Section 1 12 Questions · 18 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

Because carbon is a relatively _____ element, much of the original carbon available to be incorporated in the Earth may have escaped during the accretion of the planet.

- ○**A** amorphous
- ○**B** abundant
- ○**C** inert
- ○**D** malleable
- ○**E** volatile

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

An affinity for (i)_____ is a characteristic of Bynum's work and of her rhetorical strategy as a historian, and it is often both refreshing and illuminating. But this predilection for (ii)_____ can be vexing, too, by appearing to eschew necessary distinctions.

Blank (i)	Blank (ii)
paradox	daring hyperbole
humor	indiscriminate eclecticism
understatement	unresolvable ambivalences

Question 3 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Early practitioners of the natural sciences developed methods to remove distortions caused by either the research environment or the researcher. Such methods, especially with respect to the researcher, were considered to (i) _____ those (ii) _____ subjectivity whose unbridled expression was thought to (iii) _____ research.

Blank (i)	Blank (ii)	Blank (iii)
restrain	incursions of	corrupt
reveal	restrictions on	justify
disguise	acknowledgements of	expedite

Question 4 is based on the following passage.

Setting conservation objectives often mixes scientific knowledge with political feasibility in such a way that one cannot tell where the science stops and the political pragmatism takes over. For example, Tear found that for endangered species with recovery plans, over a quarter of the plans set quantitative recovery objectives at or below the species' existing population size or number of populations. Most likely these objectives were so low because they were politically palatable. Another possible explanation for such modest recovery objectives is what is known as the shifting-baseline syndrome. In this scenario, successive generations of wildlife managers use as their baseline the conditions they experienced at the start of their careers, resulting in lower expectations with each new generation.

Question 4 RC

Select one answer choice.

According to the passage, the "shifting-baseline syndrome" is a result of which of the following?

○**A** Modest recovery objectives determined by political pragmatism

○**B** The difficulty of determining existing population size and number of populations for endangered species

○**C** Changes in the criteria that are used in determining whether a given quantitative objective has been met

○**D** Each new generation of wildlife managers using recent conditions to set numerical baselines for wildlife populations

○**E** The way that hopes for recovery of endangered species populations color the expectations of successive generations of wildlife managers

Question 5 is based on the following passage.

When on an airplane, Consuelo never enjoys movies that have been widely recommended because the poor quality of the picture spoils her enjoyment. Since in no circumstances does she ever enjoy movies that have been widely derided, it follows that she never enjoys movies on airplanes.

Question 5 CR

Select one answer choice.

Which of the following, if true, would enable the conclusion of the argument to be properly drawn?

○**A** The only place where Consuelo enjoys widely recommended movies is a movie theater.

○**B** Widely recommended movies are never shown on airplanes.

○**C** If a movie shown on an airplane is not widely derided, then it is invariably widely recommended.

○**D** If the picture quality of the movies shown on airplanes was better, Consuelo would enjoy the widely recommended movies.

○**E** Some movies are neither widely recommended nor widely derided.

Question 6 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Williams argues that philosophy has become _____ occupation these days, and that it should rather be "part of a more general attempt to make the best sense of our life."

- ☐ **A** a recondite
- ☐ **B** an acknowledged
- ☐ **C** an esoteric
- ☐ **D** an exacting
- ☐ **E** a salacious
- ☐ **F** an altruistic

Question 7 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Individuals, governments, and companies show ample ability to _____ themselves by setting goals based on current conditions and then blindly following them even when those conditions change drastically.

- ☐ **A** hamstring
- ☐ **B** reinvent
- ☐ **C** promote
- ☐ **D** revitalize
- ☐ **E** impair
- ☐ **F** invigorate

Question 8 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Some of the characters and themes depicted on the painted glass vessels found at Begram point toward an Egyptian provenance, but Egypt was not the _____ and perhaps not even the principal place of manufacture.

- ☐ **A** main
- ☐ **B** leading
- ☐ **C** sole
- ☐ **D** likeliest
- ☐ **E** original
- ☐ **F** exclusive

Question 9 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Titan, Saturn's largest moon, looks surprisingly _____, even though it is a cold, dimly lit world made from unknown materials.

- ☐ **A** habitable
- ☐ **B** familiar
- ☐ **C** forbidding
- ☐ **D** placid
- ☐ **E** daunting
- ☐ **F** recognizable

Questions 10 to 12 are based on the following passage.

This passage is adapted from material published in 2019.

In 2018, the U.S. Congress passed the "45Q legislation," which significantly increases corporate tax credits for various uses of CO_2 (carbon dioxide). The most controversial use is "enhanced oil recovery." An oil company purchases CO_2, transports it by pipeline and injects it into depleted oil wells, pushing out extra oil it could not extract by conventional means. A climate change solution that entails producing more fossil fuels may sound Orwellian, and some environmental critics have attacked 45Q as just another fossil-fuel subsidy program in disguise. But enhanced oil recovery appears to reduce current emissions because the CO_2 typically captured from natural gas or ethanol refineries gets sequestered underground. Some environmentalists, such as Kurt Waltzer of the Clean Air Task Force, argue that turning carbon capture into an energy technology rather than an emission technology is the first step toward broad commercial adoption of CO_2 removal. It turns recaptured CO_2 into a product to be bought or sold rather than simply a cost to be endured.

Question 10 RC

Select one answer choice.

The passage is primarily concerned with

- ○ **A** discussing a controversial aspect of specific legislation relating to CO_2
- ○ **B** explaining the science of a new process for capturing CO_2
- ○ **C** highlighting the shortcomings of a specific method of combating climate change
- ○ **D** arguing that emission technologies are the most effective method of combating climate change
- ○ **E** summarizing the advantages of relying on legislation to combat climate change

Question 11 RC

(Highlighted portion: “some environmental critics”)

Select one answer choice.

According to the passage, "some environmental critics" object to the 45Q legislation on which of the following grounds?

○**A** It will drive up the price of captured CO_2.

○**B** The process of extracting extra oil could have unforeseen environmental consequences.

○**C** Fossil fuels extracted via enhanced oil recovery typically produce more carbon emissions than ethanol or natural gas.

○**D** It will replace current subsidy programs that have been proven effective.

○**E** Its proponents' claims that it is part of a climate change solution are misleading.

Question 12 RC

Select one answer choice.

The passage suggests that Kurt Waltzer would likely agree with which of the following statements about the 45Q legislation?

○**A** It will likely replace some of the fossil-fuel subsidy programs that are currently in effect.

○**B** It is likely to impede the development of economically efficient ways of recapturing CO_2 for sequestration.

○**C** The positive effects of other portions of the legislation will likely outweigh the environmental harm caused by its controversial aspects.

○**D** The incentives it provides for the production of more fossil fuel are an ineffective means of reducing the production of CO_2 byproducts.

○**E** Its provision of corporate tax credits for using CO_2 for enhanced oil recovery may offer a net gain in environmental terms.

Section 2 15 Questions · 23 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

The law student found traditional legal reference works unhelpful, since such works assume that the reader has a considerable familiarity with the intricacies of contract law, an assumption that was, in his case at least, _____.

- ○**A** pessimistic
- ○**B** unwarranted
- ○**C** incisive
- ○**D** predictable
- ○**E** unconventional

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

Unlike, say, locusts, which simply raze entire fields, stinkbugs wreak their havoc (i) _____. The injury they do to corn, for instance, is (ii) _____ the ear is husked, at which point certain kernels—the ones into which a stinkbug stuck its pointy mouth—will reveal themselves to be sunken and brown.

Blank (i)	Blank (ii)
periodically	invisible until
insidiously	ameliorated when
instantaneously	apparent before

Question 3 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Even the most (i) _____ changes produce some (ii) _____ effects. Science and technology helped bring about unprecedented prosperity for Americans in the period after the Second World War, but also some (iii) _____ including a gap in social outlook between the generation that was born after 1945 and their parents, a schism that induced for many a deep alienation, something of a mutual incomprehension.

Blank (i)	Blank (ii)	Blank (iii)
profound	noticeable	problems
transient	trivial	opportunities
beneficent	unwanted	consequences

Question 4 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Paradoxically, it is Sebald's isolating, melancholy inwardness that creates the (i) _____ between narrator and reader that is the hallmark of his writing. The more Sebald insists on his (ii) _____, the more powerfully he triggers a compensatory attentiveness, and even solicitude, in his reader. But as with any single tone maintained with such undeviating consistency, sooner or later, the problem of (iii) _____ arises: the sameness of his music can weary all but the most similarly predisposed listener.

Blank (i)	Blank (ii)	Blank (iii)
aesthetic distance	credibility	histrionics
uncanny intimacy	authenticity	modulation
hierarchical relationship	loneliness	morality

Questions 5 to 6 are based on the following passage.

African American soul music's commercial influence gradually declined during the early 1970s as newer styles such as funk and disco began to dominate the airwaves and as other, larger changes occurred within the American music industry. After the Second World War, African American popular music had largely been the province of independent record labels. By the 1970s, though, these labels were either going out of business or, to an increasing degree, coming under the control of major corporations. This shift had dire consequences for the production of soul music. Whereas independent labels had achieved success through a skillful balance of commercial and artistic considerations, the emphasis now became fixed upon marketing a product, resulting in the more individualized voices in African American popular music being quelled.

Question 5 RC

Select one answer choice.

According to the passage, which of the following is true about the independent record labels?

- ○**A** They focused entirely on producing African American popular music.
- ○**B** They refused to produce disco music, viewing it as too commercial.
- ○**C** They preferred going into bankruptcy to losing their creative autonomy.
- ○**D** They accounted for both artistic quality and popular appeal in producing soul music.
- ○**E** They reacted to the decline of soul music by emphasizing more individualized voices.

Question 6 RC

(Highlighted portion: "the more individualized voices")

Select one answer choice.

The passage suggests which of the following about "the more individualized voices"?

- ○**A** They were speaking out against corporate control of the music industry in the 1970s.
- ○**B** They were less likely to be promoted by major corporations than by independent labels.
- ○**C** Their number grew significantly between the end of the Second World War and the 1970s.
- ○**D** They were largely responsible for the emergence of new musical styles in the 1970s.
- ○**E** Their lack of concern for business led to the decline of independent music labels.

Questions 7 to 9 are based on the following passage.

A significant proportion of meteorites contain chondrules, small, glassy silicate spheres. The importance of chondrules is that they show that at some time the temperature was so high that the chondrule material was vaporized. The vapor then cooled quickly and the liquid silicates, condensing out of the vapor, formed small silicate spheres under the influence of surface tension. When these spheres solidified, they were incorporated into silicate fragments, and the material was eventually compressed into rock by gravitational forces.

The fact that the chondrules cooled very quickly is revealed by the composition of the minerals within them. In the vapor phase, whole minerals would not have existed, but there would have been components that, combined in various ways, can form different minerals. Combinations of these components produced an initial collection of minerals within chondrules when they formed. While the silicate was hot, the components changed partners to form more stable minerals—meaning ones of lower energy. Given enough time, the minerals in chondrules would have reached the lowest possible energy while using all available components. The mixture of minerals would then have been equilibrated. However, the mixtures of minerals in chondrules are nonequilibrated—corresponding to a total energy far greater than the minimum possible. This shows that the chondrules became solid and cooled so quickly that the nonequilibrate state became frozen in, since individual components did not have enough energy to jostle their way through the material to form more stable minerals.

Question 7 RC

Select one answer choice.

It can be inferred from the passage that if a newly formed chondrule were to cool slowly, then

- ○**A** its surface tension would be dissipated
- ○**B** it would be less susceptible to compression by gravitational forces
- ○**C** it would contain different minerals than if it had cooled quickly
- ○**D** its final mixture of minerals would closely resemble the initial collection
- ○**E** its components would lack sufficient energy to form minerals

Question 8 RC

Select one answer choice.

According to the passage, chondrules are significant because they

- ○**A** facilitate a better understanding of the chemical properties of silicates
- ○**B** explain why silicate fragments are common in meteorites
- ○**C** illuminate the interactions between chemical and gravitational forces
- ○**D** provide information about the mineral components present at the time of their formation
- ○**E** point to episodes involving extremely high temperatures

Question 9 RC

Select one answer choice.

Which of the following best describes the function of the highlighted sentence in the context of the passage as a whole?

- ○**A** It describes a condition that is required for a critical process discussed in the passage.
- ○**B** It discusses an empirical possibility that is later ruled out in the passage.
- ○**C** It presents evidence that confirms a suggestion made earlier in the passage.
- ○**D** It helps reconcile two seemingly conflicting findings described in the passage.
- ○**E** It outlines a feature common to several physical processes mentioned in the passage.

Question 10 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Faced with so much conflicting information on the internet, many people come to believe that all sources are so _____ that efforts to discriminate between the true and the false are inevitably futile.

- ☐**A** slanted
- ☐**B** imprecise
- ☐**C** splenetic
- ☐**D** tendentious
- ☐**E** surreptitious
- ☐**F** acrimonious

Question 11 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Despite relying on the well-to-do for commissions, the portrait painter was no sycophant: he did not _____ when it came to depicting his patrons' wrinkles, blemishes, or self-satisfied expressions.

- ☐**A** demur
- ☐**B** dissimulate
- ☐**C** exaggerate
- ☐**D** hyperbolize
- ☐**E** excel
- ☐**F** scruple

Question 12 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Because they view Earth's resources as strictly limited, some environmentalists find the notion of sustainable growth to be _____, believing that self-restraint and sacrifice must be at the heart of any environmentally sound strategy for the future.

- ☐ **A** inevitable
- ☐ **B** desirable
- ☐ **C** dubious
- ☐ **D** questionable
- ☐ **E** chimerical
- ☐ **F** certain

Question 13 is based on the following passage.

> The ship Mary Rose, first launched in 1511, underwent extensive repairs in 1528 and 1536 and sank in 1543. Researchers raised the ship in 1982 and analyzed the wreck's preserved timbers; some timbers came from trees felled after 1511, so they must have been added during repair. There were some beams, however, that came from trees felled before 1511. It is likely, therefore, that these beams were part of the original ship.

Question 13 CR

Select one answer choice.

Which of the following, if true, most strengthens the argument?

- ○ **A** The repair caused the Mary Rose to be significantly more difficult to handle and ultimately may have led to the ship's sinking.
- ○ **B** The beams were fastened with wooden nails that came from trees felled after 1511.
- ○ **C** The beams came from a part of the ship that quite commonly needs to be repaired every few years.
- ○ **D** One structurally important timber came from a tree felled after 1528.
- ○ **E** Shipbuilders of the 1500s preferred to work with recently felled wood that was still green with sap.

Questions 14 to 15 are based on the following passage.

> In European lowland heathlands, heather bushes, grasses, and bracken compete with one another for the sandy soil's scarce nutrients, with none acquiring permanent dominance. In Dutch heathlands, however, atmospheric nitrogen pollution produced by intensive animal farming has turned heathlands into grassland, the result of an interaction between nitrogen pollution and heather-eating beetles. Additional nitrogen usually increases growth of both grass and heather, and at first heather usually thrives because the grasses cannot penetrate the canopy of its bushes. Heather beetle population size, like that of many herbivorous insects, varies from year to year. When heather beetles are abundant, their larvae grow particularly well on the nitrogen-enriched heather shoots. Voraciously feeding larvae and adults then defoliate the bushes, tipping the competitive balance between heather and grasses irrevocably.

Question 14 RC

Select one answer choice.

It can be inferred from the passage that an abundance of heather beetles in Dutch heathlands

○**A** may be prevented by the proper management of heathlands

○**B** can be caused by a lack of atmospheric nitrogen

○**C** can result in grasses gaining increased access to sunlight

○**D** helps check the growth of a wide variety of plants

○**E** will inevitably be followed by years of heather beetle scarcity

Question 15 RC

Select one answer choice.

Which of the followings best describes the function of the highlighted sentence in the author's explanation?

○**A** It supplies information to explain changes in atmospheric nitrogen pollution.

○**B** It emphasizes the extent to which Dutch heathlands are ecologically fragile environments.

○**C** It provides an example of a factor beyond the control of those seeking to preserve heather bushes.

○**D** It suggests that the presence of intensive animal farming has been unfairly blamed for the demise of Dutch heathlands.

○**E** It explains why there might be a lag between increases in atmospheric nitrogen and damage to heather.
