Section 1 12 Questions · 18 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

The science community's perennial lament over inadequate budgets has come to seem increasingly _____, because government support for science and engineering has never been greater.

- ○**A** vital
- ○**B** hopeless
- ○**C** poignant
- ○**D** condescending
- ○**E** disingenuous

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

The (i) _____ scientists—the notion that they are elitists scornful of the masses—is in no sense (ii) _____ the eighteenth century, since in our own time one does not have to look far to find such disdainful attitudes.

Blank (i)	Blank (ii)
faith in	a monopoly of
contempt for	a mystery for
apathy toward	an aspiration of

Question 3 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Like many composers of electronic music, this composer is a pianist by training, and one might be tempted to hypothesize that this (i) _____ is due to the fact that early electronic instruments, such as the synthesizer, were keyboard controlled. (ii) _____, the fact that, historically, most composers in any genre began as pianists (iii) _____ that hypothesis.

Blank (i)	Blank (ii)	Blank (iii)
oddity	Furthermore	clarifies
correlation	However	challenges
presumption	Specifically	extends

Questions 4 to 5 are based on the following passage.

Livestock-grazing programs in arid zones that are based on the equilibrium view of rangelands—that grazing-induced land degradation will occur if livestock numbers exceed the availability of food—have failed. Contrary to the equilibrium view, traditional pastoral systems of land use are more appropriate. Such systems involve a high degree of opportunism to cope with unpredictable rainfall and fluctuating food distribution. Livestock mobility relieves areas of concentration and allows herds to exploit unevenly distributed resources. A strategy of managing multiple livestock species allows optimal use of these variable grazing resources. These approaches to land use are similar to those recommended by nonequilibrium models, which assume that plant dynamics in arid zones are influenced more by rainfall than by grazing.

Question 4 RC

Select one answer choice.

According to the passage, the equilibrium view of rangelands is defined in terms of the relationship between

○**A** distribution of rainfall and patterns of grazing

○**B** predictability of rainfall and fluctuations in food distribution

○**C** mobility of livestock and extent of land degradation

○**D** livestock numbers and availability of food

○**E** number of livestock species and variability of grazing resources

Question 5 RC 복수

(Highlighted portion: "nonequilibrium models")

Consider each of the choices separately and select all that apply.

The passage suggests that proponents of "nonequilibrium models" would agree with which of the following statements about grazing-induced land degradation in arid zones?

☐**A** Traditional pastoral systems of land use have caused land degradation.

☐**B** Land degradation will occur if livestock numbers exceed the availability of food.

☐**C** The employment of opportunistic methods of land use can help avoid land degradation.

Question 6 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Personal computers have become so _____ that the use of digital evidence collected from them is now a common part of many criminal and civil investigations.

☐**A** ubiquitous

☐**B** sophisticated

☐**C** affordable

☐**D** convenient

☐**E** elaborate

☐**F** omnipresent

Question 7 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

In the wild, no other mammal _____ individuals from another species; badgers do not tend hares, deer do not nurture baby squirrels, and lions do not care for giraffes.

- ☐ **A** protects
- ☐ **B** fosters
- ☐ **C** aids
- ☐ **D** cajoles
- ☐ **E** adopts
- ☐ **F** coaxes

Question 8 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The performer can be _____ in his comedy, but he is fundamentally a bighearted person who displays a core sweetness even at his most manic.

- ☐ **A** inflammatory
- ☐ **B** pedestrian
- ☐ **C** gloomy
- ☐ **D** uninspired
- ☐ **E** puerile
- ☐ **F** provocative

Question 9 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Recent advances in the study of desert varnish have been a boon to geologists, allowing them to date surface features and establish regional climate histories in _____ detail.

- ☐ **A** novel
- ☐ **B** realistic
- ☐ **C** unprecedented
- ☐ **D** superfluous
- ☐ **E** extraneous
- ☐ **F** surprising

Questions 10 to 12 are based on the following passage.

As of the late 1980's, neither theorists nor large-scale computer climate models could accurately predict whether cloud systems would help or hurt a warming globe. Some studies suggested that a four percent increase in stratocumulus clouds over the ocean could compensate for a doubling in atmospheric carbon dioxide, preventing a potentially disastrous planetwide temperature increase. On the other hand, an increase in cirrus clouds could increase global warming.

That clouds represented the weakest element in climate models was illustrated by a study of fourteen such models. Comparing climate forecasts for a world with double the current amount of carbon dioxide, researchers found that the models agreed quite well if clouds were not included. But when clouds were incorporated, a wide range of forecasts was produced. With such discrepancies plaguing the models, scientists could not easily predict how quickly the world's climate would change, nor could they tell which regions would face dustier droughts or deadlier monsoons.

Question 10 RC

Select one answer choice.

The author of the passage is primarily concerned with

○**A** confirming a theory
○**B** supporting a statement
○**C** presenting new information
○**D** predicting future discoveries
○**E** reconciling discrepant findings

Question 11 RC

Select one answer choice.

It can be inferred that one reason the fourteen models described in the passage failed to agree was that

○**A** they failed to incorporate the most up-to-date information about the effect of clouds on climate
○**B** they were based on faulty information about factors other than clouds that affect climate
○**C** they were based on different assumptions about the overall effects of clouds on climate
○**D** their originators disagreed about the kinds of forecasts the models should provide
○**E** their originators disagreed about the factors other than clouds that should be included in the models

Question 12 RC

Select one answer choice.

It can be inferred that the primary purpose of the models included in the study discussed in the second paragraph of the passage was to

○**A** predict future changes in the world's climate
○**B** predict the effects of cloud systems on the world's climate
○**C** find a way to prevent a disastrous planetwide temperature increase
○**D** assess the percentage of the Earth's surface covered by cloud systems
○**E** estimate by how much the amount of carbon dioxide in the Earth's atmosphere will increase

Section 2 15 Questions · 23 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

The science of astronomy was begun by amateurs and today remains dependent on their contributions, which are incisive by virtue of being _____ by the a priori assumptions that often vitiate the work of professional research scientists.

- ○**A** characterized
- ○**B** unencumbered
- ○**C** supported
- ○**D** contradicted
- ○**E** inspired

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

In clinical research into new treatments or the causal factors of diseases, randomized, double-blind controlled clinical trials are seen as (i) _____, but, given their (ii) _____, often are not feasible.

Blank (i)	Blank (ii)
a dead end	expense
the gold standard	predictability
an unattainable ideal	appeal

Question 3 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

Although weeds often (i) _____ and are (ii) _____ human activities, their cussedness and refusal to play by human rules makes them subversive and the very essence of wildness.

Blank (i)	Blank (ii)
follow	unaffected by
thwart	impervious to
ignore	dependent on

Question 4 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

A minor criticism of the book, which is (i) _____ an understanding of the difficulty of doing direct research in Hong Kong politics, is that Soman relied on secondary sources to tell the story of Hong Kong's political development, with previous histories of the period (ii) _____ his research. Given Soman's (iii) _____ many of the players in Hong Kong politics, it is surprising that he did not use interviews and other forms of direct research to delve further into the motivations, strategies, and tactics of participants.

Blank (i)	Blank (ii)	Blank (iii)
attributable to	largely debunked by	deference to
exacerbated by	obviating the need for	estrangement from
tempered by	playing a large role in	proximity to

Questions 5 to 6 are based on the following passage.

Between 2500 and 2000 B.C., numerous statues representing real, historical people were produced in southern Mesopotamia. In the standard Western division of genres, mimetic resemblance is the first criterion of portraiture. However, the Mesopotamian images are portraits in that they represent individuals, even though they do not mimetically imitate the individual's features. These statues were to be placed in temples where they stood in for the individual as a worshipper and could function as a form of presence of that individual. They were therefore linked to the person in ways even closer than the modern notion of portrait, since the person's essence continued to exist in the image: numerous ancient texts demonstrate that images, for the Mesopotamians, had agency and were therefore powerful objects.

Question 5 RC 복수

Consider each of the choices separately and select all that apply.

The passage states which of the following about the Mesopotamian statues?

- ☐ **A** They lack mimetic resemblance to their historical subjects.
- ☐ **B** They had a religious function for the individuals represented.
- ☐ **C** Their uniformity makes it impossible to link the statues with specific individuals.

Question 6 RC

(Highlighted portion: "numerous ancient texts")

Select one answer choice.

The author of the passage mentions "numerous ancient texts" primarily in order to

○**A** support a contention about how Mesopotamians' attitude toward the statues differed from modern notions of portraiture

○**B** identify the source of information about what kinds of images the Mesopotamians considered to be portraiture

○**C** explain how modern scholars know that the statues were intended to be placed in temples

○**D** argue that the standard Western division of genres is too recently developed for it to be applied appropriately to the statues

○**E** defend the notion that the statues were made as representations of real, historical people

Questions 7 to 9 are based on the following passage.

Except in special situations, human beings' battle with mosquitoes will not be won by a simple campaign to eliminate the insects. Social tradition and habits, it seems, do much to ensure continual contact between mosquitoes and people. On the slopes of Mount Kilimanjaro, for example, mosquitoes breed in the leaf axils of a plant called dracaena. Although dracaena is not a food plant for humans, its use as a hedge or boundary marker is deeply rooted in tradition. Here, as in other parts of the world, human behavior ensures contact and conflict between people and mosquitoes.

I am not advocating a policy of living with mosquitoes; we already know that living with them is very unpleasant. But until we accomplish the difficult task of understanding how our habits often perpetuate—even create—our problems, efforts to resolve our battle with mosquitoes will probably fail.

Question 7 RC

Select one answer choice.

The passage is primarily concerned with

○**A** discussing shortsighted proposals to eliminate problems with mosquitoes

○**B** outlining ways in which people can alleviate the problems caused by mosquitoes

○**C** arguing that social traditions can perpetuate people's problems with mosquitoes

○**D** discussing various ways in which people come into contact with mosquitoes

○**E** suggesting how the breeding habits of mosquitoes create problems for people

Question 8 RC

Select one answer choice.

Which of the following best describes the organization of the passage?

○**A** A hypothesis is presented, weighed, and qualified, and then the modified hypothesis is reaffirmed.

○**B** An argument is advanced, then it is refuted, and an alternative is suggested.

○**C** A claim is made, a supporting example is provided, and then a conclusion is offered.

○**D** Opposing views are presented, evaluated and then reconciled.

○**E** A problem is identified, a solution is proposed, and potential difficulties with the solution are raised.

Question 9 RC 문장선택

Select the sentence in the passage that answers the question.

Select a sentence in which a potential misinterpretation of the author's position is addressed.

Question 10 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Gilbert Blane confirmed in 1780 that citrus could cure scurvy, yet the British navy did not systematically treat afflicted sailors with citrus for another fifteen years, largely due to the _____ of the naval bureaucracy.

☐**A** stubbornness

☐**B** ineffectiveness

☐**C** intransigence

☐**D** elusiveness

☐**E** imponderability

☐**F** contentiousness

Question 11 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The _____ of governmental subsidies to obscure airports that are rarely used underscores the political difficulties of cutting funds from even the most unnecessary projects.

☐**A** paucity

☐**B** effectiveness

☐**C** durability

☐**D** persistence

☐**E** adequacy

☐**F** dearth

Question 12 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Although many skeptics of the scientific theory _____ critiques that have long since been disproved, some of the doubters arguably bring up valid points.

- ☐ **A** overlook
- ☐ **B** revise
- ☐ **C** recycle
- ☐ **D** utilize
- ☐ **E** neglect
- ☐ **F** rehash

Question 13 is based on the following passage.

> Mayor: Vehicle exhaust produces dangerously high ozone levels in our city in hot, humid weather. As an incentive for people to commute by bus rather than by car, special free commuter buses will be scheduled on hot, humid days. Since a bus can carry about 40 people but produces only about 20 times as much exhaust as a car, ozone levels will be lower as long as the buses are more than half full.

Question 13 CR

Select one answer choice.

Which of the following, if true, most seriously weakens the argument?

- ○ **A** Most of the people who would take the special free buses are currently members of carpools.
- ○ **B** The city does not currently have enough buses to transport all of the commuters who normally commute by car.
- ○ **C** Buses that would be operating on hot, humid days would rarely, if ever, be filled to capacity.
- ○ **D** The amount of vehicle exhaust produced in the city is not significantly higher on hot, humid days.
- ○ **E** Not all commuter routes are used by enough people to warrant providing bus service for them.

Questions 14 to 15 are based on the following passage.

> Having a larger assortment to choose from increases consumers' expectations about matching their preferences. The heightened expectations seem logical, since assortments containing more or more varied items should increase the degree to which preferences can be matched. In practice, however, as assortment size increases, the degree to which consumers realize better preference matches often rises relatively little. Larger assortments may not actually offer more variety, the market may simply not supply an envisioned offering, or in the absence of sophisticated search tools, consumers may miss a better preference match even if it is available. Therefore, larger assortments can increase the likelihood that expectations will not be met, leaving consumers less satisfied with options chosen from larger rather than smaller assortments.

Question 14 RC

Select one answer choice.

In the highlighted portion of the passage, the author assumes that

○**A** consumers' attitude toward the assortment of choices they are presented with depends almost exclusively on the size of the range

○**B** consumers who have clear preferences make their choices more quickly than those whose preferences are relatively vague

○**C** consumers' anticipation of meeting specific expectations directly affects their satisfaction with a selected option

○**D** consumers presented with an assortment of choices often adjust the preferences they had beforehand

○**E** consumers presented with a larger assortment of choices often make their decisions too quickly

Question 15 RC

(Highlighted portion: "Having a larger assortment to choose from increases consumers' expectations about matching their preferences.")

Select one answer choice.

Which of the following best describes the function of the first sentence in the author's argument as a whole?

○**A** It states a premise on which the author's conclusion is based.

○**B** It provides information to support the inference made in the following sentence.

○**C** It introduces a concept that the author proves illogical.

○**D** It summarizes a position that the author proceeds to dispute.

○**E** It presents the phenomenon the argument is intended to explain.
