Livestock-grazing programs in arid zones that are based on the equilibrium view of rangelands—that grazing-induced land degradation will occur if livestock numbers exceed the availability of food—have failed. Contrary to the equilibrium view, traditional pastoral systems of land use are more appropriate. Such systems involve a high degree of opportunism to cope with unpredictable rainfall and fluctuating food distribution. Livestock mobility relieves areas of concentration and allows herds to exploit unevenly distributed resources. A strategy of managing multiple livestock species allows optimal use of these variable grazing resources. These approaches to land use are similar to those recommended by nonequilibrium models, which assume that plant dynamics in arid zones are influenced more by rainfall than by grazing.

As of the late 1980's, neither theorists nor large-scale computer climate models could accurately predict whether cloud systems would help or hurt a warming globe. Some studies suggested that a four percent increase in stratocumulus clouds over the ocean could compensate for a doubling in atmospheric carbon dioxide, preventing a potentially disastrous planetwide temperature increase. On the other hand, an increase in cirrus clouds could increase global warming.

That clouds represented the weakest element in climate models was illustrated by a study of fourteen such models. Comparing climate forecasts for a world with double the current amount of carbon dioxide, researchers found that the models agreed quite well if clouds were not included. But when clouds were incorporated, a wide range of forecasts was produced. With such discrepancies plaguing the models, scientists could not easily predict how quickly the world's climate would change, nor could they tell which regions would face dustier droughts or deadlier monsoons.

Between 2500 and 2000 B.C., numerous statues representing real, historical people were produced in southern Mesopotamia. In the standard Western division of genres, mimetic resemblance is the first criterion of portraiture. However, the Mesopotamian images are portraits in that they represent individuals, even though they do not mimetically imitate the individual's features. These statues were to be placed in temples where they stood in for the individual as a worshipper and could function as a form of presence of that individual. They were therefore linked to the person in ways even closer than the modern notion of portrait, since the person's essence continued to exist in the image: numerous ancient texts demonstrate that images, for the Mesopotamians, had agency and were therefore powerful objects.

Except in special situations, human beings' battle with mosquitoes will not be won by a simple campaign to eliminate the insects. Social tradition and habits, it seems, do much to ensure continual contact between mosquitoes and people. On the slopes of Mount Kilimanjaro, for example, mosquitoes breed in the leaf axils of a plant called dracaena. Although dracaena is not a food plant for humans, its use as a hedge or boundary marker is deeply rooted in tradition. Here, as in other parts of the world, human behavior ensures contact and conflict between people and mosquitoes.

I am not advocating a policy of living with mosquitoes; we already know that living with them is very unpleasant. But until we accomplish the difficult task of understanding how our habits often perpetuate—even create—our problems, efforts to resolve our battle with mosquitoes will probably fail.

Select the sentence in the passage that answers the question.

Select a sentence in which a potential misinterpretation of the author's position is addressed.

해설
저자는 인간 습관이 모기 문제를 지속시킨다고 주장하므로, '그럼 모기와 그냥 함께 살자는 말이냐'는 오해가 생길 수 있다.
'I am not advocating a policy of living with mosquitoes' 가 바로 그 잠재적 오해를 차단하는 문장.

- ☐ **F** rehash

해설
신호: Although many skeptics __ critiques that have long since been disproved, some … bring up valid points → 대조.

recycle과 rehash가 짝(낡은 것을 다시 꺼내 씀).
정답: C, F (recycle, rehash)

⚠ **함정 / 오답 포인트**
utilize(활용하다)는 의미상 가능하나 '이미 반박된 것을 반복'이라는 부정 뉘앙스가 없고 짝이 없다. overlook/neglect는 짝이지만 논리가 반대.

Mayor: Vehicle exhaust produces dangerously high ozone levels in our city in hot, humid weather. As an incentive for people to commute by bus rather than by car, special free commuter buses will be scheduled on hot, humid days. Since a bus can carry about 40 people but produces only about 20 times as much exhaust as a car, ozone levels will be lower as long as the buses are more than half full.

Which of the following, if true, most seriously weakens the argument?

○**A** Most of the people who would take the special free buses are currently members of carpools.

○**B** The city does not currently have enough buses to transport all of the commuters who normally commute by car.

○**C** Buses that would be operating on hot, humid days would rarely, if ever, be filled to capacity.

○**D** The amount of vehicle exhaust produced in the city is not significantly higher on hot, humid days.

○**E** Not all commuter routes are used by enough people to warrant providing bus service for them.

근거: 버스 1대(약 40명) = 자동차 약 20대분 배기가스 → 승객 1명이 자동차 1대를 대체한다고 가정.
A: 버스 이용자가 대부분 이미 카풀을 하던 사람 → 버스 승객 수만큼 자동차가 줄지 않음 → 가정이 무너져 약화.
정답: A

⚠ **함정 / 오답 포인트**
C(정원을 거의 못 채운다)는 끌리지만, 논증은 '절반 이상'만 요구하므로 만석이 아니어도 결론은 유지된다.

단어
incentive 유인책 · **exhaust** 배기가스 · **carpool** 카풀, 승용차 함께 타기

Having a larger assortment to choose from increases consumers' expectations about matching their preferences. The heightened expectations seem logical, since assortments containing more or more varied items should increase the degree to which preferences can be matched. In practice, however, as assortment size increases, the degree to which consumers realize better preference matches often rises relatively little. Larger assortments may not actually offer more variety, the market may simply not supply an envisioned offering, or in the absence of sophisticated search tools, consumers may miss a better preference match even if it is available. Therefore, larger assortments can increase the likelihood that expectations will not be met, leaving consumers less satisfied with options chosen from larger rather than smaller assortments.

○**C** consumers' anticipation of meeting specific expectations directly affects their satisfaction with a selected option

○**D** consumers presented with an assortment of choices often adjust the preferences they had beforehand

○**E** consumers presented with a larger assortment of choices often make their decisions too quickly

⚠ 원본 답안표 정답은 D이지만, 검토 풀이로는 A이(가) 더 타당해 보입니다. 채점은 원본 기준이며 아래 해설은 검토 풀이 기준입니다. 근거: Key says D, but the author never disputes the first sentence: he calls the heightened expectations 'logical' and his conclusion ('larger assortments can increase the likelihood that expectations will not be met') depends on expectations rising with assortment size. The first sentence is a premise of the conclusion, so A. ('however' contrasts with actual preference matches, not with sentence 1.)

해설
첫 문장: 선택지가 많으면 선호를 맞출 수 있다는 소비자의 '기대'가 커진다.
저자는 이를 반박하지 않고 'seem logical'이라 인정한 뒤, 실제 만족스러운 매칭은 별로 늘지 않는다고 말한다.
결론 'larger assortments can increase the likelihood that expectations will not be met'은 첫 문장(기대 상승)을 전제로 해야 성립.
→ 결론의 근거가 되는 전제 = A.
정답: A (교재 정답표는 D)

⚠ 함정 / 오답 포인트
D(저자가 반박하는 입장 요약): 저자가 반박하는 것은 '기대가 실제로 충족된다'는 생각이지, 기대가 커진다는 첫 문장 자체가 아니다. 'however'의 대상을 혼동하기 쉽다.

단어
assortment 구색, 모음 · **premise** 전제 · **envision** 상상하다, 마음에 그리다
