S2	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
답															

Section 1 12 Questions · 18 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

Astronomy dominated ancient science partly because it was _____ in a way that the physics and biology of the time were not: even in prehistory, people probably used the apparent motion of the Sun, for example, as a crude clock, calendar, and compass.

- ○**A** precise
- ○**B** exciting
- ○**C** practical
- ○**D** lucrative
- ○**E** provocative

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

In the discussions on international patent law, many (i) _____ issues will probably be pushed far into the future. This cautious approach makes diplomatic sense, since attempts over the past 15 years to reach international agreements on patents have (ii) _____ just such sensitive issues.

Blank (i)	Blank (ii)
contentious	approached
stimulating	articulated
subjective	foundered on

Question 3 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Computers' triumph in chess had been engineered not by creating machines that (i) _____ human thought, as most experts in artificial intelligence had expected, but by perfecting machines that played like machines. The analogy with flight is (ii) _____: as long as people tried to fly by imitating birds, attaching wings to their arms and flapping madly, they were (iii) _____ to fail. Once engineering escaped the paradigm of the familiar, however, people were soon flying much faster than birds.

Blank (i)	Blank (ii)	Blank (iii)
aped	disingenuous	expected
shelved	instructive	likely
subverted	narrow	doomed

Questions 4 to 5 are based on the following passage.

When studying shrimp feeding from hydrothermal vents at the bottom of the ocean, biologists were surprised that the shrimps' reproductive cycles followed seasonal patterns. Far beyond the reach of sunlight, and with food abundant around the vents all year round, why should such animals reproduce seasonally? The answer might involve their offspring, which in their larval form drift in the currents to colonize new vents. The larvae must feed during their trip, and their springtime release coincides with a peak in algae raining down from surface waters. So far, researchers have found no evidence of seasonal breeding among vent-dwelling species that provide their offspring with yolk to sustain them or among vent-dwelling species found in areas of the ocean with no seasonal algae blooms.

Question 4 RC

Select one answer choice.

Which of the following best describes the function of the highlighted sentence?

○**A** It casts doubt on the accuracy of earlier observations of seasonal breeding among shrimp species living near hydrothermal vents.

○**B** It undermines the explanation proposed for seasonal breeding among some shrimp species living near hydrothermal vents.

○**C** It suggests that alternative theories are needed to explain seasonal breeding among shrimp species living near hydrothermal vents.

○**D** It describes the survival benefits to shrimp of mating in parts of the ocean where algae blooms rain down abundantly.

○**E** It supports the explanation proffered for the seasonal breeding observed among some shrimp species living near hydrothermal vents.

Question 5 RC 복수

Consider each of the choices separately and select all that apply.

Which of the following statements about hydrothermal vents can be inferred from the passage?

☐**A** They can propel newly released shrimp larvae toward other vents that are nearby.

☐**B** Some of them are found in areas of the ocean with no seasonal algae blooms.

☐**C** The food they provide for species living near them does not become seasonally scarce.

Question 6 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

While traditional Chinese historiography ostensibly described events in a neutral manner, early historians did not always _____ tendentiousness, sometimes offering moral judgments about the historical figures they discussed.

☐**A** eschew

☐**B** forgo

☐**C** denounce

☐**D** descry

☐**E** defend

☐**F** justify

Question 7 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Citing the corruption and intrigue that pervaded politics in the city, my colleague _____ the newspaper's trove of journalism prizes, declaring that finding great stories in the city must be effortless.

- ☐ **A** slighted
- ☐ **B** ignored
- ☐ **C** lauded
- ☐ **D** disparaged
- ☐ **E** confounded
- ☐ **F** commended

Question 8 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

It is easy to see why the aspiring singer was _____ the awareness of her lack of talent: her shaky voice notwithstanding, she was a kindly woman with a genuine appreciation for music.

- ☐ **A** surprised by
- ☐ **B** insulated from
- ☐ **C** humbled by
- ☐ **D** appreciative of
- ☐ **E** guided to
- ☐ **F** buffered against

Question 9 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Leaders within the Native American culture known as Fort Ancient differed from those of the neighboring Mississippian groups, whose authority was often _____; indeed, one expert has described the Fort Ancient society as intensely egalitarian.

- ☐ **A** quixotic
- ☐ **B** dubious
- ☐ **C** uncertain
- ☐ **D** coercive
- ☐ **E** efficacious
- ☐ **F** imperious

Questions 10 to 12 are based on the following passage.

Availability and management of water greatly influenced human settlement in the Maya Lowlands, and much of Mayan social innovation was centered on storing excess water for times of need. In northern Yucatan, the permanent water table is sufficiently shallow that it can be accessed by natural wells known as cenotes. However, over much of the Maya Lowlands, the water table is too deep to have been available to the Maya. In response, they constructed artificial reservoirs to trap runoff. For example, Gallopin estimates that the reservoirs at Tikal (an ancient Mayan city) could have provided for the domestic needs of about 9,600 people for a period of 6 to 18 months. Even with elaborate water capture and management systems, the Maya were greatly dependent upon adequate rainfall over much of their empire and were thus susceptible to frequent or prolonged droughts that approached or exceeded the capacity of their reservoirs. In fact, evidence of droughts in the region based on studies of lake and shallow ocean sediments has led many researchers to suspect that climate was responsible for the Classic Maya collapse.

Question 10 RC

(Highlighted portion: "studies of lake and shallow ocean sediments")

Select one answer choice.

The author mentions "studies of lake and shallow ocean sediments" primarily in order to

- ○**A** describe the results of a novel study
- ○**B** identify the source of evidence that suggested a hypothesis
- ○**C** undermine a conventional explanation
- ○**D** highlight the importance of one type of evidence
- ○**E** clarify the value of a particular undertaking

Question 11 RC

Select one answer choice.

The passage suggests which of the following about the reservoirs at Tikal?

- ○**A** They may have been designed by people from northern Yucatan.
- ○**B** They may have hastened the Classic Maya collapse.
- ○**C** They were insufficient to protect the Maya against some lingering droughts.
- ○**D** They were more effective than the cenotes found in northern Yucatan.
- ○**E** They formed a basis for certain Mayan cultural traditions.

Question 12 RC

Select one answer choice.

The passage suggests which of the following about cenotes?

- ○**A** They allowed people in northern Yucatan to avoid dependence on artificial reservoirs.
- ○**B** They were less capacious than the artificial reservoirs found in the Maya Lowlands.
- ○**C** They helped protect people in the Maya Lowlands from prolonged droughts.
- ○**D** They allowed the Maya to store excess water for times of need.
- ○**E** They were an important Mayan social innovation.

Section 2 15 Questions · 23 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

The fanciful notion that the legislative initiative would bring unlimited social benefits has soured into an equally _____ mood of skepticism and distrust.

- ○**A** valid
- ○**B** pessimistic
- ○**C** unanticipated
- ○**D** pragmatic
- ○**E** baseless

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

When the United States government created the Post Office at the founding of the republic, it didn't invite rival postal firms to compete; in fact, it created a monopoly. That monopoly, however, was (i) _____ free expression because of the policies Congress adopted, which (ii) _____ the circulation of newspapers irrespective of their viewpoint and spread postal service throughout the country.

Blank (i)	Blank (ii)
conducive to	subsidized
threatened by	limited
dependent on	trivialized

Question 3 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

Maddox presents a more (i) _____ view of Franklin than the stereotyped rendering of her as the martyr whose data were stolen. By focusing substantial attention on Franklin's achievements working on the molecular structure of coal and on virus research, Maddox (ii) _____ reducing Franklin's legacy to her involvement in the (admittedly central) scientific story of DNA.

Blank (i)	Blank (ii)
conventional	resists
facile	deplores
complex	invites

Question 4 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Although Uruk in southern Mesopotamia has been (i) _____ as being both the first city and the model for later ones, at least two sites in northern Mesopotamia have yielded clear evidence of urbanization long before the existing evidence from Uruk, and other discoveries indicate that some of the (ii) _____ early urbanism were invented not in southern Mesopotamia but in the north. These findings have led some archaeologists to (iii) _____ a serious reconsideration about when and where the first cities arose.

Blank (i)	Blank (ii)	Blank (iii)
established	defining features of	evaluate
contested	derivative aspects of	ignore
presented	traditional theories about	propose

Questions 5 to 6 are based on the following passage.

It is often said that art forgery has existed as long as has the demand for artwork, but this is not strictly true. There is no clear evidence that art forgeries as such existed in antiquity. There were many collectors, but they seem to have found copies as desirable as originals. Even the presence of a signature was not necessarily taken as an indication that the object in question was made by that artist. The notion of art forgery, as we understand it today, seems to require the idea that originals possess certain qualities not found even in the best copies. It also requires the presence of an expert who can distinguish between the two; but such expertise seems not to have existed in antiquity.

Question 5 RC

Select one answer choice.

The passage suggests which of the following about art collectors in antiquity

○**A** They were largely ignorant about who created the artworks they owned.

○**B** They did not consider originality a quality that made an artwork more collectible.

○**C** They had a unique understanding of the notion of art forgery.

○**D** They were more concerned about the subject matter of an artwork than about the identity of its creator.

○**E** They did not view their art purchases as investments, as do some art collectors today.

Question 6 RC

(Highlighted portion: “many collectors”)

Select one answer choice.

The author mentions “many collectors" primarily to

○**A** describe an exception to an artistic trend in antiquity

○**B** underscore the universality of the appreciation of works of art

○**C** provide an example of a disputable claim about art forgery in antiquity

○**D** dispel a misconception about art culture in antiquity

○**E** cite a factor that might be expected to promote art forgery in antiquity

Questions 7 to 9 are based on the following passage.

Progressivism, the wave of reform movements in the early twentieth century whose stated intention was to make United States society more democratic, has undergone significant scholarly reevaluation by historians over the years. In the 1960s, leftist scholars dismissed progressive reform as a mask for the empowerment of individuals forming a corporate, capitalist elite. In the two subsequent decades, many scholars began to question whether there was any such thing as progressivism; the phenomenon seemed so diverse and amorphous that the word itself, some claimed, had no meaning. In the early 1990s, however, the tone, if not always the substance, of historical accounts of progressivism changed again. Although some scholars admitted that progressivism was diverse, they insisted that there is an identifiable "progressive minimum", a core of belief and action that lends coherence to the concept. Further, some scholars, while acknowledging that progressivism had some conservative and even reactionary results, argue that the motives behind many of the reform movements of the era were genuinely democratic.

Question 7 RC

Select one answer choice.

Which of the following most accurately describes the organization of the passage?

○**A** A theory is proposed, refuted, and then amended.

○**B** The thesis of the passage is stated and several views for and against that thesis are compared and contrasted.

○**C** Opposing views are presented, classified, and then reconciled.

○**D** An assertion is made and an elaboration of that assertion is provided.

○**E** An argument is advanced and evidence is presented to refute it.

Question 8 RC

(Highlighted portion: "progressive minimum")

Select one answer choice.

According to the passage, the term "progressive minimum" is used by scholars who have

○**A** determined the quintessential elements of reform movements in general

○**B** claimed that progressivism was a movement grounded in a set of common beliefs

○**C** underrated the impact and historical significance of progressivism

○**D** defined progressivism as a unified effort led by a core of proponents

○**E** questioned the basic motivation underlying the inception of progressivism

Question 9 RC

Select one answer choice.

The primary purpose of the passage is to

○**A** analyze the early-twentieth-century sociopolitical environment of the United States

○**B** affirm the profound differences among reformist groups contending for power in the early-twentieth-century United States

○**C** explain a radical approach to promoting democracy in the early twentieth-century United States

○**D** argue that the results achieved by several decades of reform activity begun in the early-twentieth-century United States were paradoxical

○**E** trace the course of inquiry over time regarding an aspect of early twentieth-century United States history

Question 10 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Jimi Hendrix was a pivotal figure in the visionary aesthetic movement known as Afrofuturism, which is steeped in African American musical tradition yet _____ technological innovation, from synthesizers to spaceships.

☐**A** circumspect about

☐**B** indebted to

☐**C** enthralled by

☐**D** wary of

☐**E** captivated by

☐**F** heedful of

Question 11 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Even though the man was reserved in his speech, he thoroughly understood his mother, which made him far from _____ as people usually thought.

☐**A** comprehensive

☐**B** ingenuous

☐**C** sophisticated

☐**D** foolish

☐**E** simple

☐**F** sententious

Question 12 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Smil's analysis of climate change is even more _____ than that supplied by most well-informed writers, and thus deserves serious consideration.

- ☐ **A** nuanced
- ☐ **B** unoriginal
- ☐ **C** complex
- ☐ **D** derivative
- ☐ **E** partisan
- ☐ **F** compelling

Question 13 is based on the following passage.

> Manatees are large marine mammals that inhabit the coastal waters of southern Florida and feed on the vegetation that grows in shallow waters. They frequently gather in the vicinity of power stations that release heated water into the sea. Since the warmer water supports abundant vegetation, some biologists have hypothesized that manatees gather in these areas because they are attracted to this convenient source of food.

Question 13 CR

Select one answer choice.

Which of the following, if true, most seriously undermines the hypothesis?

- ○ **A** When a power station near which manatees usually gather is shut down for even a few hours, manatees move elsewhere.
- ○ **B** Other marine animals that feed on vegetation also congregate in large numbers in the vicinity of power stations.
- ○ **C** All of the species of vegetation that grow near the power stations also grow elsewhere in the coastal waters of southern Florida, though not nearly as abundantly.
- ○ **D** Even more manatees than usual gather near power stations during the winter months, when vegetation growth away from power stations slows.
- ○ **E** Manatees also tend to gather in waters where high levels of nutrients support especially abundant vegetation.

Questions 14 to 15 are based on the following passage.

Much of ecological theory consists of models that are so highly idealized that they are of little real-world predictive value. In addition, many of the parameters used in models such as birth and death rates are exceedingly difficult to estimate accurately in the field. Consequently, ecological theory is rarely directly relevant to the practice of conservation biology. One notable exception is MacArthur's theory of island biogeography, which predicts the species richness of an island on the basis of its size and degree of isolation. This theory could provide important insights into nature preserves, which can be analogous to islands, often consisting of relatively undisturbed ecosystems surrounded by biologically distinct areas.

Question 14 RC

Select one answer choice.

Which of the following best describes the function of the sentence highlighted in the passage?

○**A** It suggests a direction for future research regarding, a theory presented earlier in the passage.

○**B** It presents evidence that will support a theory that is introduced in the following sentence.

○**C** It questions the usefulness of a particular version of a theory.

○**D** It clarifies an ambiguous statement made earlier in the passage.

○**E** It presents a general rule to which the passage will identify the exception

Question 15 RC 복수

Consider each of the choices separately and select all that apply.

It can be inferred from the passage that the author would probably agree with which of the following statements?

☐**A** The practice of conservation biology may be directly affected by MacArthur's theory of island biogeography.

☐**B** Undisturbed systems surrounded by biologically distinct areas may be helpful in estimating birth and death rate parameters more accurately.

☐**C** The similarity between nature preserves and the islands studies in MacArthur's biogeography theory may help predict species richness in nature preserves.
