Early scholars described square dances as a type of ancient English country dance carried to the southern Appalachian Mountains and preserved unchanged for generations. However, while the Appalachian fiddle repertoire does include traditional reels that can be traced back to the British Isles, it also includes breakdowns, rags, and other musical features native to America. Appalachian songs similarly range from British ballads to African American blues. Given this musical diversity—not to mention the iconic presence of the banjo, an instrument with African roots—it would be naive to think the accompanying dances are purely English forms. While sections of Appalachia are relatively isolated, trade, travel, and immigration have continually introduced new cultural elements, including innovations in social dances, into the region's rural traditions.

In "The Franklin's Tale," from Chaucer's fourteenth-century《The Canterbury Tales》, a clerk uses medieval astronomical tables, calculating lunar and solar positions, to predict an extraordinarily high flood tide. Literary scholar Phyllis Hodgson has concluded that Chaucer's purpose here is artistic, not scientific, and that even though Chaucer was a master of astronomy and author of an astrolabe treatise, this "highly technical account of the clerk's astrological calculations need not be taken too seriously." Recently, however, astronomer Don Olson concluded that Chaucer's account actually describes a very rare astronomical configuration of the Sun, Moon, and Earth that produced an exceptionally high tide in December 1340. But why would Chaucer be aware of a high tide that occurred in 1340, some five decades before "The Franklin's Tale" was written. Some scholars place Chaucer's birth in late 1340 or early 1341. When Chaucer was studying astronomy during the 1380s and 1390s, it is plausible that he investigated his own horoscope. Chaucer may have discovered the remarkable tide-raising configuration in 1340 while calculating celestial positions at the time of his own birth and then used this knowledge as inspiration for the plot device in "The Franklin's Tale."

○**C** They could calculate lunar positions with some accuracy, but not the positions of the Sun and Earth.

○**D** Although they were highly skilled in celestial calculations, they were unlikely to apply this knowledge to predictions of events on Earth.

○**E** They possessed the mathematical skills for performing only the simplest of astronomical calculations.

While direct bite-inflicted injury is the most commonly observed mechanism for Komodo dragons to dispatch prey, the role of bacteria in aiding prey death is poorly known. One study identified in the lizards' saliva and oral cavities 58 species of bacteria 93 percent of which are classified as potentially pathogenic. Auffenberg proposed that the bacteria are beneficial to the lizards; in essence a slow-acting venom facilitates prey capture by attacking lizards. He offered no mechanism by which the bacteria are acquired by lizards, however. Fry et al. questioned this interpretation, and proposed that sepsis-inducing bacteria are more plausibly acquired passively from prey and other environmental sources, with no role in prey acquisition. That model fits the observation that captive lizards (and presumably newborns) lack sepsis-inducing bacteria.

The seemingly unrelated aims of functional strength and aesthetic appeal had been not only successfully integrated in many of the classic suspension bridges of the past two centuries but also commonly achieved by engineers alone or leading teams. Thomas Telford was in fact both engineer and architect of his Menai Suspension Bridge, and John Roebling was both engineer and architect of his Brooklyn Bridge. That these engineering structures especially have come to be regarded as architectural icons demonstrates the aesthetic heights that an engineer can achieve.

Engineers less artistically confident than Telford and Roebling have engaged consulting architects to advise them on the design of everything from the facades placed on massive anchorages and skyscraper-high towers to the finishing details like deck railings and lampposts. Othmar Ammann, the chief engineer of the George Washington and many other New York City bridges, often sought the help of famous architects. When the George Washington was but an idea on paper, Ammann engaged Cass Gilbert, the architect of the Woolworth Building and other landmarks, to depict how the towers might be finished in stone. Since money was tight when the bridge was being completed, however, the steel-framed towers were left bare—a look that the Swiss architect Le Corbusier found extremely appealing—and bare steel became the new aesthetic standard for monumental bridge towers.

For every _____ reader of《Vestiges》, there were many more who became vocal critics, and the book aroused heated opposition from a broad range of British society.

- ☐ **A** outspoken
- ☐ **B** meticulous
- ☐ **C** sympathetic
- ☐ **D** well-disposed
- ☐ **E** unenthusiastic
- ☐ **F** candid

해설

'For every __ reader, there were many more who became vocal critics' → 빈칸은 critics의 반대.
빈칸 = 호의적인, 지지하는.
sympathetic과 well-disposed가 짝.
정답: C (sympathetic), D (well-disposed)

⚠ **함정 / 오답 포인트**

outspoken/candid(솔직한)는 짝이지만 vocal critics와 대비되지 않음(비평가도 솔직할 수 있음).

단어

well-disposed 호의적인 · **outspoken** 거리낌 없이 말하는 · **meticulous** 꼼꼼한 · **sympathetic** 공감하는, 호의적인 · **unenthusiastic** 열의 없는 · **candid** 솔직한

Because video game users control their character's actions, the distinction between media user and character is not as _____ in video games as it is in traditional media, where audience members simply witness characters' actions.

- ☐ **A** fluid
- ☐ **B** salient
- ☐ **C** fraught
- ☐ **D** elusive
- ☐ **E** palpable
- ☐ **F** charged

해설
원인 Because: 게임 사용자는 캐릭터의 행동을 직접 조종 → 사용자와 캐릭터의 구분이 흐려짐.
'not as __ in video games as in traditional media' → 빈칸 = 뚜렷한, 분명한.
salient와 palpable이 짝.
정답: B (salient), E (palpable)

⚠ **함정 / 오답 포인트**
fluid/elusive(흐릿한)는 짝이지만 방향이 반대: 'not as fluid'면 게임에서 구분이 더 분명하다는 뜻이 됨. fraught/charged도 짝이지만 근거 없음.

단어
salient 두드러진 · **palpable** 뚜렷한, 손에 잡힐 듯한 · **charged** 감정이 격앙된 · **fluid** 유동적인 · **fraught** 긴장된, ~로 가득한 · **elusive** 파악하기 어려운

Scientists are finding that the adult brain is for more _____ than they once thought: our behavior and environment can cause substantial rewiring of the brain or a reorganization of its functions and where they are located.

- ☐ **A** reparable
- ☐ **B** heterogeneous
- ☐ **C** malleable
- ☐ **D** variegated
- ☐ **E** complex
- ☐ **F** plastic

해설
콜론 뒤 근거: 행동과 환경이 뇌를 'substantial rewiring', 기능의 재조직을 일으킴 → 뇌가 변형 가능함.
빈칸 = 유연한, 변형 가능한.
malleable과 plastic이 짝.
정답: C (malleable), F (plastic)

⚠ **함정 / 오답 포인트**
heterogeneous/variegated(다양한)도 짝이지만 '재배선, 재조직'이라는 변화 가능성과 무관.

단어
reparable 수리 가능한 · **heterogeneous** 이질적인, 다양한 · **malleable** 유연한, 변형 가능한 · **variegated** 다채로운, 잡색의 · **complex** 복잡한 · **plastic** 가소성 있는, 유연한

In 431 B.C., several hundred cavalry soldiers received a state burial outside the gates of Athens. Archaeologists excavating at the location of these gates found the bones of hundreds of men that dated to the period of the funeral. There are other gravesites in the area; however, examination of the bones in question indicates that the men frequently rode horses, as would be true of cavalry soldiers. Therefore, the bones are probably those of the soldiers, since _____.

S2-13 정답: C CR 난이도 ●●●○○ verbal6 Q11

Select one answer choice.

Which of the following most logically completes the argument?

○**A** there are no historical records of any state burial of foot soldiers in that location around that period

○**B** none of the other gravesites in the area contain the bones of women, who were not permitted to be soldiers in ancient Athens

○**C** few Athenian men who lived during that period rode horses frequently

○**D** none of the bones at the gravesite are those of horses

○**E** ancient historians do not provide specific enough descriptions to enable archaeologists to pinpoint the burial's exact location

해설
결론: 이 뼈는 기병의 것일 가능성이 높다. 근거: 뼈 주인들이 말을 자주 탔다.
가정: 말을 자주 타는 사람 = 기병일 가능성이 높아야 함(다른 사람들은 말을 잘 안 탐).
C: 당시 아테네 남성 중 말을 자주 탄 사람은 드물었다 → 다른 무덤의 남성일 가능성을 배제.
정답: C

⚠ **함정 / 오답 포인트**
B: 다른 무덤에 여성이 없다는 건 말 타기 근거와 무관. A: 보병 국장 기록이 없다는 건 보조 정보일 뿐 '말 타기' 증거를 연결하지 못함.

단어
cavalry 기병 · **excavate** 발굴하다 · **pinpoint** 정확히 짚다

Because densely populated urban centers concentrate human activity, we think of them as pollution crisis zones. Ecology-minded discussions often focus on ways to make cities seem somewhat less oppressively man-made, such as increasing the area devoted to parks or easing the intensity of development. But most such changes would actually undermine cities' extraordinary energy efficiency. Per unit of area, cities in the United States generate more greenhouse gases, use more energy, and produce more solid waste than most other American regions of comparable size. On a map depicting negative environmental impacts in relation to surface area, therefore, cities would look like intense hot spots. If you plotted the same negative impacts by resident or household, however, the reverse would hold.

S2-14 정답: D RC 난이도 ●●●○○ verbal18 Q12

Select one answer choice.

Which of the following best expresses the main idea of the passage?

○**A** Increasing the space devoted to parks in urban areas would not necessarily make cities seem less man-made.

○**B** Because they are densely populated, cities tend to have a disproportionately negative impact on the environment.

○**C** Although densely populated cities are relatively energy efficient, they are still the largest contributors to environmental pollution.

○**D** Decreasing the density of urban populations might in some respects worsen their environmental impact.

○**E** The extraordinary energy efficiency of cities suggests that concerns about the environment in urban areas may be unwarranted.

→ 도시 밀도를 낮추면 오히려 환경 영향이 악화될 수 있다 = D.
정답: D

⚠ **함정 / 오답 포인트**
E: '우려가 부당하다'는 과장(극단적). C: 1인당 기준으로는 가장 큰 기여자가 아님. B: 저자가 반박하는 통념.

단어
undermine 약화시키다 · **per capita** 1인당 · **unwarranted** 부당한, 근거 없는

Consider each of the choices separately and select all that apply.

The passage implies that in the United States relatively sparsely populated areas exceed cities in per capita rate of

- ☐ **A** solid-waste production
- ☐ **B** intensity of development
- ☐ **C** greenhouse-gas emissions

해설
근거: 면적당 도시는 'generate more greenhouse gases, use more energy, and produce more solid waste'이지만 'If you plotted the same negative impacts by resident or household, however, the reverse would hold.'
→ 1인당 기준으로는 다른 지역이 고형 폐기물(A), 온실가스(C)에서 도시를 초과.
B: 개발 강도는 1인당 '비율'로 언급된 항목이 아님.
정답: A, C

⚠ **함정 / 오답 포인트**
B: 'intensity of development'가 지문에 나와 고르기 쉽지만 per capita 역전 대상 목록에 없음.

단어
per capita 1인당 · **intensity** 강도 · **comparable** 비슷한, 비교할 만한
