S2	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
답															

Section 1 12 Questions · 18 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

Monumental changes taking place in the structures of world business match some equally _____ changes taking place in the relations of international companies to the governments with which they deal.

- ○**A** ill-advised
- ○**B** magnanimous
- ○**C** portentous
- ○**D** discreet
- ○**E** overblown

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

A long-running philosophical debate in the field of stratigraphy—the study of sequences of sedimentary rocks—is whether the sedimentary record represents mainly (i) _____ happenings (e.g., waves and tides) or their opposite, (ii) _____ events (e.g., hurricanes and flash floods).

Blank (i)	Blank (ii)
measurable	destructive
everyday	extraordinary
discrete	unclassifiable

Question 3 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Until recently, superhero comics were seen as irredeemably (i) _____; they were widely disparaged for being so (ii) _____ in conception and execution, and anyone who was a fan was given plenty of reasons to be (iii) _____.

Blank (i)	Blank (ii)	Blank (iii)
puerile	lowbrow	heartened
innocuous	shrewd	emulated
facetious	moralistic	abashed

Questions 4 to 5 are based on the following passage.

Because coal contains toxic materials such as arsenic and lead, and its use contributes to air pollution and acid rain, one might therefore conclude that no good case could be made for burning it for fuel. But that depends on where one is starting from. Switching to coal from firewood is beneficial for both the environment and the health of the individual. Firewood use results in deforestation, loss of ecosystems, and degradation of soil quality. Wood fires are also sooty, and their particulates contribute to global warming by decreasing the reflectivity of snowfields. Finally, firewood is generally burned in homes with poor ventilation and poses a greater health risk to the individuals than they would experience from a coal-fired utility that provides electricity to their homes.

Question 4 RC 복수

Consider each of the choices separately and select all that apply.

The passage indicates which of the following about firewood?

- ☐ **A** Its use has a damaging effect on the quality of soil.
- ☐ **B** Its advantages over coal as a fuel have been exaggerated.
- ☐ **C** Its effect on human health is partly a result of the conditions under which it is burned.

Question 5 RC

(Highlighted portion: "arsenic and lead")

Select one answer choice.

The author mentions arsenic and lead primarily in order to

- ○ **A** identify some of the factors that might support a particular conclusion
- ○ **B** challenge an assertion about the toxicity of various sources of fuel
- ○ **C** establish the grounds for a recommendation concerning future energy use
- ○ **D** acknowledge a weakness of the hypothesis proposed by the author
- ○ **E** question the advantages of switching from one source of fuel to another

Question 6 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Agencies responsible for protecting natural resources too often issue permits allowing exploitation of those resources, a process that remains _____ given that agencies have become experts at masking their decisions in the scientific terms.

- ☐ **A** controversial
- ☐ **B** exacting
- ☐ **C** obscure
- ☐ **D** onerous
- ☐ **E** opaque
- ☐ **F** misleading

Question 7 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

"Revolutionary" and "unique" are words that have become _____: every century in human history is described as unique, and every year, somewhere in the world, some event is characterized as revolutionary.

- ☐ **A** overused
- ☐ **B** interchangeable
- ☐ **C** confused
- ☐ **D** distorted
- ☐ **E** trite
- ☐ **F** contentious

Question 8 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The twentieth-century Chinese painter Fu Baoshi was an impassioned advocate of ink-and-brush painting, a form that was often dismissed by his contemporaries as _____ a relic of the old imperialist elite.

- ☐ **A** fusty
- ☐ **B** conventional
- ☐ **C** constricted
- ☐ **D** retrograde
- ☐ **E** effete
- ☐ **F** sentimental

Question 9 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

In many branches of science, our knowledge and technology have advanced so rapidly that new studies carried out with improved instruments and techniques may well _____ research done just twenty years earlier.

- ☐ **A** confirm
- ☐ **B** supplant
- ☐ **C** elaborate
- ☐ **D** supersede
- ☐ **E** question
- ☐ **F** validate

Questions 10 to 12 are based on the following passage.

The theory of motivated reasoning suggests that, in legal decisions, different judges will assess the same information differently, depending on their backgrounds and fundamental values. Attitudinalists (theorists who contend that judges' decisions are driven by their own policy preferences) have concurred that their findings on ideological decision-making could be explained by the "human reflex" to "convince oneself of the propriety of what one prefers to believe—motivated reasoning."

Motivated reasoning, however, is subject to "reasonableness constraints." For example, the accuracy of decision-making is enhanced when the stakes for the decision are higher, when the decision must be justified, and when the decision will be made public. Such circumstances often apply to judicial decisions. The presence of stronger arguments contrary to preferences reduces the influence of motivations. The limitations of the power of motivated reasoning are apparent from the numerous unanimous opinions of the United States Supreme Court (whose members generally represent a range of ideological predispositions) and other cases in which justices appear to vote contrary to their ideological preferences. One would anticipate that the influence of such motivated reasoning is at its apex when the law is relatively less determinate, which is consistent with the findings of empirical research.

Question 10 RC

Select one answer choice.

The author suggests which of the following about motivated reasoning?

○**A** It allows judges to take into consideration a wide range of views beyond those that they themselves hold.

○**B** It has a greater impact on the decisions of judges with certain kinds of policy preferences than on the decisions of judges with other preferences.

○**C** It is unlikely to result in ideologically biased judicial decisions in cases where the law is open to multiple interpretations.

○**D** Its effects on a decision may be mitigated by exposure to compelling arguments that challenge the decision maker's biases.

○**E** Its impact on judicial decision-making may be more evident in decisions rendered by the United States Supreme Court than in decisions rendered by other courts.

Question 11 RC

Select one answer choice.

It can be inferred that the author uses "the United States Supreme Court" to illustrate the argument because of a belief that

○**A** the Supreme Court is obligated to render its decisions without regard to its members' ideological predispositions

○**B** the record of the Supreme Court shows it to be roughly similar to other courts in the frequency with which its decisions reflect particular policy preferences

○**C** the extent to which decisions made by the Supreme Court are affected by reasonableness constraints is relatively easy to determine

○**D** the unanimous decisions sometimes handed down by the Supreme Court would be unlikely to come from an ideologically diverse court if motivated reasoning were unchecked

○**E** the members of the Supreme Court provide clear and extended explanations of the reasoning that has informed their decisions

Question 12 RC

(Highlighted portion: "circumstances")

Select one answer choice.

The author suggests which of the following about the "circumstances" mentioned in the passage?

○**A** They allow decision makers to rationalize lapses in their objectivity.

○**B** They tend to undermine the efficacy of reasonableness constraints.

○**C** They may weaken the effect of policy preferences on decisions.

○**D** They are insufficiently distinguished from one another by attitudinalists.

○**E** They can disguise the extent to which a decision has been influenced by motivated reasoning.

Section 2 15 Questions · 23 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

Bone is a physiologically _____ tissue: it can change size and shape to meet the body's needs during the various stages of an animal's life.

- ○**A** rigid
- ○**B** vulnerable
- ○**C** active
- ○**D** permeable
- ○**E** lightweight

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

There has been a noticeable reversal from the time when (i) _____ was accepted as the essential characteristic of genuine science: now the role of (ii) _____ in scientific research is generating a great deal of interest.

Blank (i)	Blank (ii)
disciplinary specialization	speculation
long apprenticeship	emotion
dispassionate inquiry	technology

Question 3 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

Literary salons and coffeehouses (i) _____ the class-based systems of social hierarchies prevalent at the time. Meritocratic appreciation of wit and brilliance, wherever it might issue, replaced (ii) _____ to establish power.

Blank (i)	Blank (ii)
reaffirmed	indifference
broke down	deference
anticipated	affronts

Question 4 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Vaccine denial has all the hallmarks of a belief system that is not (i) _____. The notion that childhood vaccines are driving autism rates has been (ii) _____ by multiple epidemiological studies. Yet the true believers are (iii) _____, critiquing each new study that challenges their views, and rallying to the defense of disgraced researchers whose work was retracted.

Blank (i)	Blank (ii)	Blank (iii)
amenable to refutation	resuscitated	indignant
susceptible to fashion	documented	persistent
open to criticism	upended	phlegmatic

Questions 5 to 6 are based on the following passage.

> Among the scientific anachronisms in the United States Endangered Species Act is the absence of specific reference to interactions among species, which can greatly affect ecological and species diversity. It is now understood that the disappearance of a strongly interactive species can cause profound changes in ecosystem composition and structure. For instance, decimation of great whales by industrial whaling affected other species that, like the whales, consume krill (small, shrimplike crustaceans), and the dynamics of coastal marine ecosystems worldwide have been greatly altered by overfishing of certain species. Decreased numbers and reduced geographic range may render a species functionally extinct in terms of its interactions well before the species itself has completely disappeared. Nevertheless, most conservation laws emphasize short-term, single-species demographic viability in only a few circumscribed areas.

Question 5 RC

Select one answer choice.

It can be inferred that the author of the passage would agree with which of the following statements about the United States Endangered Species Act?

○**A** It has become outdated as a result of critical scientific advances.

○**B** It suffered as a result of a lack of input from scientists.

○**C** It was overly influenced by the interests of industry.

○**D** It should have focused more on short-term, single-species demographic viability.

○**E** Its primary goal is the preservation of strongly interactive species.

Question 6 RC

(Highlighted portion: "Decreased numbers and reduced geographic range may render a species functionally extinct in terms of its interactions well before the specie")

Select one answer choice.

The author alludes to functional extinction primarily in order to imply that

○**A** functional extinction is a more common form of extinction than is the death of a species

○**B** the extinction of a species serves an important ecological function

○**C** population level and geographic range are not the only predictors of species extinction

○**D** in order to maintain species interactions, more is required than that interactive species do not die out

○**E** in order to avoid extinction, species must interact with other species

Questions 7 to 9 are based on the following passage.

The hypothesis that paranormal phenomena are real but lie outside the limits of science is supported by considerable evidence. The society of Psychical Research has collected stories of ordinary people apparently demonstrating paranormal abilities. Entirely anecdotal, this evidence has nothing to do with science, since it cannot be reproduced under controlled conditions. But the society took great trouble to interview first-hand witnesses and to document the stories carefully. One fact that emerges clearly from the stories is that paranormal events occur, if they occur at all, only when people are experiencing strong emotion. This would immediately explain why paranormal phenomena are not observable under the conditions of a well-controlled scientific experiment. Strong emotion is inherently incompatible with controlled scientific procedures.

Question 7 RC

Select one answer choice.

Regarding the evidence collected by the Society for Psychical Research, which of the following can properly be concluded from the passage?

○**A** The society's attempts to confirm paranormal phenomena using controlled scientific methodology have all been frustrated.

○**B** The society collected stories of paranormal phenomena with the intent of demonstrating the limitations of scientific methodology.

○**C** The society has not documented cases of people apparently able to produce paranormal effects dispassionately and under any given conditions.

○**D** Because the society scrupulously examines and documents the stories it reports, few charlatans attempt to convince the society's members with fraudulent phenomena.

○**E** When investigation discredits what was claimed to be a paranormal phenomenon, the society does not publicly document the fact.

Question 8 RC 복수

Consider each of the choices separately and select all that apply.

It can be inferred that the author of the passage would agree with which of the following descriptions of the evidence collected by the Society for Psychical Research?

□**A** Carefully recorded

□**B** Unscientific

□**C** Credible

Question 9 RC

Select one answer choice.

Which of the following best describes the role played in the passage by the highlighted sentence?

○**A** It states the main conclusion of the author's argument.

○**B** It provides a basis for a recommended course of action.

○**C** It articulates a principle that supports the claim made in the preceding sentence.

○**D** It is intended to undermine the credibility of apparent evidence that the author has mentioned earlier in the passage.

○**E** It serves to emphasize a limitation of the evidence collected by the Society for Psychical Research.

Question 10 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

What differentiates this book from more traditional works on grammar is that it reserves its _____ not for students of writing, but for teachers who harbor unduly restrictive views.

☐**A** mockery

☐**B** skepticism

☐**C** scolding

☐**D** approbation

☐**E** admonishment

☐**F** commendation

Question 11 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

When published Native American autobiographies derive from a Native subject's oral narration transcribed and edited by a non-Native collaborator, some consider the term "autobiography" _____ since the final work may largely reflect the editor's choices.

☐**A** misappropriated

☐**B** inauspicious

☐**C** unwarranted

☐**D** inexpedient

☐**E** inapplicable

☐**F** unpropitious

Question 12 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Individuals interested in longevity have sought to fine-tune their bodies with all kinds of _____ diets: only raw foods, only plants, only the flesh, fruit, and nuts that prehistoric humans would have hunted and foraged.

- ☐ **A** eccentric
- ☐ **B** meager
- ☐ **C** salutary
- ☐ **D** proscriptive
- ☐ **E** trendy
- ☐ **F** exacting

Question 13 is based on the following passage.

> Belnovia's government provides health care to all its citizens. Five years ago, with costs incurred from smoking-related health problems accounting for 5 percent of annual government expenditures, Belnovia's health agency initiated a nationwide antismoking campaign. Although the campaign succeeded in reducing the number of smokers in Belnovia substantially, it clearly failed to reduce the annual costs incurred from smoking-related health problems, since these costs currently account for 6 percent of annual government expenditures.

Question 13 CR

Select one answer choice.

Which of the following is an assumption on which the argument depends?

- ○ **A** Costs incurred from smoking-related health problems account for a greater portion of the Belnovian government's overall health expenditures now than they did five years ago.
- ○ **B** The average cost of treatment for smoking-related health problems in Belnovia has not increased significantly over the past five years.
- ○ **C** Overall health expenditures account for a greater portion of the Belnovian government's annual expenditures now than they did five years ago.
- ○ **D** Belnovia's annual government expenditures are not significantly lower now than they were five years ago.
- ○ **E** Smoking-related health problems usually persist long after a person has quit smoking.

Questions 14 to 15 are based on the following passage.

The border decoration in medieval manuscripts referred to as pen flourishing reached great artistic heights in the northern Netherlands in the 1400s. The regional variants in form that evolved make flourishing a useful tool for localizing and roughly dating manuscripts. When the first printed books appeared in that region, many copies were still traditionally decorated by hand with such flourishing. Since books' publication can usually be dated with far more accuracy than manuscripts, studying these decorations in early printed books might lead to a more precise dating of the penwork in manuscripts. It is of less help in localizing the flourishing. Upon completion, copies of printed books were often sold unadorned, to be decorated elsewhere as commissioned by their buyers.

Question 14 RC

Select one answer choice.

Which of the following best describes the function of the highlighted sentence?

- ○**A** It points out a difficulty involved in studying pen flourishing.
- ○**B** It restates an assertion about the first printed books.
- ○**C** It corrects a misconception regarding the decoration of manuscripts.
- ○**D** It provides support for a claim about the dating of printed books.
- ○**E** It summarized an argument about how to interpret certain type of penwork.

Question 15 RC

Select one answer choice.

According to the passage, pen flourishing in manuscripts can provide historians with valuable information about

- ○**A** who commissioned the manuscript
- ○**B** the source from which the manuscript was copied
- ○**C** the value placed on the contents of the manuscript
- ○**D** where the manuscript was produced
- ○**E** the collaborative process used to produce the manuscript
