The _____ repeating real-time climatological measurements largely prevents correcting inaccurate readings made in the past.

○**A** need for
○**B** impossibility of
○**C** history of
○**D** consensus about
○**E** approach to

해설
핵심: 빈칸 __ repeating measurements가 '과거의 부정확한 측정값 수정을 막는다(prevents correcting)'.
실시간(real-time) 측정은 그 순간에만 가능하므로 다시 반복할 수 없다 → 그래서 과거 값을 고칠 수 없음.

impossibility of(~의 불가능성)가 인과관계를 정확히 완성.
정답: B (impossibility of)

Animals live longer when their calorie intake is restricted to two-thirds of what is considered normal for their species. Animals so restricted are also generally healthier: most diseases, including cancer, diabetes, and neurodegenerative illness, are forestalled. This phenomenon was long attributed to a simple slowing of metabolism (cells' production of energy from fuel molecules) and consequent reproduction of its toxic by-products in response to less food. In fact, however, calorie restriction does not slow mammalian metabolism and in yeast and worms, metabolism is both sped up and altered. Some scientists now theorize that calorie restriction is a biological stressor that, like natural food scarcity, induces a more complex defensive response, which in mammals includes changes in cellular defenses and repair.

Though long acknowledged internationally as one of India's major nonfiction writers, Nirad Chaudhuri (1897-1999), largely because of controversial political opinions, has been shunned by much of the Indian intelligentsia and his work had been unavailable to Indian readers until 1997. In fact, only since then has his 1951《Autobiography》, the book that made his international reputation, been brought back into print in India after an absence of many years. Though he has enjoyed support among novelists—VS. Naipaul has called the《Autobiography》a great book about the English colonization of India, and Doris Lessing has called it “one of the great books of the twentieth century”—Chaudhuri's work has been more discussed than read. For example, until recently none of his books were available in the United States, but a critical work about him is a standard university text. At his best, says William Dalrymple, Chaudhuri is a superb writer of descriptive prose; but in his sometimes indulgent meandering and excessive allusion, Chaudhuri's work resembles that of a later Indian writer of genius, Salman Rushdie.

Edith Wharton's reputation may be secure, but it is the wrong kind of reputation: she is celebrated as a novelist concerned with elegant surfaces and manners. Critics have misunderstood the nature of her contribution to modern fiction largely because they misperceive her subject matter as genteel and effete. Even sympathetic critics fail to acknowledge the extent to which Wharton challenged contemporary mores. Between her early novel, 《The House of Mirth》 (1905) and her last, 《The Buccaneers》 (1938), Wharton addressed subjects that many might think of as decidedly un-Whartonesque, including marital strife and rural and urban poverty. In 1776, the state of New Jersey adopted a constitution that ignored gender in its suffrage clause, defining voters simply as adult residents worth at least fifty pounds. After 1776, women routinely participated in the state's electoral process, until, in 1801, the state legislature passed a law redefining voters solely as adult White male taxpaying citizens. Political historians have been perplexed by New Jersey's deviation from the established norm of exclusive male suffrage, finding no sign of public agitation either for or against the voting rights of women prior to their enfranchisement in 1776 or disenfranchisement in 1801. Consequently, historians have downplayed the extent to which suffrage resulted from careless constitutional construction and have viewed the 1801 disenfranchisement as a legislative effort to remedy this carelessness. Yet examination of revolutionary-era manuscripts indicates that the 1776 suffrage clause underwent close legislative scrutiny that led to several significant changes; thus, the absence of gender references in the final version was probably not accidental. Indeed, the evidence suggests that New Jersey's legislators believed that all who possessed sufficient net worth were entitled to vote. However, they also saw the net worth qualification as serving to prevent an overdemocratization of the voting process.

Sunlight is composed of different colors of light, which differ in how far they penetrate a given medium. Seawater is most deeply penetrated by blue light, and at depths near 1,000 meters the sunlight is almost entirely blue. However, a few fish species living at such depths have eyes with lenses tinted so that they filter out blue light but not light of any other color.

○**C** The eyes of most fish that live significantly below the surface waters can detect light of only a limited color range.

○**D** Most marine organisms living at depths near 1,000 meters are bioluminescent, emitting green light that is hard for most fish to distinguish from the background sunlight.

While export prices remained robust, British India's Tea Cess Committee (TCC) made only sporadic, small-scale attempts to create demand for tea in India by giving away pre-brewed cups in selected locations and selling small packets of leaf fragments. Still, by 1930 only a fraction of the Indian population had tasted tea, and more than 90 percent of the crop was exported. The Great Depression decisively changed the picture, however. International tea prices plunged, and by 1935 growers faced an unsold surplus of more than a hundred million pounds. The prospect of a huge "uninitiated" market suddenly seemed appealing, and the TCC, reorganized as the Indian Tea Market Expansion Board (ITMEB) and provided with an expanded budget, began the largest marketing campaign in Indian history.

○**E** an ineffective way to expand the local tea market
