Section 1 12 Questions · 18 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

Although Emily Bronte is impassioned about gender equality, she is anything but _____ to endorse more privileges endowed to women.

- ○**A** zealous
- ○**B** apathetic
- ○**C** abhorrent
- ○**D** stubborn
- ○**E** lethargic

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

Biologist Catherine Graham, studying toucans in Mexico, predicted that because toucans prefer relatively large forest patches and feed on fruit, they would fly more often to (i) _____ patches and to patches with abundant fruit resources than to small patches or those that had (ii) _____ fruit resources.

Blank (i)	Blank (ii)
sizable	dislocated
nearby	unusual
dense	scant

Question 3 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Although the (i) _____ and the not infrequent appearance of terms like synaptogenesis and N-methyl-D-aspartate glutamate receptor can be (ii) _____ in a book aimed at the general reader, Konner's overall style is (iii) _____ enough that you feel as though you are in the company of a helpful and hopeful teacher who is eager to share what he's found.

Blank (i)	Blank (ii)	Blank (iii)
occasional glimpses of humor	placating	disputatious
deft deployment of examples	galvanizing	conversational
repeated use of jargon	daunting	baroque

Questions 4 to 5 are based on the following passage.

The finding that there were rock-melting temperatures on asteroids for sustained periods is puzzling: asteroids' heat source is unknown, and unlike planet-sized bodies, such small bodies quickly dissipate heat. Rubin suggests that asteroids' heat could have derived from collisions between asteroids. Skeptics have argued that a single impact would raise an asteroid's overall temperature very little and that asteroids would cool too quickly between impacts to accumulate much heat. However, these objections assumed that asteroids are dense, solid bodies. A recent discovery that asteroids are highly porous makes Rubin's hypothesis more plausible. When solid bodies collide, much debris is ejected, dissipating energy. Impacts on porous bodies generate less debris, so more energy goes into producing heat. Heat could be retained as debris fall back into impact craters, creating an insulating blanket.

Question 4 RC

Select one answer choice.

The passage suggests that one factor that has made it difficult to account for the temperatures once reached by asteroids is

○**A** a miscalculation of the frequency of asteroid collisions

○**B** a misconception about asteroids' density

○**C** a mistaken assumption about what the heat source of the asteroids was

○**D** an underestimation of the rate at which small bodies lose heat

○**E** an erroneous view of how asteroids were formed

Question 5 RC 복수

Consider each of the choices separately and select all that apply.

It can be inferred from the passage that Rubin disagrees with skeptics mentioned in the passage about which of the following?

☐**A** Whether porous bodies generate less debris when struck than do solid bodies

☐**B** The temperatures asteroids would have to reach for their rocks to have melted

☐**C** The likely effect of impacts on asteroids' temperatures

Question 6 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Astute and incisive, the essayist's work was nevertheless civil and polite: the essayist either had no gift of _____ or else never felt any.

☐**A** vitriol

☐**B** clairvoyance

☐**C** theatricality

☐**D** prescience

☐**E** mimicry

☐**F** obloquy

Question 7 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Those familiar with the insular conditions that once prevailed in Russia may be surprised by the _____ of eighteenth-century Russian composer Natalia Kurakina, who translated novels from French into Italian and composed songs in both languages.

- ☐ **A** versatility
- ☐ **B** worldliness
- ☐ **C** dedication
- ☐ **D** ingenuity
- ☐ **E** cosmopolitanism
- ☐ **F** industriousness

Question 8 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Despite the rather _____ conditions required for its preservation, the evidence for glaciation during the late Proterozoic is found on every continent, suggesting that ice sheets were present throughout the globe.

- ☐ **A** unusual
- ☐ **B** hostile
- ☐ **C** drastic
- ☐ **D** stringent
- ☐ **E** exacting
- ☐ **F** complex

Question 9 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The rate of sediment deposition may be _____ desertification in Central Asia: data from a Tajik site show the rate to have increased during Pleistocene glacial periods as aridity increased.

- ☐ **A** a restraint on
- ☐ **B** a gauge of
- ☐ **C** an indicator of
- ☐ **D** a factor in
- ☐ **E** a hedge against
- ☐ **F** a consequence of

Questions 10 to 12 are based on the following passage.

Projecting the idea of a distinctive female demand in seventeenth and eighteenth-century England was a groundbreaking departure in the history of marketing. The pioneers were the booksellers and printers who addressed specialist titles to the ladies in the 1600s, while the post-1688 print boom saw the publication of custom-designed ladies' pocket diaries, a proliferation of female manuals of all kinds, 《The Female Spectator》 in the 1740s and the long-running 《The Lady's Magazine》 from 1770. The leap to objects was made when leading furniture makers started classifying furniture by the sex, age, and specialist needs of the implied user in the new illustrated catalogs of the 1760s. Of course, sex distinctions in clothes are as old as civilization, while the idea of furniture suited to female needs is not unprecedented (think of birthing stools), but making difference systematic and concrete by means of word, image, and object was a decisive innovation. The rapid diffusion of ladies' and gentlemen's furniture suggests that gender distinctions already resonated powerfully with male and female consumers, but in the extension of the range of differentiated furniture, the projection of the trope by manufacturers thereafter, and its acceptance by consumers, conventional ideas of masculine importance and femininity delicacy were amplified and fixed. In the process, femininity was expressed in a specific and narrowly defined aesthetic register.

Question 10 RC

Select one answer choice.

The author of the passage would most likely agree with which of the following statements regarding the effect of marketing gender-differentiated furniture?

○**A** It introduced new ideas of femininity and masculinity to consumers.

○**B** It was more successful than was the marketing of age-differentiated furniture.

○**C** It undermined conventional ideas of masculine importance.

○**D** It contributed to an increase in custom-designed furniture.

○**E** It promulgated a limited definition of femininity.

Question 11 RC

Select one answer choice.

According to the passage, which of the following is true about furniture prior to the 1760s?

○**A** Some furniture made specifically for women already existed.

○**B** Most furniture design was already influenced by women's preferences.

○**C** Custom-designed furniture was small.

○**D** The range of available furniture was small.

○**E** Advertising had rarely been used to generate consumer demand for furniture.

Question 12 RC

Select one answer choice.

Which of the following statements best describes the function of the highlighted sentence in the context of the passage as a whole?

○**A** It mitigates a claim that was presented in the first sentence of the passage.

○**B** It interprets an example that was introduced in the first sentence of the passage.

○**C** It provides historical context for the phenomenon that is analyzed in the remainder of the passage.

○**D** It introduces a distinction between two historical approaches that the remainder of the passage elaborates on.

○**E** It gives an overview of a historical development that the rest of the passage explores in more detail.

Section 2 15 Questions · 23 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

The depletion of soil and trees in southern West Virginia has resulted in frequent flash floods, since when the mountain slopes are _____, storms cause torrents of water to pour down them unimpeded.

- ○**A** riven
- ○**B** fecund
- ○**C** denuded
- ○**D** withered
- ○**E** mutable

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

Historians have been (i)_____ African American fraternal organizations, in part due to the (ii)_____ historical evidence: the relevant records are scarce and difficult to obtain.

Blank (i)	Blank (ii)
hindered in studying	discrepancies in
confident in assessing	insufficiency of
eager to categorize	approach to

Question 3 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

The (i) _____ current-generation solar cells are (ii) _____: although experimental cells have reached efficiencies greater than 40 percent, most commercially available cells in the early part of the twenty-first century still struggle to get past about 20 percent.

Blank (i)	Blank (ii)
attractions of	clear
limitations of	unmatched
improvements in	misunderstood

Question 4 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Filler claims that after the social welfare programs of the 1960s, belief that the government has an obligation to provide decent housing for citizens who cannot afford it was (i) _____ in the United States by the notion that providing suitable shelter for everyone should be (ii) _____. Thus, today in the (iii) _____ of taxpayer-sponsored initiatives, we have volunteer home-construction programs, honorable in intent but pitifully limited in scope.

Blank (i)	Blank (ii)	Blank (iii)
supplanted	a shared civic responsibility	absence
promulgated	an act of private charity	name
corroborated	a profit-oriented enterprise	mold

Questions 5 to 6 are based on the following passage.

> Whereas Carlos Bulosan aimed through fiction and personal testimony to advance both Filipino civil rights in the United States and the social transformation of the Philippines, Yen Le Espiritu has set herself the task of recovering life histories of Filipino Americans. Her work brings Filipino Americans of the generation following the 1934-1965 immigration hiatus graphically to life. A special strength is the representation of Filipino American women, who were scarce among immigrants before the 1934 American curb on Filipino immigration but composed more than half of the immigrants to America since liberalization in 1965. Espiritu's subjects document their changing sense of Filipino identity in the United States, much as Bulosan did as a member of the first substantial wave of immigrants.

Question 5 RC

Select one answer choice.

Which of the following can be inferred from the passage regarding the period in which Bulosan immigrated to the United States?

○**A** Legal restrictions on Filipinos who wished to immigrate to the United States were tighter then than they have been since 1965.

○**B** Filipinos generally had different reasons for immigrating to the United States then than they have had since 1965.

○**C** Relatively few of the Filipinos who immigrated to the United States then were women.

○**D** No one was then working to factually document the lives of Filipino immigrants in the United States.

○**E** During that period, the movement to advance civil rights for Filipino Americans attempted to ease legal restrictions on immigration.

Question 6 RC 복수

Consider each of the choices separately and select all that apply.

Regarding Espiritu's work, the passage implies which of the following?

☐**A** Her work attempts to give expression to the experiences of a number of Filipino Americans.

☐**B** Her work documents how some people's lives were affected by the 1965 liberalization of immigration.

☐**C** Her work represents the experiences of Filipino women in the United States more than does Bulosan's.

Questions 7 to 9 are based on the following passage.

The manuscripts of the eight extant Latin tragedies identify the plays as the Marci Lucii Annei Senecae Tradoediae. Since nobody of that name is known, modern scholars believe the dramas to be the work of Lucius Annaeus Seneca the Younger, the well-known philosopher, orator, and politician. Clearly, the tragedies were written during Seneca's lifetime: internal refrences to earlier poets, most notably Ovid, indicate that the dramas cannot have been composed prior to the second decade C.E., and the plays must have been written by 96 C.E., when Quintilian quotes Medea, one of the tragedies.

It is remarkable, however, that Seneca himself never mentions the plays, since there are certainly passages in them that could be used to illustrate points of his philosophy. There are at least two possible explanations. In the early Roman Empire, playwrights were sometimes exiled or executed for lines construed as directed against the emperor; thus, Seneca's silence may be simple prudence. But if anyone could safely attach his name to dramas, surely it would be Seneca, the emperor's tutor. And although Herrmann offers Seneca's modesty as an explanation, Seneca is not averse to referring to his other writings. The evidence for equating Seneca with the author of the tragedies seems circumstantial.

Question 7 RC

(Highlighted portion: "Medea")

Select one answer choice.

The author mentions "Medea" primarily in order to

○**A** give an example of a play in which references to certain authors can be used to determine when the Marci Lucii Annei Senecae Tragoediae were composed

○**B** acknowledge the possibility that the Marci Lucii Annei Senecae Tragoediae may have been written by Quintilian rather than Seneca

○**C** suggest that certain of the Marci Lucii Annei Senecae Tragoediae may have been written near the end of Seneca's lifetime

○**D** argue that Marci may have been one of the last of the eight plays in the Marci Lucii Annei Senecae Tragoediae to be written

○**E** indicate how the latest possible date for the time period during which the Marci Lucii Annei Senecae Tragordiae were composed might be established

Question 8 RC

Select one answer choice.

The author of the passage makes which of the following claims about the eight extant Latin tragedies?

○**A** There is only circumstantial evidence that the plays were all written by the same author.

○**B** Scholars have persistently attributed the plays to Seneca despite evidence that some of them may have been composed prior to his lifetime.

○**C** Evidence in the manuscripts of the plays identifies them as having been written by Lucius Annaeus Seneca the Younger.

○**D** The plays contain some lines that have been construed as being directed against the emperor.

○**E** The plays contain material that could illustrate certain aspects of Seneca's philosophy.

Question 9 RC

Select one answer choice.

The author of the passage would most likely agree that if Seneca had in fact written the tragedies, then Seneca probably would have

- ○**A** used the plays as platforms for his philosophical ideas
- ○**B** referred to the plays in some of his other writings
- ○**C** been in danger of exile or execution for certain line in the plays
- ○**D** avoided attaching his name to be the plays out of modesty
- ○**E** written the plays during the latter portion of his lifetime

Question 10 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

If satellite images predicting outbreaks of Rift Valley fever in the Horn of Africa were to lead to vaccination campaigns five months in advance, monitoring of such images could potentially _____ epidemics of both livestock and people.

- ☐**A** avert
- ☐**B** initiate
- ☐**C** anticipate
- ☐**D** obliterate
- ☐**E** forecast
- ☐**F** forestall

Question 11 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Azarenka's descriptions are not _____: they grow organically from the themes that animate her writing.

- ☐**A** derivative
- ☐**B** gratuitous
- ☐**C** sophomoric
- ☐**D** original
- ☐**E** arbitrary
- ☐**F** novel

Question 12 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Sea turtles' grazing on sea grass is less _____ near Bermuda than elsewhere: Bermuda protects sea turtles as an endangered species but does not protect their predators, tiger sharks.

- ☐ **A** consistent
- ☐ **B** pervasive
- ☐ **C** inhibited
- ☐ **D** destructive
- ☐ **E** damaging
- ☐ **F** constrained

Question 13 is based on the following passage.

> Because of strong overall stylistic similarities, prehistoric cave paintings in El Castillo, Spain and others in Altamira, Spain, were thought to date from the same period. Recent pigment analyses, however, established the Altamira paintings as by far the older and as about the same age as a third group of paintings done in a different overall style. Nevertheless, this case does not prove that stylistic similarities cannot be a reliable indicator of closeness in age, since _____.

Question 13 CR

Select one answer choice.

Which of the following most logically completes the passage?

- ○ **A** experts who knew the results of the pigment analyses reexamined these paintings and found no previously unnoticed stylistic similarities between the Altamira paintings and the paintings in the third group
- ○ **B** there are certain stylistic features that the Altamira paintings share with all known paintings of their period and do not share with the El Castillo paintings
- ○ **C** before dating by pigment analysis was widely practiced, stylistic similarities were the only means of determining whether two prehistoric cave paintings dated from the same period
- ○ **D** determining the age of a prehistoric cave painting simply by reference to the age of the pigments used in that painting substitutes technology for artistic judgment
- ○ **E** there are experts who maintain that the results of the recent pigment analyses leave the striking stylistic similarities between the El Castillo paintings and the Altamira paintings unexplained

Questions 14 to 15 are based on the following passage.

Predators of herbivores can influence the structure and dynamics of plant communities in two ways: by reducing herbivore density or by modifying herbivore behavior. Whereas density-mediated effects generally affect all plants, behavioral effects often cause herbivores to change their relative use of different parts of their habitat. This can lead to a redistribution of herbivore damage on different plant species, for example, when plant-eating insects shift from preferred but risky plant species to less nutritious plants that offer refuge. A well-documented example involves predatory nursery-web spiders—a species that typically inhabits only the upper canopy of grasses. In systems where the spiders are present, grasshoppers shift their feeding activity toward ground level, thereby increasing the relative consumption of goldenrod over Kentucky bluegrass.

Question 14 RC

Select one answer choice.

The passage suggests which of the following about grasshoppers?

○**A** In the absence of certain predators, they are more likely to eat Kentucky bluegrass than to eat goldenrod.

○**B** When many predators are present, they typically eat only the most nutritious plants available.

○**C** When their population density is reduced, they tend to eat less nutritious plants.

○**D** They are the preferred prey of nursery-web spiders.

○**E** They prefer to eat plants located near ground level.

Question 15 RC

Select one answer choice.

The passage suggests which of the following about predators that modify herbivore behavior?

○**A** They are typically better hunters than density-reducing predators.

○**B** They often cause their prey to consume only the most nutritious foods available.

○**C** Their presence can cause plants to change their relative use of available nutrients.

○**D** Their effect on an ecosystem is usually less noticeable than that of density-reducing predators.

○**E** Their presence can affect some plant species more than others.
