Section 1 12 Questions · 18 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

The membership of the two clubs being _____, no one had a member's perspective on both.

- ○**A** selective
- ○**B** extensive
- ○**C** mutual
- ○**D** restricted
- ○**E** disjoint

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

Those who knew the senator well were convinced that in spite of his (i) _____ in larger political matters, there was no (ii) _____ in his expressions of feeling for his constituents.

Blank (i)	Blank (ii)
candor	dissemblance
cooperation	compassion
duplicity	fervency

Question 3 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Engineers have become (i) _____ constructing static objects such as buildings and bridges, and the vehicles they design, from aircraft to automobiles, are sleek and impressive. Robots and other imitations of organic life, by contrast, always seem (ii) _____. Even in science fiction fantasies, robots lack the (iii) _____ that is typical of a living creature.

Blank (i)	Blank (ii)	Blank (iii)
weary of	complicated	ability to learn
notorious for	finicky	ease of motion
adept at	clumsy	need for interaction

Questions 4 to 5 are based on the following passage.

For many Irish American women in the nineteenth century, domesticity, in the sense of exclusive devotion to the home, was an unrealistic and unwelcome ideal. After 1850, many Irish immigrant women settled in New England's textile towns and constituted a large percentage of the workforce. They participated in boycotts, strikes, and other forms of economic protest. American-born Irish women embraced occupations like teaching as careers, and these women generally experienced significantly higher occupational mobility than Irish males in the United States. Women's wages were crucial to the economic health of Irish American households and helped support Irish families in the United States and Ireland. For such women, a life removed from the public world of wage labor and capitalist production was hardly a reality.

Question 4 RC

Select one answer choice.

The passage implies which of the following about Irish American women in the nineteenth century?

○**A** At least some would have worked outside the home for wages even if they had not needed to.

○**B** Few desired to become labor activists and organizers in the industrial labor movement.

○**C** Few who were immigrants would have preferred to stay in Ireland, even if they had been able to.

○**D** Many were motivated to return to Ireland after facing difficulties in the United States.

○**E** Many were pleasantly surprised by the working conditions they encountered in New England's textile towns.

Question 5 RC

(Highlighted portion: "Irish families")

Select one answer choice.

The author mentions "Irish families" primarily in order to

○**A** challenge a stereotype concerning the economic role played by Irish American women

○**B** emphasize the importance of Irish American women's paid labor

○**C** suggest the difficulty of economic conditions in Ireland during the nineteenth century

○**D** contrast the career paths open to American-born Irish women with those open to Irish-born immigrants

○**E** indicate the closeness of nineteenth-century ties between Ireland and the United States

Question 6 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

When Kim Dae Jung was decisively elected South Korea's president in December 1997, he was considered something of _____ but nevertheless the right man for the time and the job.

☐**A** an unknown

☐**B** an expert

☐**C** a maverick

☐**D** a nonconformist

☐**E** a dilettante

☐**F** an authority

Question 7 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Curry did not necessarily agree with the criticisms about her research paper, but rather than _____ them, as many scientists might have done, she began to engage with the critics.

- ☐ **A** dismissing
- ☐ **B** refuting
- ☐ **C** acknowledging
- ☐ **D** recognizing
- ☐ **E** ignoring
- ☐ **F** attacking

Question 8 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

In contrast to today, when many readers consider the moral sentiments expressed in the ancient writer's work to be quite sophomoric, in the writer's own time, these sentiments were regarded as remarkably _____.

- ☐ **A** abstruse
- ☐ **B** misguided
- ☐ **C** insightful
- ☐ **D** ill-conceived
- ☐ **E** sagacious
- ☐ **F** sanguine

Question 9 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

He was one of the most powerful chess players ever and one of the most _____: at the height of his fame he all but dropped out of chess, entering into a self-imposed exile.

- ☐ **A** perplexing
- ☐ **B** creative
- ☐ **C** troubled
- ☐ **D** infuriating
- ☐ **E** enigmatic
- ☐ **F** imaginative

Questions 10 to 12 are based on the following passage.

Some archaeologists speculate that the Americas might have been initially colonized between 40,000 and 25,000 years ago. However, to support this theory it is necessary to explain the absence of generally accepted habitation sites for that time interval in what is now the United States. Australia, which has a smaller land area than the United States, has many such sites, supporting the generally accepted claim that the continent was colonized by humans at least 40,000 years ago. Australia is less densely populated (resulting in lower chances of discovering sites) and with its overall greater aridity would have presented conditions less favorable for hunter-gatherer occupation. Proportionally, at least as much land area has been lost from the coastal regions of Australia because of postglacial sea-level rise as in the United States, so any coastal archaeological record in Australia should have been depleted about as much as a coastal record in the United States. Since there are so many resource-rich rivers leading inland from the United States coastlines, it seems implausible that a growing population of humans would have confined itself to coasts for thousands of years. If inhabitants were present 25,000 years ago, the chances of their appearing in the archaeological record would seem to be greater than for Australia.

Question 10 RC

Select one answer choice.

The passage is primarily concerned with doing which of the following?

○**A** Presenting an objection to a claim

○**B** Accounting for an apparent anomaly

○**C** Outlining an alternative interpretation

○**D** Correcting a particular misconception

○**E** Questioning the validity of a comparison

Question 11 RC

Select one answer choice.

The author of the passage implies which of the following about 25,000 years ago?

○**A** The coastline of the region that is now the United States is longer than it was 40,000 years ago.

○**B** Rivers in what is now the United States were numerous than they are now.

○**C** Australia was less densely populated at that time than was the region that is now the United States.

○**D** Australia's climate was significantly drier than it is now.

○**E** Global sea level was lower than it is now.

Question 12 RC

Select one answer choice.

The author of the passage implies that, in what is now the United States, archaeological evidence of inhabitation in the period from 40,000 to 25,000 years ago is lacking because that region

○**A** had its oldest habitation sites inundated following a postglacial rise in sea level

○**B** has many resource-rich rivers that facilitated the dispersal of early inhabitants from an initial concentration in coastal areas

○**C** was sparsely populated until about 25,000 years ago

○**D** was colonized less than 25,000 years ago

○**E** was inhabited only by hunter-gatherers until 25,000 years ago

Section 2 15 Questions · 23 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

Pearl millet possesses the unique genetic predisposition to withstand environmental stress and produce appreciable yield, cultivation on _____ soils notwithstanding.

- ○**A** arable
- ○**B** fertilized
- ○**C** marginal
- ○**D** native
- ○**E** choice

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

I did not begin work on my biography of Mary Somerville as Somerville's (i) _____. When I first began studying her, I saw Somerville and the esteem in which her contemporaries held her as (ii) _____. Over time, however, I have come to understand what she accomplished and why it was justly valued.

Blank (i)	Blank (ii)
counterpart	a boon
adversary	a puzzle
advocate	an inspiration

Question 3 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

Because the currents that flow back and forth between the Galapagos Islands and the Ecuadoran mainland create connections, the evolutionary (i) _____ of the sea creatures in the two areas, compared with that of the land dwellers, has been (ii) _____.

Blank (i)	Blank (ii)
association	disguised
sophistication	derailed
separateness	diminished

Question 4 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

When we forgive a person, we (i) _____ our (ii) _____ his or her transgression but (iii) _____ certain punitive responses that we would ordinarily be justified in taking on the basis of that person's objectionable conduct.

Blank (i)	Blank (ii)	Blank (iii)
relinquish	leniency toward	disguise
regret	uncertainty about	forgo
retain	condemnation of	initiate

Questions 5 to 6 are based on the following passage.

> For good reasons, economists prefer to study people's revealed preferences; that is, to look at individuals' actual choices and decisions rather than their (sometimes deceptive) stated intentions or their subjective reports of likes and dislikes. Yet people's choices often bear a mixed relationship to their own happiness. Studies from behavioral economics and psychology find that people depart from the standard model of the rational economic agent in various ways; they make inconsistent choices, fail to learn from experiences, and base their own satisfaction on how their situation compares with that of others. If people display bounded rationality when it comes to maximizing utility, then their choices do not necessarily reflect their "true" preferences, and an exclusive reliance on choices to infer what people desire loses some appeal.

Question 5 RC

(Highlighted portion: "make inconsistent choices")

Select one answer choice.

Why does the author note that people "make inconsistent choices"?

- ○**A** To account for why people's stated intentions and their actual behavior often do not coincide
- ○**B** To explain why most economists no longer adhere to standard model of the rational economic agent
- ○**C** To identify a prevailing theory among economists about people's behavior
- ○**D** To cast doubt on a particular assumption about people's revealed preferences
- ○**E** To suggest that economists should draw more heavily from behavioral economics and psychology

Question 6 RC

(Highlighted portion: "mixed")

Select one answer choice.

In the context in which it appears, "mixed" most nearly means

- ○**A** ambiguous
- ○**B** combined
- ○**C** associated
- ○**D** convoluted
- ○**E** adulterated

Questions 7 to 9 are based on the following passage.

Only in the collecting sciences are raw data—specimens, fossils, artifacts—regarded as communal property, to which legitimate practitioners have rights of access. Collections are an intellectual commons on which all producers depend, and the owners or keepers of collections are understood to be responsible for keeping them in good order and accessible to users. These moral precepts doubtless reflect the fact that important collections tend to end up in public museums. But I think they also derive from the reality that found objects, unlike manufactured data, are a unique and irreplaceable resource, the loss of which deprives all practitioners of the means of best practice.

The moral economy of facts is quite different in sciences that generate facts artificially through measurement or experimentation. In these sciences, raw data are regarded as private: because, I think, they are in principle unlimited and if lost, can be produced again. Manufactured data become public only when published, and though publishing is expected, it is also understood to be selective and a personal matter, impelled more by ambition and career imperatives than by moral obligation. Individuals may perish professionally if they neglect to publish, but if they do perish, someone else can always produce equivalent data, so there is no loss to the common good. Raw data are not an intellectual commons, as are collections. The experimental sciences operate more in a market economy than a moral one.

Question 7 RC

Select one answer choice.

The passage is primarily concerned with

○**A** resolving a dispute

○**B** defending a practice

○**C** summarizing a dilemma

○**D** delineating a difference

○**E** explaining an anomaly

Question 8 RC

Select one answer choice.

The author of the passage would most likely agree with which of the following statements about manufactured data?

○**A** They are essential to the common good.

○**B** They cannot be easily replicated.

○**C** They can play a key role in career advancement.

○**D** They cannot be adequately interpreted until they have been published.

○**E** They are often manipulated to support specific hypotheses.

Question 9 RC

Select one answer choice.

In the context of the passage as a whole, the highlighted sentence serves to

○**A** warn of the consequences of overlooking a point made in the first sentence of the passage

○**B** cite an exception to a principle described in the preceding sentence

○**C** present a conditional scenario that is confirmed in the subsequent sentence

○**D** provide a rationale for an assertion made in the final sentence of the passage

○**E** predict an outcome that is refuted in the final sentence of the passage

Question 10 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

At the core of science fiction is the notion of _____, of asking, "If this phenomenon continues, where will it lead?"

☐**A** generalization

☐**B** extrapolation

☐**C** projection

☐**D** compensation

☐**E** reparation

☐**F** theorization

Question 11 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

This novel is not great literature; there are too many characters, too many subplots, and no clearly defined protagonist, making for _____ story.

☐**A** a banal

☐**B** a diffuse

☐**C** a mawkish

☐**D** an innocuous

☐**E** an amorphous

☐**F** a hackneyed

Question 12 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Coral reefs are often referred to as the rain forests of the sea, _____ comparison, given that only tropical rain forests can compete with the sheer concentration of biodiversity found in coral reefs.

☐**A** a factitious

☐**B** an imaginative

☐**C** a fitting

☐**D** an artificial

☐**E** an apposite

☐**F** a common

Question 13 is based on the following passage.

> In the 1950's sixty percent of treated cancer patients lived at least five years after detection of the disease. Now, sixty percent live at least seven years after detection. This fact demonstrates that, because of improved methods of treatment, cancer patients now live longer after they contract the disease than cancer patients did in the 1950's.

Question 13 CR

Select one answer choice.

The conclusion of the argument above depends on which of the following assumptions?

○**A** In the 1950's only sixty percent of cancer patients received treatment, whereas now a substantially higher percentage does.

○**B** Free medical treatment is more likely to be available now to people who have no health insurance than it was in the 1950's.

○**C** Detection of cancer does not now take place, on average, significantly earlier in the progression of the disease than it did in the 1950's.

○**D** Physicians now usually predict a longer life for cancer patients after detection of the disease than did physicians in the 1950's.

○**E** The number of cancer patients now is approximately the same as it was in the 1950's.

Questions 14 to 15 are based on the following passage.

> Harrison has argued that nineteenth-century French government administrators generally ignored the activities of women's associations, and most historians agree that female groups appear to have garnered little notice from authorities. While Grange suggests that this may be because so few female associations existed throughout much of the nineteenth century, Duprat has uncovered numerous female societies, especially sociétés de bienfaisance (charitable societies), many of which received more generous treatment from municipal and national officials than their male counterparts. However, she suggests that their official "silence"—the absence of general assemblies and of frequent publications, as well as their careful cultivation of the traditional, nonthreatening image of dames de charité (charitable women)—kept these associations largely out of public view.

Question 14 RC

Select one answer choice.

Duprat would most likely agree that certain nineteenth-century French female societies

○**A** sometimes took unfair advantage of their charitable status

○**B** hoped to change public perceptions of the activities of dames decharite

○**C** strategically misled government officials about their activities

○**D** were not consistent in representing their members' values

○**E** conducted themselves in a way that contributed to their neglect by government officials

Question 15 RC 복수

Consider each of the choices separately and select all that apply.

As represented in the passage, the views of which of the following scholars are consistent with one another with regard to the official notice received by women's associations?

- ☐ **A** Harrison and most historians
- ☐ **B** Harrison and Grange
- ☐ **C** Grange and most historians
