the museum's past (i) _____ American art, it pales beside its current (ii) _____. Since opening its renovated and expanded building, the museum has relegated American paintings to hard-to-find corners of the museum. It is as if American art is (iii) _____ the overwhelmingly European narrative that dominates the permanent collection galleries.

Blank (i)	Blank (ii)	Blank (iii)
advocacy of	craze	fundamental to
enthusiasm for	disdain	excluded from
neglect of	support	privileged over

Questions 4 to 5 are based on the following passage.

One of the reasons why many early British colonies in North America failed amid the New World's abundance was that the settlers' mindset prevented them from living like the native inhabitants. From Native Americans, the settlers learned such skills as building brushwood weirs to trap fish, but they did not adopt the real key to success: mobility. The whole intellectual foundation of European civilization was fixity—a worldview profoundly different from that of Native Americans, who moved in response to changing food resources. Settlers were drawn to North America by tales of its extraordinary abundance, not realizing that abundance is seasonal. Culture and ecological knowledge allowed Native Americans to exploit different food sources at different time of year.

Question 4 RC 복수

Consider each of the choices separately and select all that apply.

The author suggests which of the following about the early British colonies in North America that failed?

- ☐ **A** Their inhabitants' worldview was deeply affected with native people and practices.
- ☐ **B** Their inhabitants experienced critical food shortages in part because their culture hindered their ability to exploit seasonally available resources.
- ☐ **C** Their longevity would have been greater had the inhabitants adopted more of the fishing technologies used by Native Americans.

Question 5 RC

(Highlighted portion: "brushwood weirs")

Select one answer choice.

The author mentions "brushwood weirs" primarily in order to

- ○ **A** demonstrate that Native Americans provided certain forms of assistance to colonial settlers
- ○ **B** identify a skill that allowed Native Americans to thrive in regions where colonies failed to
- ○ **C** distinguish the kinds of technologies used by Native Americans from those used by colonial settlers
- ○ **D** acknowledge that colonial settlers adopted certain American ways, even though they failed in the New World
- ○ **E** contrast the assumptions of British colonial settlers and Native Americans in the New World

Question 6 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The reliable production of usable energy through the controlled fusion of hydrogen atoms into helium remains an elusive dream: even the most ardent efforts to achieve it have thus far been _____.

- ☐ **A** concealed
- ☐ **B** debated
- ☐ **C** thwarted
- ☐ **D** maligned
- ☐ **E** veiled
- ☐ **F** frustrated

Question 7 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Nicolaus Copernicus was much less _____ than commonly thought: he wanted to improve the cosmological theory of his day by introducing one important change while preserving as many of its conceptual foundations as possible.

- ☐ **A** visionary
- ☐ **B** philosophical
- ☐ **C** revolutionary
- ☐ **D** iconoclastic
- ☐ **E** diplomatic
- ☐ **F** circumspect

Question 8 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Flawed as it may be for it is constructed by subjective scientists, science itself has methods that help us _____ our bias and talk about objective reality with some validity.

- ☐ **A** bypass
- ☐ **B** reduce
- ☐ **C** exacerbate
- ☐ **D** magnify
- ☐ **E** acknowledge
- ☐ **F** circumvent

Question 9 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The _____ of Craig's government had left the nation almost totally unprepared for war when it came.

- ☐ **A** somnolence
- ☐ **B** inexperience
- ☐ **C** lethargy
- ☐ **D** obstinacy
- ☐ **E** perspicacity
- ☐ **F** acuity

Questions 10 to 12 are based on the following passage.

The area of literary rights is confusing for scholars whose work focuses on collaborative materials, particularly materials of earlier Native American writers. Questions arise over authorship and the determination of literary heirs. For example, recognition of heirs turns on the European-based assumption of the private ownership of a written statement. The first person to write down an oral tale can become legally recognized as the owner of that version of the story, just as the first chemist to patent a tribal healing practice becomes the owner of the resulting chemical formula. This insistance on private rather than collective ownership, derived from the nineteenth-century notion of the autonomous, creative, authorial voice, flies in the face of those who come from an oral tradition. Thus, a scholar concerned with finding literary heirs in order to afford them the benefits of copyright laws must in so doing accede to legal concept of ownership that has been used to appropriate knowledge from community-based cultures.

Question 10 RC

(Highlighted portion: "just as the first chemist to patent a tribal healing practice becomes the owner of the resulting chemical formula")

Select one answer choice.

The example of a chemical patent is used to illustrate a

- ○**A** legal mechanism by which community knowledge can be turned into private property
- ○**B** technological development that goes beyond the scope of nineteenth-century science
- ○**C** government action that creates a temporary form of intellectual property
- ○**D** kind of expression that exists only in written, rather than oral, form
- ○**E** way in which medical innovation can be rewarded

Question 11 RC

Select one answer choice.

The author of the passage focuses on a contrast between

- ○**A** patents and copyrights as ways of protecting ownership
- ○**B** oral and written as means of artistic expression
- ○**C** literary heirs and authors of literary works as creative thinkers
- ○**D** individual and collective ownership of cultural products
- ○**E** contemporary and nineteenth-century views of authorship

Question 12 RC

Select one answer choice.

According to the passage, the notion of a literary heir depends on a presupposition that can be traced to

- ○**A** a confusion over the purposes of collaboration
- ○**B** a misunderstanding between people from different cultures
- ○**C** a nineteenth-century view of authors as creative individuals
- ○**D** oral traditions that hand down knowledge through generations
- ○**E** scholars who first recorded oral tales in written form

Section 2 15 Questions · 23 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

An earlier generation of writers of historical novels, less _____ than today's writers about the need to distinguish fact from fiction, were accordingly careful to point out exactly what was invented in their works.

- ○**A** worried
- ○**B** punctilious
- ○**C** informed
- ○**D** forthright
- ○**E** jaded

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

Lorena de la Paz Carrete Lucero and her colleagues found (i) _____ brand loyalty among Mexican car purchasers, which suggests that regardless of customers' current brand preferences, customers may be (ii) _____ competitors' marketing strategies.

Blank (i)	Blank (ii)
rising	ignorant of
uniform	confused by
little	responsive to

Question 3 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

That there were a dozen complex debates on the lawyer's mind at any given moment did not (i) _____ his ability to perform physical work; on the contrary, he labored more vigorously when simultaneously engaged in such (ii) _____ forensic exercises.

Blank (i)	Blank (ii)
enhance	elementary
restore	cerebral
impede	tangential

Question 4 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Belief in the harmful effects of the drug has all the hallmarks of a viewpoint that is not (i)_____ even though the notion that the drug has negative consequences has been (ii)_____ multiple epidemiological studies over the past decade. Yet the true believers have (iii)_____, critiquing each new study that challenges their views and continuing to lean on supporting research that was retracted long ago.

Blank (i)	Blank (ii)	Blank (iii)
amenable to refutation	refined by	persisted
driven by self-interest	cited by	splintered
capable of propagation	upended by	capitulated

Questions 5 to 6 are based on the following passage.

A review of the chemical composition of Sierra Nevada mountain spring waters in 1964 revealed surprising differences in concentrations of total dissolved solids (TDS) among springs. Given the relatively uniform composition of the granite through which all the water flowed, review authors had expected more uniformity in the mineral content. They noted, however, that some of the springs were ephemeral, flowing only in springtime, while others were perennial. Though the two kinds of springs contained similar proportions of dissolved calcium, magnesium, sodium, bicarbonate, sulfate, and chloride, TDS levels in perennial springs were about twice those in ephemeral springs. Perennial springs' waters circulate more deeply into the earth and have a longer residence time than those of ephemeral springs, reacting more completely with granitic rocks.

Question 5 RC

Select one answer choice.

The passage suggests which of the following about the waters from different Sierra Nevada springs?

○**A** Those that had the highest concentrations of TDS came from springs that had more abundant water flow than those with the lowest concentrations.

○**B** Those from springs that flowed primarily in the springtime were less uniform in their mineral content than those from perennial springs.

○**C** Their chemical composition varied largely as a result of the types of granite through which the waters flowed.

○**D** They varied more in their overall TDS level than in their relative proportions of specific minerals.

○**E** They were not identifiable as having come from perennial or ephemeral springs on the basis of their TDS.

Question 6 RC

Select one answer choice.

The highlighted sentence serves primarily to

- ○**A** emphasize the importance of a particular distinction
- ○**B** establish a framework within which to evaluate an established opinion
- ○**C** present evidence to qualify an assertion made at the beginning of the passage
- ○**D** anticipate and correct a possible misconception about the author's central claim
- ○**E** claim provide context for a point made in the preceding sentence

Questions 7 to 9 are based on the following passage.

In her study of New Haven, Connecticut, covering the period 1639-1789, Cornelia Dayton argues that during the seventeenth century, colonial women had easy access to New Haven's courts, where their concerns and complaints were taken seriously by Puritan magistrates. These magistrates deviated from English legal practice by eschewing lawyers and simplifying procedures, thereby allowing, even encouraging, women's participation in litigation.

But by the early eighteenth century, Dayton contends New Haven's courts, like those of other British colonial areas, were reverting to English legal procedures, engaging lawyers to argue cases, and focusing more on property issues. These changes resulted primarily from an expanding economy that brought about new forms of credit, vastly augmented indebtedness, contact with nonlocal markets, and sharper class and racial distinctions. These factors worked to marginalize colonia women's economic contributions to their families and to diminish their influence in their communities and their usefulness to judges and juries in what Dayton calls the "litigated economy." In this "anglicized legal environment," patriarchal authority became more deeply entrenched, the spheres of public and private activity were restructured, and colonial women became less visible participants in a legal arena that now catered primarily to colonial men's interests.

Question 7 RC

Select one answer choice.

The primary purpose of the passage is to present one scholar's

- ○**A** revision of the standard view of a particular historical period
- ○**B** evaluation of a theory concerning a particular historical development
- ○**C** description of economic change at a particular time and place in history
- ○**D** account of a change in women's attitude toward the legal system at a particular point in history
- ○**E** analysis of a particular development in the evolution of a colonial legal system

Question 8 RC

Select one answer choice.

The passage suggests that colonial men's interests differed from colonial women's interests in which of the following ways?

○**A** Men's interests pertained primarily to the public sphere, whereas women's interests pertained primarily to the private sphere.

○**B** Men's interests were more concerned with property issues than were women's interests.

○**C** Men's interests coincided with those of the Puritan magistrates less often than did women's interests.

○**D** Men's interests were more directly affected by sharper class and racial distinctions than were women's interests.

○**E** Men's interests were more dependent on easy access to the courts than were women's interests.

Question 9 RC

Select one answer choice.

It can be inferred from the passage that New Haven's courts in the seventeenth century differed from New Haven's courts in the eighteenth century in which of the following ways?

○**A** In the seventeenth century, the procedures and practices of New Haven's courts were sharply divergent from those of other British colonial areas.

○**B** In the seventeenth century, a woman was as likely to win a suit against a man as she was to win a suit against another woman.

○**C** In the seventeenth century, a lower proportion of court cases was concerned with property issues.

○**D** In the eighteenth century, the authority of Puritan magistrates was curtailed.

○**E** In the eighteenth century, the courts did not recognize a woman's right to own property independently.

Question 10 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

In our solar system, Earth is the most _____ of the rocky, or terrestrial, planets, so when first searching beyond the solar system, scientists were not accustomed to planets of similar composition but many times the mass.

☐**A** complex

☐**B** temperate

☐**C** clement

☐**D** sizable

☐**E** intricate

☐**F** substantial

Question 11 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The writer assumes that most people feel some version of vexed ambivalence toward large corporations: _____ the convenience they deliver, yet resentful of the trade-offs that they continually demand.

- ☐ **A** wary of
- ☐ **B** enthralled by
- ☐ **C** appreciative of
- ☐ **D** encouraged by
- ☐ **E** suspicious of
- ☐ **F** dazzled by

Question 12 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

It can be _____ to see well-known historical figures played in films by actors who have become firmly associated in our minds with contemporary celebrity culture.

- ☐ **A** enlightening
- ☐ **B** unsettling
- ☐ **C** offensive
- ☐ **D** illuminating
- ☐ **E** gratifying
- ☐ **F** disconcerting

Question 13 is based on the following passage.

Most of the studies of the effect of aging on short-term memory have led researchers to conclude that younger adults perform short-term-memory tasks better than people over the age of 65. But these studies were all conducted in afternoon sessions. In a recent study conducted both in morning and in afternoon sessions, the older participants performed much better in morning sessions than in afternoon sessions. The younger participants did not, however, perform any better in the morning

Question 13 CR

Select one answer choice.

The statements given are structured to lead to which of the following conclusions?

○**A** Most previous studies led researchers to underestimate the ability of older adults to perform short-term-memory tasks.

○**B** In the morning, people over 65 perform short-term-memory tasks better than younger adults do.

○**C** There is no significant overall difference in long-term memory between older adults and younger adults.

○**D** The results of most previous studies of the effect of aging on short-term memory are best interpreted as showing that age has no effect on the ability to perform short-term-memory tasks.

○**E** Younger adults are able to perform short-term-memory tasks better if they perform them in the afternoon than if they perform them in the morning.

Questions 14 to 15 are based on the following passage.

> Despite today's more efficient electrical generators, modern electric-only power plants waste more of their fuel sources' potential energy than did Thomas Edison's power plants of the late 1800s. Edison used cast-off steam from his generators to warm nearby homes and factories. But few modern power plants use this residual heat, instead venting it into the air. When newer, larger plants required more real estate, they were built farther from customers. Moreover, because electricity travels easily, plants were located wherever they could tap the energy of a river or where local coal was especially cheap. The heat generated during the production of electricity does not travel far, however, so when power plants moved out to the horizon, the steam went to waste.

Question 14 RC

Select one answer choice.

It can be inferred from the passage that, in general, locating modern power plants closer to population centers would have?

○**A** compromised efforts to conserve energy in populated areas

○**B** decreased the demand for heating within those population centers

○**C** resulted in higher costs for the fuel used by those plants

○**D** required much larger plants than those currently operating

○**E** obliged power companies to find an alternative to coal as a fuel source

Question 15 RC

Select one answer choice.

The author suggests that steam generated by modern power plants is not used for heating because

○**A** steam generally proves incompatible with most modern industrial needs

○**B** other means of heating have become more cost-effective

○**C** steam is no longer produced in sufficient quantities to be useful

○**D** insufficient demand for heating exists nearby

○**E** transporting steam long distances would prove to be prohibitively expensive
