Section 1 12 Questions · 18 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

The regulatory agency's attempts to impose new and harsher restrictions on the business community were met with such _____ that the agency finally opted to maintain its existing rules.

- ○**A** impunity
- ○**B** probity
- ○**C** recalcitrance
- ○**D** indemnity
- ○**E** approbation

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

Ancient cart ruts found on Malta were created in soft limestone that begins to dissolve when exposed to rainfall. Their forms thus necessarily become (i) _____ over time and their original features are (ii) _____.

Blank (i)	Blank (ii)
solidified	refined
degraded	replicated
conspicuous	obscured

Question 3 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

There are two opposing theories about mountain formation and climate over the past 40 million years: either the surge of mountain building (i) _____ the global cooling, or vice versa. The first of these two theories asserts that widespread mountain building cooled the earth as a result of the (ii) _____ mountains and climate. For example, mountain glaciers tend to be (iii) _____: once established, they increase the reflectivity of the surface, thus lowering temperatures and allowing more ice to form.

Blank (i)	Blank (ii)	Blank (iii)
superseded	disparity between	unpredictable
halted	feedback between	static
caused	complexity of	self-perpetuating

Questions 4 to 5 are based on the following passage.

Most seismologists assume that following a major earthquake and its aftershocks, the fault (a break in Earth's crust where pressure can trigger an earthquake) will remain quiet until stresses have time to rebuild, typically over hundreds or thousands of years. Recent evidence of subtle interactions between earthquakes may overturn this assumption, however. According to the stress-triggering hypothesis, faults are unexpectedly responsive to subtle stresses they acquire as neighboring faults shift. Rather than simply dissipating, stress relieved during an earthquake travels along the fault, concentrating in sites nearby; even the smallest additional stresses may then trigger another quake along the fault or on a nearby fault. Although scientists have long viewed such subtle interactions as nonexistent, the hypothesis has explained the location and frequency of earthquakes following several destructive quakes in California, Japan, and Turkey.

Question 4 RC

Select one answer choice.

According to the passage, which of the following is an assumption that may be invalidated by recent seismological evidence?

- ○**A** Earthquakes are caused by stresses building up in faults within Earth's crust.
- ○**B** Most major earthquakes can be predicted with reasonable accuracy.
- ○**C** Faults are highly responsive to even minor stresses in neighboring faults.
- ○**D** Most major earthquakes are followed by predictable aftershocks.
- ○**E** A fault that has resulted in a major earthquake becomes quiet for a long period.

Question 5 RC 복수

Consider each of the choices separately and select all that apply.

The passage suggests that most seismologists believe which of the following about fault stresses?

- ☐**A** They are dissipated when they result in an earthquake.
- ☐**B** They are transferred between neighboring faults.
- ☐**C** They will not cause a major earthquake along the same fault in the space of a few years.

Question 6 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

In the Old Southwest, only writers who showed exceptional _____ were likely to become widely known, because the region's weak infrastructure inhibited the development of publishing beyond local newspapers that served small towns.

- ☐**A** prescience
- ☐**B** foresightedness
- ☐**C** optimism
- ☐**D** resolve
- ☐**E** patience
- ☐**F** determination

Question 7 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Ancient cave painters explored every surface, and although they bypassed certain walls that to us seem just as suitable for decoration as ones they chose, the placement of the art apparently wasn't _____.

- ☐ **A** inconsequential
- ☐ **B** capricious
- ☐ **C** strenuous
- ☐ **D** undisclosed
- ☐ **E** arduous
- ☐ **F** impulsive

Question 8 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The use of temperature records for the period from 1880 to 1899 as the favored baseline for measuring global warming is _____ because the 1880s were particularly cold after the eruption of the Krakatoa volcano.

- ☐ **A** injudicious
- ☐ **B** unnecessary
- ☐ **C** ill-advised
- ☐ **D** controversial
- ☐ **E** commonplace
- ☐ **F** widespread

Question 9 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Although ants and humans have _____ lifestyles, they fight their foes for many of the same economic reasons, including access to dwelling spaces, to territory, and to food.

- ☐ **A** complex
- ☐ **B** divergent
- ☐ **C** atypical
- ☐ **D** conflicting
- ☐ **E** disparate
- ☐ **F** complicated

Questions 10 to 12 are based on the following passage.

Nineteenth-century historian Jacob Burckhardt's remarkable assertion that "women stood on a footing of perfect equality with men" in sixteenth-century Italy resulted from his close identification with the early humanists, a small, elite group in Renaissance Italy. Ironically, as Margaret King has shown, humanist texts actually reflect inequalities between men and women. One example is the programs of study recommended for girls. A pedagogic imperative like Leonardo Bruni's—that women should study the liberal arts as men did, with the exception of rhetoric, which "lies wholly outside the province of women"—went unnoticed by Burckhardt because he shared the humanist assumption that women's province was the private sphere rather than the public sphere. The relegation of women to a "private" sphere was a complex historical phenomenon that should be analyzed in light of other social and economic changes occurring during the Renaissance. Historians desirous of understanding women's experience cannot view the period, as Burckhardt did, through the lens provided by the humanists.

Question 10 RC

Select one answer choice.

It can be inferred from the passage that Leonardo Bruni most likely believed which of the following?

○**A** The private sphere was superior to the public sphere.

○**B** Formal education was unnecessary for women in Renaissance Italy.

○**C** Rhetoric was useful primarily in the public sphere rather than in the private sphere.

○**D** Women in Renaissance Italy had less desire to study rhetoric than did men.

○**E** Most liberal arts were of little utility in the public sphere.

Question 11 RC

Select one answer choice.

Which of the following is a crticism the author of the passage makes of Burckhardt's work?

○**A** Burckhardt's discussion of women's roles overemphasizes certain social and economic factors at the expense of other factors.

○**B** Burckhardt failed to conduct a detailed study of all of the works of Bruni.

○**C** Burckhardt was overly influenced by nineteenth-century assumptions about women's roles.

○**D** Burckhardt relied heavily on sixteenth-century Italian pedagogic works; thus, his work was narrowly focused.

○**E** Burckhardt overlooked important evidence because he shared an assumpton contained in that evidence.

Question 12 RC

Select one answer choice.

Which of the following, if true, would cast the most serious doubt on the position taken by the author of the passage regarding Burckhardt's evaluation of historical evidence?

○**A** Burckhardt's scholarly works focus almost exclusively on sixteenth-century European humanists.

○**B** Burckhardt had read Bruni's pedagogic works and had admired them.

○**C** Margaret King's work has received considerable scholarly acclaim.

○**D** Many of Bruni's colleagues felt that women should be excluded from instruction in all of the liberal arts.

○**E** Margaret King's evidence is based largely on Bruni's work, which was not representative of humanist texts.

Section 2 15 Questions · 23 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

The character whose fate dominates the film's plot appears only briefly onscreen, a bit of narrative slyness that we might welcome as _____ the sensory overload more characteristic of this director.

- ○**A** a consequence of
- ○**B** an intensification of
- ○**C** an incorporation of
- ○**D** an allusion to
- ○**E** a palliative to

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

The committee (i) _____ their praise for the proposal with several (ii) _____ remarks pointing out flaws in the document; in fact, one committee member referred to a trivial typographical error as "unpardonable."

Blank (i)	Blank (ii)
underscored	captious
tempered	adroit
augmented	propitious

Question 3 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

The enlightenment philosophers of the eighteenth century acknowledged that unrestricted freedom to publish could (i) _____ motivated by envy or hatred, but they hoped that any such (ii) _____ enabled by expanded liberties would suffer from being publicly exposed.

Blank (i)	Blank (ii)
encourage blandishments	evasion
facilitate calumny	defamation
constrain vituperation	prurience

Question 4 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Although Dostoyevsky was not the (i) _____ portrayed by some biographers, at least implicitly guilty of the terrible crimes he depicted in his novels, he was notoriously (ii) _____. Indeed, his attitude toward people who questioned him about his work was anything but friendly. No such problems bother students of Chekhov. On the contrary, it is difficult to think of a writer of equal fame and importance who, on close inspection, proves to be such a (iii) _____ human being.

Blank (i)	Blank (ii)	Blank (iii)
monster	vain	sympathetic
malcontent	diffident	self-assured
pedant	prickly	talented

Questions 5 to 6 are based on the following passage.

While captive orangutans learn to use tools, wild orangutans have not been observed doing so until recently when researchers witnessed orangutans near Suaq Balimbing in Sumatra using tools to extract insects from tree holes and seeds from the Neesia fruit. What explains this population's tool use? It is doubtful that the Suaq orangutans are intrinsically smarter: captive orangutans have demonstrated that the species has the brain capacity to use tools. Another explanation is environmental. While previously studied orangutans mostly inhabited dry forests, the Suaq orangutans inhabit a lush swamp where insects flourish in tree holes and Neesia fruit is abundant. However, orangutans in other habitats where Neesia grows do harvest the seeds, but without tools they obtain fewer than do the Suaq orangutans.

Question 5 RC

(Highlighted portion: "orangutans in other habitats where Neesia grows")

Select one answer choice.

The passage mentions "orangutans in other habitats where Neesia grows" primarily in order to

○**A** explain why orangutans living in dry forests apparently do not use tools to obtain foods

○**B** propose an alternative to the environmental explanation for Suaq orangutans' tool use

○**C** demonstrate how environment may influence orangutan populations' brain capacity

○**D** contrast the food preferences of the Suaq orangutans with those of orangutans living in other habitats

○**E** suggest that the Suaq orangutans' tool use cannot be explained merely by the availability of certain foods in their habitat

Question 6 RC 복수

Consider each of the choices separately and select all that apply.

The passage suggests which of the following about orangutans that live mostly in dry forests?

☐**A** They probably use some tools, though this tool use has not been observed by researchers.

☐**B** They dislike the foods that the orangutans living near Suaq Balimbing prefer.

☐**C** They probably have the same capacity for tool use as have orangutans living near Suaq Balimbing.

Questions 7 to 9 are based on the following passage.

Buell's study of village sketches (a type of fiction popular in the United States in the 1830s and 1840s) provides a valuable summary of sketches that portray the community as homogeneous and fixed, but it ignores those by women writers, which typically depicted the diversity that increasingly characterized actual village communities at that time. These women's geographical mobility was restricted (although women writers of the time were not uniformly circumscribed in this way), and their subject matter reflected this fact. Yet their texts were enriched by what Gilligan, writing in a different context, has called the ability to attend to voices other than one's own. To varying degrees, the women's sketches portray differences among community members: all stress differences among men and among women (particularly the latter) as well as differences between the sexes, and some also depict cultural diversity. These writers represent community as dynamic, as something that must be negotiated and renegotiated because of its members' divergent histories, positions, expectations, and beliefs.

Question 7 RC 복수

Consider each of the choices separately and select all that apply.

According to the passage, village sketches written by women in the United States in the 1830s and 1840s typically reflected

- ☐ **A** the negotiations that characterized trade relationships between villages
- ☐ **B** the fact that these women did not often travel very far beyond their own village
- ☐ **C** the plurality of experiences and ideas that existed among the residents of a village

Question 8 RC 문장선택

Select the sentence in the passage that answers the question.

Select the sentence in the passage that contrasts how men and women depicted life in village communities.

Question 9 RC

(Highlighted portion: "the ability to attend to voices other than one's own")

Select one answer choice.

The passage indicates that when Gilligan spoke of "the ability to attend to voices other than one's own," she

- ○ **A** did not consider that ability to be a desirable psychological characteristic
- ○ **B** did not believe that individuals differ greatly with respect to that ability
- ○ **C** was implying that that ability enhances a sense of belonging in communities
- ○ **D** was assuming that good writers are able to depict diverse characters
- ○ **E** was not discussing the women who wrote village sketches

Question 10 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

In her early years as a theater critic, Willa Cather was _____, veering between ecstatic raves and brutal takedowns.

- ☐ **A** bellicose
- ☐ **B** enigmatic
- ☐ **C** mercurial
- ☐ **D** pugnacious
- ☐ **E** volatile
- ☐ **F** voluble

Question 11 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The laboratory maze has grown ever less _____ since it was invented; instead of hoping to lose a rodent in a labyrinth, today's scientists design mazes to elicit a few simple, easily measurable behaviors.

- ☐ **A** intricate
- ☐ **B** extensive
- ☐ **C** effective
- ☐ **D** convoluted
- ☐ **E** useful
- ☐ **F** prevalent

Question 12 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

My colleagues _____ the journalist's vaunted expertise at securing high-profile interviews, declaring that, given her family's connections to celebrities, obtaining such interviews must be no more difficult than asking a friend out for coffee.

- ☐ **A** confounded
- ☐ **B** disparaged
- ☐ **C** dismissed
- ☐ **D** envied
- ☐ **E** thwarted
- ☐ **F** sanctioned

Question 13 is based on the following passage.

The pepper Capsicum chinense grows as a native wild plant only in South America. Birds swallow the pepper's fruit whole, thereby providing the plant with its means of distributing seeds. Domesticated varieties of C.chinense grow in the Caribbean islands as well as in South America. Although it is unknown just when C.chinense was introduced into the islands, the introduction of the species was probably the result of human activity, because _____.

Question 13 CR

Select one answer choice.

Which of the following most logically completes the argument?

○**A** The fruits of the domesticated varieties are too large for birds to swallow.

○**B** C.chinense grows in the Caribbean islands under climatic conditions very similar to those under which the wild variety grows.

○**C** The peppers are an important part of the Caribbean islands' characteristic cooking.

○**D** Most of the plant species in the Caribbean islands originated is South America.

○**E** Many of the species of birds that are found in the Caribbean islands spend only the winter there.

Questions 14 to 15 are based on the following passage.

What makes alien species so successful in their new habitats? They all share certain basic biological characteristics—opportunism, explosive population growth, mobility, and voraciousness—but these merely describe, rather than explain, their power. Classically, biologists have ascribed to invaders a robustness tempered by long stretches of competition with enemies. They are not necessarily dominant in their original habitats. When they find new territory, they escape competitors and predators and exploit their full evolutionary potential. Biologists have used similar arguments to explain the dramatic invasions of whole faunas and floras over the past million years. For example, marauding mammals from North America tempered by competition from other migrating mammals were suddenly unleashed on the south after the rise of the Isthmus of Panama.

Question 14 RC

(Highlighted portion: "certain basic biological characteristics")

Select one answer choice.

The author implies which of the following about "certain basic biological characteristics"?

○**A** They are less applicable to invasive species than many scientists think.

○**B** They suggest that invasive species are more destructive than they really are.

○**C** They are just as prevalent among noninvasive species as among invasive species.

○**D** They can help distinguish invasive from noninvasive species.

○**E** They may help explain why invasive species are successful in some habitats but not in others.

Question 15 RC

(Highlighted portion: "not necessarily dominant in their original habitats")

Select one answer choice.

The author notes that invaders are "not necessarily dominant in their original habitats" primarily to

- ○**A** demonstrate the limitations of a theory
- ○**B** highlight an alternative point of view
- ○**C** elaborate on the central point of an argument
- ○**D** explain the outcome of a process
- ○**E** question the validity of a hypothesis
