GRE Verbal Reasoning

모의고사 Set 15 — 문제지

Section 1: 12문항 / 18분 · Section 2: 15문항 / 23분 (고난도)
TC 7 · SE 7 · RC/CR 13 | 난이도 S1 2.4 / S2 2.8

- SE는 정확히 두 개, 복수선택(select all)은 해당하는 것 모두를 골라야 정답입니다.
- 정답과 해설은 별도 해설지에 있습니다.

답안 기록표

S1	1	2	3	4	5	6	7	8	9	10	11	12
답												

S2	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
답															

Section 1 12 Questions · 18 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

Astronomers affiliated with larger scientific institutions are often seen by their peers as _____; successful practice of astronomy today is contingent upon easy access to sizeable and costly instruments.

- ○**A** assiduous
- ○**B** collegial
- ○**C** pedantic
- ○**D** privileged
- ○**E** hypocritical

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

Humans can have (i) _____ tastes: crab brains and squeezable cheese are delicacies to many people, even as others find them repulsive. The preference for sweet and abhorrence of bitter is (ii) _____, however.

Blank (i)	Blank (ii)
self-indulgent	explicable
refined	strong
idiosyncratic	universal

Question 3 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

One disadvantage of reading (i) _____ accounts of historical events is that the textual (ii) _____ often lead to abrupt transitions and (iii) _____ references.

Blank (i)	Blank (ii)	Blank (iii)
straightforward	additions	explicit
condensed	alterations	copious
lucid	redundancies	unexplained

Questions 4 to 5 are based on the following passage.

This passage is adapted from material published in 2009.

Once “talkies” replaced silent movies that had live musical accompaniment, over 3,200 New York City pit musicians were suddenly jobless. The musicians union waged a campaign, culminating in a strike, to return live music to movie theaters, but it ended in utter disaster in 1937, when it became clear that the rest of the working class would not support them. The union was struggling against an inevitable tide. Working-class people not only preferred sound films but appreciated the ticket price, which was lower without the live talent. Freed from paying wages and from union regulations governing musicians' hours, theater owners could show films all day, and the Depression-era jobless could escape the weather or their troubles by spending afternoons at the movies for a few cents.

Question 4 RC

Select one answer choice.

The passage is primarily concerned with

○**A** examining how a phenomenon affected a particular group

○**B** critiquing a historical explanation for a particular change

○**C** describing innovations that led to the development of a new technology

○**D** explaining the success of a strategy

○**E** defending the viability of a political position

Question 5 RC

Select one answer choice.

It can be inferred from the passage that before the introduction of sound films, movie theater owners

○**A** did not question the control the musicians' union exercised over wages and hours

○**B** invested in technology that the advent of sound films made redundant

○**C** catered primarily to an audience that was not working class

○**D** had less flexibility in scheduling

○**E** made less profit per film showing

Question 6 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Unsurprisingly, the novelist's new work has not been without its critics, drawing particular attention from those who have _____ the vapidity of other novels of the same genre in a number of acerbic reviews.

☐**A** reprehended

☐**B** questioned

☐**C** ignored

☐**D** overlooked

☐**E** decried

☐**F** relished

Question 7 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

On stage, jazz artist James Carter often veers dangerously close to the _____: he becomes a man possessed, his tenor saxophone wailing and whimpering with a musicality so muscular it threatens to consume him.

- ☐ **A** lugubrious
- ☐ **B** doleful
- ☐ **C** intemperate
- ☐ **D** excessive
- ☐ **E** idiosyncratic
- ☐ **F** sublime

Question 8 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The early universe was _____ but no longer: galaxies, galaxy clusters, and stars punctuate the expanse of empty space, staking their uneven distribution throughout the firmament.

- ☐ **A** compact
- ☐ **B** symmetrical
- ☐ **C** uniform
- ☐ **D** inhospitable
- ☐ **E** homogeneous
- ☐ **F** impenetrable

Question 9 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Benjamin Franklin's reputation is so much one of appearing scientific investigation with common sense empiricism that it is somewhat startling to realize how _____ the great experiment's mentor truly was.

- ☐ **A** reasonable
- ☐ **B** speculative
- ☐ **C** pragmatic
- ☐ **D** conjectural
- ☐ **E** careless
- ☐ **F** judicious

Questions 10 to 12 are based on the following passage.

In《The Life of Charlotte Bronte》(1857), the first and the most celebrated biography of novelist Charlotte Bronte, Elizabeth Gaskell promoted the long-persisting romantic view of Bronte as having no connection with the rest of English society at a time when industrialization was causing much turbulence, but as having sprung naturally, like so much purple heather, out of the English countryside. Gaskell also portrayed Bronte as irreproachably proper, incapable of "unladylike" feelings or dangerous views; this was at variance with the subversive spirit Matthew Arnold accurately discerned, albeit with distance, deep within Bronte's fiction. While correcting many of Gaskell's errors and omissions at last, even Winifred Gerin's《Charlotte Bronte: The Evolution of Genius》(1967) failed to discard Gaskell's viewpoint. Feminists have introduced new interpretations of Bronte's life, but it is primarily Juliet Barker who takes into account the larger world that impinged on that life—the changing England in which old divisions of class and gender were under pressure.

Question 10 RC

Select one answer choice.

The primary purpose of the passage is to

○**A** consider similarities in several studies of Charlotte Bronte's life

○**B** defend a particular view of Charlotte Bronte's life

○**C** discuss a change in perspective on Charlotte Bronte's life

○**D** depict the social environment in which Charlotte Bronte lived

○**E** portray Charlotte Bronte as an early feminist writer

Question 11 RC

Select one answer choice.

The passage suggest that Matthew Arnold disapproved of Charlotte Bronte's fiction insofar as he believed that it

○**A** overly romanticized the English countryside

○**B** contained dangerous ideas buried within it

○**C** perpetuated outmoded social distinctions

○**D** failed to represent industrialized society realistically

○**E** reflected an excessive concern with propriety

Question 12 RC

Select one answer choice.

The passage suggest that Gaskell's biography of Charlotte Bronte advanced the idea that Bronte was

○**A** one of the most celebrated of the romantic novelists

○**B** an outspoken advocate of the social change

○**C** opposed to the industrialization of England

○**D** strongly influenced by the social upheaval of the times

○**E** chiefly the product of a rustic environment

Section 2 15 Questions · 23 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

Bridges are often offered as _____ examples of engineering, given that a bridge's structure is out in the open for all to see.

- ○**A** intelligible
- ○**B** collaborative
- ○**C** elementary
- ○**D** undervalued
- ○**E** serendipitous

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

As a general rule, the larger a governmental jurisdiction is, the (i) _____ its personnel system will be. Since a large percentage of the more than 80 thousand public jurisdictions in the United States are quite small, much human-resource management is conducted in (ii) _____ manner.

Blank (i)	Blank (ii)
more expensive	a unilateral
more formal	an ad hoc
less stratified	an equable

Question 3 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

While offering important insights into supernova remnants, Finch's paper is often rather (i) _____: it is (ii) _____ unexplained concepts and details.

Blank (i)	Blank (ii)
impenetrable	replete with
unoriginal	free from
trivial	purged of

Question 4 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Ironically, contemporary critics who celebrate the Victorian novel for its intellectual depth describe the (i) _____ effects of newer media—film, television, digital technology—in precisely the same terms that earlier critics had used to (ii) _____ the novel itself: as piecemeal entertainments that (iii) _____ mental effort on the part of the consumer.

Blank (i)	Blank (ii)	Blank (iii)
salubrious	lambast	entail
numbing	lionize	obviate
inflammatory	legitimate	presage

Questions 5 to 6 are based on the following passage.

In the United States, studying the territoriality of nonnative ants such as the red fire ant, a species native to South America, may seemingly unlikely to yield generalizable results—but it does have distinct advantages. Most importantly, whereas the fire ant shares habitat with many ant competitors in South America, its communities in the United States are much simpler. Colonizable landscape is blanketed almost continuously with fire ant territories, so all territorial boundaries are with other fire ant colonies. We can study the complexities of territoriality in almost pure, continuous populations of a single species, without the complicating influences of other competitors. Furthermore, the high densities of many fire ant populations ensure that interactions among competing colonies will be intense and obvious.

Question 5 RC

Select one answer choice.

The primary function of the highlighted sentence is to

○**A** provide evidence that helps explain the success of the red fire ant in the United States

○**B** identify a feature of red fire ant colonies in the United States that makes them appealing to researchers

○**C** suggest why red fire ant colonies have been so damaging in many regions of the United States

○**D** explain why researchers feel that studying the territoriality of red fire ants in the United States may yield problematic results

○**E** suggest a reason for the absence of competitors to the red fire ant in the United States

Question 6 RC 복수

Consider each of the choices separately and select all that apply.

The author implies that red fire ants in the United States differ from red fire ants in South America in the extent to which ants in the two environments

☐**A** dominate their habitat

☐**B** interact with other red fire ant colonies

☐**C** have had their territorial behavior studied by researchers

Questions 7 to 9 are based on the following passage.

Despite the magnitude of his accomplishments and praise from certain later philosophers, philosopher and scientist Charles Peirce (1839-1914) remains largely ignored in modern philosophy. This neglect stems from the inherent difficulty of his theories, the chaotic state of his voluminous writings, and the dissonance of his doctrines, which range from an insistence on rigorous scientific methodology to a cosmological metaphysics of "evolutionary love."

Certainly, much of Peirce's work is of mere historical interest, and many of his discoveries are partial anticipations of work done better by others. Still, he had a wider range of interests, a deeper knowledge of the history of philosophy, and a greater command of scientific culture than any philosopher of his day. Although Peirce never welded his views into a system and his writing is often slapdash, its tangled quality results directly from his immense erudition and his refusal to oversimplify. What he offers the patient reader is great breadth and complexity.

Question 7 RC

Select one answer choice.

The primary purpose of the passage as a whole is to

○**A** analyze a philosophical theory
○**B** describe the doctrines of a noted thinker
○**C** trace the evolution of a noted philosopher's thinking
○**D** reevaluate a body of work
○**E** defend a philosophical doctrine

Question 8 RC

Select one answer choice.

The author suggests that which of the following was a flaw in Peirce's work?

○**A** A rigidity in his attitudes
○**B** An inability to delve deeply into any one subject
○**C** A failure to organize his views
○**D** A propensity to romanticize his views
○**E** A tendency to appropriate others' theories

Question 9 RC

(Highlighted portion: "evolutionary love")

Select one answer choice.

The author mentions Peirce's theory of "evolutionary love" most likely in order to

○**A** provide an illustration of Peirce's immense erudition
○**B** demonstrate Peirce's command of the scientific culture of his time
○**C** illustrate the dissonance among Peirce's various doctrines
○**D** suggest that Peirce has integrated theories about evolution into his philosophical system
○**E** demonstrate the broad range of Peirce's expertise

Question 10 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Researchers comparing test subjects' abilities to interpret others' facial expressions found that while some expressions were easy to interpret, others were difficult because they were so _____ the person making the expression.

- ☐ **A** habitual for
- ☐ **B** customary for
- ☐ **C** peculiar to
- ☐ **D** idiosyncratic to
- ☐ **E** opaque to
- ☐ **F** inoffensive to

Question 11 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The firm's startling admission of bookkeeping irregularities called into question the _____ of the oversight that government exercises over the financial health of private businesses.

- ☐ **A** sufficiency
- ☐ **B** efficacy
- ☐ **C** authenticity
- ☐ **D** legitimacy
- ☐ **E** propriety
- ☐ **F** constitutionality

Question 12 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Judge Jones brought some welcome levity to the often tense, though sometimes _____, proceedings.

- ☐ **A** humorous
- ☐ **B** tedious
- ☐ **C** stressful
- ☐ **D** inconsequential
- ☐ **E** fraught
- ☐ **F** tiresome

Question 13 is based on the following passage.

The crustaceans known as harpacticoids are very widespread in marine sediments, where they feed on microorganisms by ingesting the sediment particles to which the microorganisms adhere. Heavy metals, such as those found in industrial pollution, readily adhere to sediment particles. Harpacticoids are poisoned by heavy metals but are unaffected by most other pollutants. Therefore, the concentration of harpacticoids in an area is a good indication of whether that marine environment contains heavy metals.

Question 13 CR

Select one answer choice.

Which of the following is an assumption on which the argument relies?

○**A** Industrial pollution is the principal source of heavy metals in marine sediments.

○**B** Harpacticoids are the only crustaceans that feed on microorganisms by ingesting sediment particles.

○**C** Harpacticoids are more susceptible to poisoning by heavy metals than are other marine organisms.

○**D** The microorganisms that harpacticoids feed on are not killed by pollutants that are harmless to harpacticoids.

○**E** The microorganisms that harpacticoids feed on absorb heavy metals.

Questions 14 to 15 are based on the following passage.

> Simulations indicate, and observations confirm, that the particles constituting Saturn's rings are giving up angular momentum to moons of the planet. The simulations predict that over just a few hundred million years, the related energy transfer will cause the rings' collapse. An analogous process occurs around young stars in the disks of matter from which planets emerge, and these protoplanetary disks do vanish that quickly, computer models show. Yet if Saturn's rings are so short-lived, a large comet or moon—the rings' presumed source—must have broken apart in Saturn's vicinity within the past several hundred million years. That is quite unlikely. It would have been much more probable in the young solar system—4 billion years ago or more.

Question 14 RC

Select one answer choice.

It can be inferred that the author of the passage mentions "protoplanetary disks" because

○**A** the computer modeling techniques used to study them were later applied to Saturn's rings

○**B** conclusions about them might reasonably be applied to Saturn's rings

○**C** the accepted understanding of them is challenged by observations of Saturn's rings

○**D** the material of which Saturn's rings are composed must at one time have been in a protoplanetary disk around the Sun

○**E** observations of Saturn's rings may serve as a substitute for observations of protoplanetary disks

Question 15 RC 복수

(Highlighted portion: "energy transfer")

Consider each of the choices separately and select all that apply.

The passage suggests which of the following about the "energy transfer"?

☐**A** Its effects are obscured by the angular momentum of Saturn's moons.

☐**B** It is part of a process that also imparts angular momentum to at least some of Saturn's moons.

☐**C** It proceeds more slowly than does an analogous energy transfer that occurs in the vicinity of young stars.
