Section 1 12 Questions · 18 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

Some experts now feel that exercise should not be regarded as _____ other treatments for depression: they believe that exercise can itself serve as an appropriate remedy for some forms of the mood disorder.

- ○**A** a model for
- ○**B** a substitute for
- ○**C** an improvement on
- ○**D** an adjunct to
- ○**E** an impediment to

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

Despite the fact that the book promises a complete rethinking of the factors contributing to the conflict, the picture that the book paints is (i) _____; in identifying causes, it is more orthodox than (ii) _____.

Blank (i)	Blank (ii)
obscure	restrictive
detailed	revisionist
familiar	enigmatic

Question 3 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Until recently, historians of science treated fundamental research as (i) _____ pure science—that is, both were taken to refer to scientific investigations (ii) _____ technological and/or commercial objectives. Now, however, historians have realized that in the mid-twentieth century the phrase "fundamental research" was sometimes (iii) _____ industrial scientists, who applied the phrase to their own work in order to distinguish it from that of applied scientists and thus elevate their status.

Blank (i)	Blank (ii)	Blank (iii)
inimical to	mired in	appropriated by
synonymous with	free from	confusing for
more prestigious than	motivated by	objectionable to

Questions 4 to 5 are based on the following passage.

The participation of women in the economy of Britain's North American colonies in the eighteenth century has been underrated because of the assumption that household production could not become commercial. Such an assumption ignores the reality that women produced goods at home for exchange and sale. Barter among neighbors knitted the women of a community into vital trade networks that constituted the underground economy of eighteenth-century colonial North America. Unlike other informal local trade networks in early America, the economy of women never totally ceased to exist. The informal nature of these transactions did not provide the women who engaged in them with much economic power, but it did allow them a small measure of control over how they spent their time.

Question 4 RC 복수

Consider each of the choices separately and select all that apply.

According to the passage, in which of the following ways did the underground economy of women in eighteenth-century colonial North America differ from other informal trade networks?

- ☐ **A** It continued after other informal trade networks had disappeared.
- ☐ **B** It did not provide its participants with much economic power.
- ☐ **C** It gave its participants a certain degree of control over how they spent their time.

Question 5 RC

(Highlighted portion: "underground")

Select one answer choice.

In the context indicated, the word "underground" most nearly means

- ○ **A** subversive
- ○ **B** secretive
- ○ **C** subterranean
- ○ **D** alternative
- ○ **E** antiestablishment

Question 6 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Price knew about how to do people favors, sometimes just from kindness, but often out of _____.

- ☐ **A** self-interest
- ☐ **B** benevolence
- ☐ **C** magnanimity
- ☐ **D** opportunism
- ☐ **E** disinterest
- ☐ **F** mercy

Question 7 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

According to Panamanian composer Danilo Perez, the gravity of jazz pianist Randy Weston's performances is _____: you can copy one of his chords, but it doesn't sound the same.

- ☐ **A** elusive
- ☐ **B** indelible
- ☐ **C** unattainable
- ☐ **D** estranging
- ☐ **E** purposeful
- ☐ **F** alienating

Question 8 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

With Duncan's ambitious study, Chesnutt appears finally to have outgrown the _____ treatment he once received from literary historians and critics for whom he typically served as a merely transitional figure in the African American tradition.

- ☐ **A** cursory
- ☐ **B** jocular
- ☐ **C** heartfelt
- ☐ **D** didactic
- ☐ **E** fervent
- ☐ **F** perfunctory

Question 9 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The _____ of native South American textiles at the time of the Spanish conquest should not be surprising: it represented the apogee of one of the world's oldest and most sophisticated weaving and dyeing traditions.

- ☐ **A** splendor
- ☐ **B** eccentricity
- ☐ **C** diversity
- ☐ **D** brilliance
- ☐ **E** practicality
- ☐ **F** popularity

Questions 10 to 12 are based on the following passage.

In 1886 approximately 20 percent of United States workers belonged to the Knights of Labor, a labor-activist fraternal order. Nonetheless, soon after reaching this peak, the Knights membership began a rapid decline, and the organization never regained its national prominence. This collapse had wide-ranging repercussions: subsequent worker organizations took a less active and less broad-based organizational approach. The Knights' defeat demoralized those who championed radical reform and the organization of workers as a class, while empowering those who promoted a less inclusive strategy.

Current scholarship has tended to attribute the Knights calamitous decline to two factors: persistent tension between skilled and unskilled workers, and fierce opposition from employer associations, which used extralegal means to undermine unions. Voss examined both factors and found that employer associations' opposition, not conflict among the Knights, led to the Knights' rapid decline. But Voss's account fails to explain why the Knights succumbed so easily when other union movements thrived. It seems that the Knights' particular organizational structure prompted factional disputes among members and, more important, that competition from rival trade and fraternal organizations lured members away. While dissension within the order might not itself have sufficed to cause its demise, the profusion of organizational alternatives during this period induced mass defection, and, subsequently, the transformation of the American labor movement.

Question 10 RC

(Highlighted portion: "Current scholarship")

Select one answer choice.

The author would be most likely to agree with which of the following statements about "Current scholarship"?

○**A** It underestimates the extent to which the American labor movement was affected by the decline in influence of the Knights of Labor.

○**B** It tends to downplay the intensity of the tension between skilled and unskilled workers who belonged to the Knights of Labor.

○**C** It offers a more accurate view of the factors that led to the decline of the Knights of Labor than was offered in earlier scholarship.

○**D** It tends to characterize the organizational structure of the Knights of Labor in ways that obscure its effect on the organization's decline.

○**E** It fails to identify a key factor that accounts for the decline in membership of the Knights of Labor.

Question 11 RC

Select one answer choice.

According to the passage, the rapid decline in the Knights of Labor membership resulted in which of the following?

○**A** Greater prominence of labor activists who advocated a relatively moderate approach to organizing workers

○**B** Increasing tensions between labor activists who advocated a broad-based approach to organizing workers and those who advocated a less inclusive approach

○**C** A decline in the number of workers who regarded labor organizing as an effective means of advancing their interests

○**D** An increase in the aggressiveness with which employer associations sought to undermine workers' efforts to organize

○**E** An increase in public concern over the use of extralegal means to undermine workers' efforts to organize

Question 12 RC

(Highlighted portion: "rival trade and fraternal organizations")

Select one answer choice.

The author implies that the "organizations" highlighted in the passage were

○**A** strengthened by their adoption of the Knights' organizational structure

○**B** weakened by their separation of skilled from unskilled workers

○**C** more intent than the Knights had been on achieving radical political reforms

○**D** more aggressive than the Knights had been in countering the extralegal strategies used by employer associations

○**E** less committed than the Knights had been to including all workers

Section 2 15 Questions · 23 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

In the nineteenth century, geology became so respected among middle-class Britons that the science came to be seen as _____ a yardstick by which other disciplines measured their scientific rigor and imaginative power.

- ○**A** accessible
- ○**B** derivative
- ○**C** pragmatic
- ○**D** empirical
- ○**E** paradigmatic

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

Dr. Nicolelis believes that scientists are going to (i) _____ all the brain's information-processing mechanisms—or at least enough of them to yield improvements in neural medicine. Yet he also believes that certain aspects of our minds may remain (ii) _____ because our most meaningful thoughts are written in a code that is unique to each of us.

Blank (i)	Blank (ii)
discount	inviolable
misunderstand	perspicuous
ferret out	tractable

Question 3 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

High self-esteem has recently assumed a somewhat (i) _____ status in social psychology. On the one hand, high self-esteem is believed to confer a wide variety of adaptive and affective benefits; on the other hand, positive self-views have been linked to a number of intrapersonal and interpersonal strategies that can reasonably be described as (ii) _____.

Blank (i)	Blank (ii)
esoteric	antisocial
elevated	efficacious
paradoxical	transparent

Question 4 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Statistics is the branch of applied mathematics that studies ways of drawing inferences from limited and imperfect data. Of course, if all data sources were totally (i) _____, statisticians could do little but (ii) _____ every conclusion with "but we could be wrong about this." A mathematical science of statistics is possible because, although repeating an experiment numerous times may not yield uniform results, some results are more (iii) _____ than others.

Blank (i)	Blank (ii)	Blank (iii)
empirical	qualify	dubious
capricious	affirm	unexpected
defensible	substantiate	common

Questions 5 to 6 are based on the following passage.

One difficulty in convincing early scientists that craters formed as a result of impacts from space is that most craters are circular. Impacts could come in at any angle, and experiments firing projectiles in the laboratory show that low-angle impacts lead to elliptical craters, not circular ones. Furthermore, while there was rarely evidence of any impacting object, there was often silicate melt around, suggesting that craters were caused by volcanic processes. The breakthrough in understanding crater origin was the recognition that the shock caused by the impacting object—not the object itself—creates a circular crater some twenty times larger than the diameter of the impactor. The impact also generates enough heat to largely vaporize the impactor and melt the native rock.

Question 5 RC

Select one answer choice.

The primary purpose of the passage is to

○**A** explain why certain scientists rejected a particular hypothesis

○**B** show how a conventional theory was weakened by a new discovery

○**C** discuss a shift in an approach to explaining a natural phenomenon

○**D** account for the widespread influence of a scientific theory

○**E** trace the origins of a scientific dispute

Question 6 RC 복수

Consider each of the choices separately and select all that apply.

What can be inferred from the passage about the silicate melt found around craters?

☐**A** It was not caused exclusively by volcanic processes.

☐**B** It led early scientists to consider volcanic activity as a cause of crater formation.

☐**C** It can probably be explained by the intense heat caused by impact.

Questions 7 to 9 are based on the following passage.

This passage is excerpted from an article discussing archaeologists' recovery of wooden combs from an ancient Roman fortress.

When writing about combs, Roman archaeologists and ancient historians have nearly invariably associated these 'toilet articles' with female beauty and the mundus muliebris, the world of women. Such an interpretation is in striking contrast with many other periods of the European past, when combs appear to have been either ungendered or tokens of an exclusive male identity. From the Middle Bronze Age through to the Iron Age as well as in the Middle Ages, combs and other grooming tools often served as references to masculine beauty and as such became part of the grave furnishings arranged around the dead bodies of warriors. The question then comes to mind: why there would have been nothing of an equivalent in the Roman interlude? Moreover, the numerous finds that have recently been reported from various Roman army camps make one feel uneasy about the strengths of the traditional interpretation. Admittedly, the presence of women in and around Roman army camps is no longer a point of discussion, and some of the combs from such military contexts may indeed have been in use by the wives of officers or the concubines of ordinary soldiers, but can they account for the numbers that have been found? In view of these thoughts, one is tempted to consider whether the combs were perhaps rather used by the soldiers themselves.

Question 7 RC

Select one answer choice.

The primary purpose of the passage is to

- ○**A** contrast two types of archaeological evidence
- ○**B** explain why a particular finding is puzzling
- ○**C** note an exception to a generalization
- ○**D** question a particular interpretation
- ○**E** evaluate two competing hypotheses

Question 8 RC

(Highlighted portion: "grave furnishings")

Select one answer choice.

The author mentions "grave furnishings" primarily to

- ○**A** account for a particular error made by some archaeologists and historians
- ○**B** acknowledge the diversity of uses for combs in different historical periods
- ○**C** establish a precedent for a particular assumption about the mundus muliebris
- ○**D** suggest that combs may have had different meanings in funerary settings than in other settings
- ○**E** substantiate a particular interpretation of the significance of recovered combs

Question 9 RC

Select one answer choice.

The passage implies which of the following about Roman archaeologists and ancient historians?

○**A** They have tended to underestimate the significance of finds from ancient Roman army camps.

○**B** They appear to have misconstrued the decorative function of combs found at sites of ancient Roman army camps.

○**C** They diverge from researchers studying many other periods in the way they interpret combs recovered from historical sites.

○**D** They make an assumption about the use of ancient combs based on evidence from later periods of history.

○**E** They have generally assumed that combs were primarily used by women but that other toilet articles were used equally by both genders.

Question 10 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

In Roth's fiction, politics is an element that does not naturally occur in _____ form but is always getting confused and mixed up with shame and anger, baseball and sex.

☐**A** an unalloyed

☐**B** an unbiased

☐**C** an uncontroversial

☐**D** an objective

☐**E** a neat

☐**F** a tendentious

Question 11 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Lions are idiosyncratic animals that exhibit a remarkably wide range of behaviors, resisting our attempts to _____ them.

☐**A** assess

☐**B** protect

☐**C** pigeonhole

☐**D** stereotype

☐**E** appreciate

☐**F** admire

Question 12 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

In its few decades of existence, the field of technology assessment has undergone large changes: its original high ambitions to predict consequences of technology have been _____ if not discarded.

- ☐ **A** deferred
- ☐ **B** subverted
- ☐ **C** abandoned
- ☐ **D** relinquished
- ☐ **E** tempered
- ☐ **F** modulated

Question 13 is based on the following passage.

> Normally, seeds of Emmenanthe penduliflora stay dormant for years and germinate only when a fire burns through their habitat. Nitrogen dioxide in the smoke induces the seeds to germinate. Fires clear the brush, allowing germinating seeds to receive the sunlight they need to grow. The plants mature quickly, produce seeds, and then die. In areas with heavy automobile traffic, however, the seed germinates in the absence of fire, with automobile exhaust supplying the required nitrogen dioxide.

Question 13 CR

Select one answer choice.

The information given, if accurate, most strongly supports which of the following hypotheses?

- ○ **A** Fires in the habitat of E. penduliflora do not entirely destroy the plant's seeds even in the places where the fires burn most intensely.
- ○ **B** The nitrogen dioxide in automobile exhaust cannot harm plants of E. penduliflora after germination.
- ○ **C** If human intervention decreases the number of fires in the habitat of E. penduliflora, automobile exhaust can replicate the conditions the plant requires in order to thrive.
- ○ **D** Within the habitat of E. penduliflora, natural fires are significantly more frequent in areas with heavy automobile traffic than they are in other areas.
- ○ **E** Unless E. penduliflora seeds that have germinated can survive in the shade, automobile exhaust threatens the long-term survival of the plant in areas with heavy automobile traffic.

Questions 14 to 15 are based on the following passage.

The traditional picture of planet formation starts with small grains that collide and build into boulders, then larger and larger objects. If this is correct, the Kuiper Belt, an outer region of the solar system that exists beyond the planets, should hold leftover planetary building blocks. But that idea is undermined by Jupiter's moon Europa. One would expect that over millions of years Europa could have been repeatedly impacted by small comets formed from leftover planetary material in the Kuiper Belt. In fact, Europa's surface reveals very few small comet impact craters. Perhaps the comets disappear when they enter the inner solar system and are heated by the Sun. Or perhaps the Kuiper Belt contains no leftover planetary material from which comets could have formed.

Question 14 RC

Select one answer choice.

The argument anticipated in the highlighted sentence depends on which of the following assumptions?

- ○**A** The small craters on Europa's surface are possibly nonimpact craters.
- ○**B** If leftover planetary building blocks exist, they must be larger than small comets.
- ○**C** If small comets had formed in the Kuiper Belt, many would likely have impacted Europa.
- ○**D** Europa was formed later than most other planetary bodies' solar system.
- ○**E** If a planetary body is sparsely cratered, it cannot be formed in the Kuiper Belt.

Question 15 RC

Select one answer choice.

The author suggests that if the traditional picture of planet formation were correct

- ○**A** Europa would likely be formed largely of material from the Kuiper Belt
- ○**B** Europa would likely be formed from planetary building blocks left over from Jupiter's formation
- ○**C** Europa would likely be unique in showing the impacts of small comets
- ○**D** there would likely be many small comets originating from the Kuiper Belt
- ○**E** there would likely be more large craters than small craters on Europa's surface
