## Section 1 12 Questions · 18 Minutes

### Question 1 TC 1빈칸

*For the blank, select the entry that best completes the text.*

The research institute publishes new material on its Web site well in advance of its appearance in print; inevitably, there is a lot of dross, but fortunately, much of the material is both _____ and free.

- ○**A** speculative
- ○**B** specious
- ○**C** copious
- ○**D** valuable
- ○**E** perplexing

### Question 2 TC 2빈칸

*For each blank, select one entry from the corresponding column of choices.*

In managing the economy, there is always tension between (i) _____ and (ii) _____. People want less government regulation, but not when it means firms can hire cheap child labor. People want open markets, but not so when bankers can deceive investors.

| Blank (i) | Blank (ii) |
|---|---|
| equality | transparency |
| freedom | innovation |
| cooperation | fairness |

### Question 3 TC 3빈칸

*For each blank, select one entry from the corresponding column of choices.*

Because leadership in the computer hacker group is extremely (i) _____, when law enforcement agencies arrested several prominent members, taking them offline, the group (ii) _____. Instead, it continues to operate, sometimes under its own name, sometimes under other names. The names are (iii) _____, as are the members of the group: anyone, anywhere, is free to work behind its mask.

| Blank (i) | Blank (ii) | Blank (iii) |
|---|---|---|
| fluid | adopted new practice | idiosyncratic |
| efficient | replaced its leadership | fungible |
| hierarchical | did not collapse | misleading |

*Questions 4 to 5 are based on the following passage.*

Early scholars described square dances as a type of ancient English country dance carried to the southern Appalachian Mountains and preserved unchanged for generations. However, while the Appalachian fiddle repertoire does include traditional reels that can be traced back to the British Isles, it also includes breakdowns, rags, and other musical features native to America. Appalachian songs similarly range from British ballads to African American blues. Given this musical diversity—not to mention the iconic presence of the banjo, an instrument with African roots—it would be naive to think the accompanying dances are purely English forms. While sections of Appalachia are relatively isolated, trade, travel, and immigration have continually introduced new cultural elements, including innovations in social dances, into the region's rural traditions.

**Question 4** RC

*(Highlighted portion: "Early scholars")*

*Select one answer choice.*

The passage suggests that which of the following was true of "early scholars"?

- ○**A** They downplayed the African influence on traditional English dance forms.
- ○**B** They overlooked the importance of migration in Appalachian history.
- ○**C** They may have been unaware of the complexity of Appalachia's musical traditions.
- ○**D** They underestimated the prominence of the fiddle in Appalachian dance music.
- ○**E** They neglected the social context in which Appalachian square dances were performed.

**Question 5** RC

*Select one answer choice.*

According to the passage, Appalachian square dancing differs from English country dancing in that Appalachian square dancing

- ○**A** is closely associated with the banjo
- ○**B** is particularly common in rural settings
- ○**C** can be performed to the tune of a reel
- ○**D** developed in isolation from outside influences
- ○**E** has changed significantly since it first emerged

**Question 6** SE

*Select the two answer choices that produce completed sentences that are alike in meaning.*

Pre-Columbian peoples had a significant impact on Amazonian forest diversity; at least 8,000 years ago, they must have begun domesticating plants recently found to be _____ around sites once occupied by humans.

- ☐**A** hybridized
- ☐**B** abundant
- ☐**C** uncommon
- ☐**D** preserved
- ☐**E** harvested
- ☐**F** dominant

**Question 7** SE

*Select the two answer choices that produce completed sentences that are alike in meaning.*

Since it was committed to the idea of science as an international, politically neutral enterprise, the Royal Society of London refused to _____ members from enemy nations during world wars of the twentieth century.

- ☐ **A** betray
- ☐ **B** expel
- ☐ **C** endorse
- ☐ **D** oust
- ☐ **E** sanction
- ☐ **F** condemn

**Question 8** SE

*Select the two answer choices that produce completed sentences that are alike in meaning.*

_____ the idea that attention is a limited resource, scientists have repeatedly observed that drivers using mobile phones are slower to react and more apt to miss important details than are drivers focused solely on the road.

- ☐ **A** Extending
- ☐ **B** Bolstering
- ☐ **C** Obscuring
- ☐ **D** Buttressing
- ☐ **E** Eclipsing
- ☐ **F** Complicating

**Question 9** SE

*Select the two answer choices that produce completed sentences that are alike in meaning.*

The adipose tissue in which our bodies store fat from the food we eat has traditionally been thought of as _____, but in reality, this tissue constitutes a dynamic organ, not a mere repository.

- ☐ **A** capacious
- ☐ **B** deleterious
- ☐ **C** inert
- ☐ **D** detrimental
- ☐ **E** passive
- ☐ **F** inessential

*Questions 10 to 12 are based on the following passage.*

In "The Franklin's Tale," from Chaucer's fourteenth-century《The Canterbury Tales》, a clerk uses medieval astronomical tables, calculating lunar and solar positions, to predict an extraordinarily high flood tide. Literary scholar Phyllis Hodgson has concluded that Chaucer's purpose here is artistic, not scientific, and that even though Chaucer was a master of astronomy and author of an astrolabe treatise, this "highly technical account of the clerk's astrological calculations need not be taken too seriously." Recently, however, astronomer Don Olson concluded that Chaucer's account actually describes a very rare astronomical configuration of the Sun, Moon, and Earth that produced an exceptionally high tide in December 1340. But why would Chaucer be aware of a high tide that occurred in 1340, some five decades before "The Franklin's Tale" was written. Some scholars place Chaucer's birth in late 1340 or early 1341. When Chaucer was studying astronomy during the 1380s and 1390s, it is plausible that he investigated his own horoscope. Chaucer may have discovered the remarkable tide-raising configuration in 1340 while calculating celestial positions at the time of his own birth and then used this knowledge as inspiration for the plot device in "The Franklin's Tale."

**Question 10** RC

*Select one answer choice.*

Which of the following statements regarding medieval astronomers can be inferred from the passage?

○**A** They were skeptical of the idea that certain astronomical configurations could produce high flood tides.

○**B** They had an understanding of the effect of the Sun and Moon on ocean tides.

○**C** They could calculate lunar positions with some accuracy, but not the positions of the Sun and Earth.

○**D** Although they were highly skilled in celestial calculations, they were unlikely to apply this knowledge to predictions of events on Earth.

○**E** They possessed the mathematical skills for performing only the simplest of astronomical calculations.

**Question 11** RC

*Select one answer choice.*

It can be inferred that Hodgson would agree with which of the following statements about the clerk's astronomical calculations?

○**A** The clerk's calculations do not add artistic merit to "The Franklin's Tale."

○**B** Chaucer's purpose in describing the clerk's calculations is to instruct readers in the rudiments of astronomy.

○**C** Chaucer's intent in using technical material was not to provide a scientifically valid discussion.

○**D** The clerk's ability to predict a high flood tide is implausible, given the level of scientific knowledge in the late fourteenth century.

○**E** The technical language that Chaucer uses in describing the calculations does not reflect the scientific terminology of the time.

**Question 12** RC

*Select one answer choice.*

The primary purpose of the passage is to

○**A** explain how fourteenth-century astronomers used complicated astronomical calculations to predict unusually high tides

○**B** show how medieval and modern methods predict similar effects of astronomical configurations on tides

○**C** argue that modern literary scholars should take Chaucer's scientific references throughout《The Canterbury Tales》more seriously

○**D** describe Chaucer's fascination with astronomy in general and with horoscopes in particular

○**E** present an explanation that supports the scientific veracity of a particular passage in《The Canterbury Tales》

## Section 2 15 Questions · 23 Minutes

### Question 1 TC 1빈칸

*For the blank, select the entry that best completes the text.*

The stars' attitudes toward their glowing press are diametrically opposed: some think it _____ and others take the adulation seriously.

- ○**A** flummery
- ○**B** consequential
- ○**C** fanatical
- ○**D** coincidental
- ○**E** sincere

### Question 2 TC 2빈칸

*For each blank, select one entry from the corresponding column of choices.*

Many elected officials have (i) _____ into believing that the new reforms represent a solution rather than (ii) _____ of the problem. Unfortunately, such self-deception is not uncommon among politicians.

| Blank (i) | Blank (ii) |
|---|---|
| conned others | an elucidation |
| deluded themselves | a resolution |
| persuaded some | an exacerbation |

### Question 3 TC 2빈칸

*For each blank, select one entry from the corresponding column of choices.*

Feeling that Francisco Suarez's views on early modern philosophy had received an amount of attention (i) _____ their great importance, the scholar decided to write a paper about Suarez to help (ii) _____ that neglect.

| Blank (i) | Blank (ii) |
|---|---|
| consonant with | codify |
| independent of | redress |
| incommensurate with | corroborate |

### Question 4 TC 3빈칸

*For each blank, select one entry from the corresponding column of choices.*

During Nigeria's colonial period, the country's Igbo societies had (i) _____ sense of gender distinctions, but the idea of a strict division of labor along gender lines (ii) _____. Indeed, the social roles of women and men were quite (iii) _____, based on what people did rather than on existential categories like gender.

| Blank (i) | Blank (ii) | Blank (iii) |
|---|---|---|
| an elastic | did not exist | fluid |
| a well-developed | was emerging | dissimilar |
| a diminishing | hardly changed | traditional |

*Questions 5 to 6 are based on the following passage.*

While direct bite-inflicted injury is the most commonly observed mechanism for Komodo dragons to dispatch prey, the role of bacteria in aiding prey death is poorly known. One study identified in the lizards' saliva and oral cavities 58 species of bacteria 93 percent of which are classified as potentially pathogenic. Auffenberg proposed that the bacteria are beneficial to the lizards; in essence a slow-acting venom facilitates prey capture by attacking lizards. He offered no mechanism by which the bacteria are acquired by lizards, however. Fry et al. questioned this interpretation, and proposed that sepsis-inducing bacteria are more plausibly acquired passively from prey and other environmental sources, with no role in prey acquisition. That model fits the observation that captive lizards (and presumably newborns) lack sepsis-inducing bacteria.

### Question 5 RC

*(Highlighted portion: "beneficial")*

*Select one answer choice.*

It can be inferred from the passage that Auffenberg regarded the bacteria in Komodo dragon saliva as "beneficial" because he believed that these bacteria

- ○**A** play an important role in helping the lizards digest their food
- ○**B** play an important role in maintaining the lizards' immune systems
- ○**C** are a weapon used by the lizards to incapacitate their prey
- ○**D** are transmitted directly from parent lizards to their offspring
- ○**E** deter larger predators from attacking the lizards

### Question 6 RC 문장선택

*Select the sentence in the passage that answers the question.*

Select a sentence in the passage that highlights a gap in an explanation.

*Questions 7 to 9 are based on the following passage.*

The seemingly unrelated aims of functional strength and aesthetic appeal had been not only successfully integrated in many of the classic suspension bridges of the past two centuries but also commonly achieved by engineers alone or leading teams. Thomas Telford was in fact both engineer and architect of his Menai Suspension Bridge, and John Roebling was both engineer and architect of his Brooklyn Bridge. That these engineering structures especially have come to be regarded as architectural icons demonstrates the aesthetic heights that an engineer can achieve.

Engineers less artistically confident than Telford and Roebling have engaged consulting architects to advise them on the design of everything from the facades placed on massive anchorages and skyscraper-high towers to the finishing details like deck railings and lampposts. Othmar Ammann, the chief engineer of the George Washington and many other New York City bridges, often sought the help of famous architects. When the George Washington was but an idea on paper, Ammann engaged Cass Gilbert, the architect of the Woolworth Building and other landmarks, to depict how the towers might be finished in stone. Since money was tight when the bridge was being completed, however, the steel-framed towers were left bare—a look that the Swiss architect Le Corbusier found extremely appealing—and bare steel became the new aesthetic standard for monumental bridge towers.

**Question 7** RC

*Select one answer choice.*

The primary purpose of the passage is to

○**A** explore the interplay between two professional disciplines

○**B** discuss the personal qualities needed to succeed in a particular endeavor

○**C** consider what qualities give aesthetic appeal to structures of a particular kind

○**D** present the evolution of a relationship between competing goals

○**E** explain how apparently disparate goals actually support each other

**Question 8** RC 복수

*Consider each of the choices separately and select all that apply.*

The passage implies that Othmar Ammann was

☐**A** responsible for a design that became an aesthetic touchstone for later bridges

☐**B** financially constrained from hiring the architects he wished for the George Washington Bridge

☐**C** less certain of his aesthetic design abilities than Telford and Roebling were of theirs

**Question 9** RC

*Select one answer choice.*

According to the passage, which of the following is true of Cass Gilbert's ideas for finishing the towers of the George Washington Bridge?

○**A** They had to be abandoned during construction.

○**B** They impressed Le Corbusier.

○**C** They were judged to be too costly when the project was initially proposed.

○**D** They derived from themes Gilbert had explored in the Woolworth Building.

○**E** They started a fashion that was followed in later bridge towers.

**Question 10** SE

*Select the two answer choices that produce completed sentences that are alike in meaning.*

For every _____ reader of《Vestiges》, there were many more who became vocal critics, and the book aroused heated opposition from a broad range of British society.

- ☐ **A** outspoken
- ☐ **B** meticulous
- ☐ **C** sympathetic
- ☐ **D** well-disposed
- ☐ **E** unenthusiastic
- ☐ **F** candid

**Question 11** SE

*Select the two answer choices that produce completed sentences that are alike in meaning.*

Because video game users control their character's actions, the distinction between media user and character is not as _____ in video games as it is in traditional media, where audience members simply witness characters' actions.

- ☐ **A** fluid
- ☐ **B** salient
- ☐ **C** fraught
- ☐ **D** elusive
- ☐ **E** palpable
- ☐ **F** charged

**Question 12** SE

*Select the two answer choices that produce completed sentences that are alike in meaning.*

Scientists are finding that the adult brain is for more _____ than they once thought: our behavior and environment can cause substantial rewiring of the brain or a reorganization of its functions and where they are located.

- ☐ **A** reparable
- ☐ **B** heterogeneous
- ☐ **C** malleable
- ☐ **D** variegated
- ☐ **E** complex
- ☐ **F** plastic

*Question 13 is based on the following passage.*

In 431 B.C., several hundred cavalry soldiers received a state burial outside the gates of Athens. Archaeologists excavating at the location of these gates found the bones of hundreds of men that dated to the period of the funeral. There are other gravesites in the area; however, examination of the bones in question indicates that the men frequently rode horses, as would be true of cavalry soldiers. Therefore, the bones are probably those of the soldiers, since _____.

**Question 13** CR

*Select one answer choice.*

Which of the following most logically completes the argument?

○**A** there are no historical records of any state burial of foot soldiers in that location around that period

○**B** none of the other gravesites in the area contain the bones of women, who were not permitted to be soldiers in ancient Athens

○**C** few Athenian men who lived during that period rode horses frequently

○**D** none of the bones at the gravesite are those of horses

○**E** ancient historians do not provide specific enough descriptions to enable archaeologists to pinpoint the burial's exact location

*Questions 14 to 15 are based on the following passage.*

Because densely populated urban centers concentrate human activity, we think of them as pollution crisis zones. Ecology-minded discussions often focus on ways to make cities seem somewhat less oppressively man-made, such as increasing the area devoted to parks or easing the intensity of development. But most such changes would actually undermine cities' extraordinary energy efficiency. Per unit of area, cities in the United States generate more greenhouse gases, use more energy, and produce more solid waste than most other American regions of comparable size. On a map depicting negative environmental impacts in relation to surface area, therefore, cities would look like intense hot spots. If you plotted the same negative impacts by resident or household, however, the reverse would hold.

**Question 14** RC

*Select one answer choice.*

Which of the following best expresses the main idea of the passage?

○**A** Increasing the space devoted to parks in urban areas would not necessarily make cities seem less man-made.

○**B** Because they are densely populated, cities tend to have a disproportionately negative impact on the environment.

○**C** Although densely populated cities are relatively energy efficient, they are still the largest contributors to environmental pollution.

○**D** Decreasing the density of urban populations might in some respects worsen their environmental impact.

○**E** The extraordinary energy efficiency of cities suggests that concerns about the environment in urban areas may be unwarranted.

**Question 15** RC 복수

*Consider each of the choices separately and select all that apply.*

The passage implies that in the United States relatively sparsely populated areas exceed cities in per capita rate of

□**A** solid-waste production

□**B** intensity of development

□**C** greenhouse-gas emissions
