Section 1 12 Questions · 18 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

The subject of the lecture was not _____ the interests of the physicians who constituted the audience, and their attention perceptibly waned as the lecture progressed.

- ○**A** limited by
- ○**B** exhausted by
- ○**C** isolated from
- ○**D** inimical to
- ○**E** germane to

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

It would be imprecise to characterize her scholarship as (i) _____: though her etymological discussions are necessarily esoteric, there is nothing (ii) _____ about the conclusions she derives from them.

Blank (i)	Blank (ii)
derivative	obscure
arcane	controversial
careless	innovative

Question 3 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

Unlike news reports, theater isn't expected to stick to the facts. Built on a sandy foundation of make-believe and (i) _____, the form, by nature, traffics in (ii) _____. Good documentary drama exploits its inherent paradox: creating artifice from verbatim texts, it uncovers truths by playing on the tension between what's real and what's (iii) _____.

Blank (i)	Blank (ii)	Blank (iii)
zeal	illusion	remarkable
pretense	controversy	invented
optimism	platitudes	predictable

Question 4 is based on the following passage.

Biologists generally agree that birds and dinosaurs are somehow related to one another. The agreement ends there. Hypotheses regarding dinosaurian and avian evolution are unusually diverse—and often at odds with one another. Confusion consequently reigns over a broad spectrum of unanswered questions dealing with avian origins and the biology of dinosaurs and early birds. This confusion has been exacerbated by a paucity of serious attempts to synthesize and evaluate available data on the details of avian and dinosaurian evolution. Too often, the job of summarizing current knowledge of these subjects has fallen to well-meaning but naïve lay authors or reporters. Consequently, both the public and the scientific community have often been misled by widespread dissemination of sensational but weakly founded hypotheses.

Question 4 RC 복수

Consider each of the choices separately and select all that apply.

The passage suggests that which of the following could help remedy the problem described in the highlighted sentence ("Consequently, ... hypotheses.")?

- ☐ **A** An article written by a biologist for the general public summarizing current theories about avian and dinosaurian evolution
- ☐ **B** A close examination of available data on avian and dinosaurian evolution
- ☐ **C** A new hypothesis regarding the connection between avian and dinosaurian evolution

Question 5 is based on the following passage.

In the shallow end of Lake Tomwa, there are remains of numerous Jeffery pine trees that grew there during a lengthy drought. Researchers had believed that this drought lasted at least 150 years, but carbon dating reveals that pines were growing in the lake bed for only 120 years, from 1200 until 1320. Since the Jeffrey pines, which cannot survive in water, must have died at the end of the drought, the dating shows that the drought lasted less than 150 years.

Question 5 CR

Select one answer choice.

The argument given relies on which of the following as an assumption?

- ○ **A** No other species of tree started growing in the bed of Lake Tomwa after 1200.
- ○ **B** No tree remains of any kind are present at the bottom of deeper parts of Lake Tomwa.
- ○ **C** There was at least one tree in the lake bed that was alive for the entire period from 1200 to 1320.
- ○ **D** There has not been a more recent drought that caused a drying up of the shallow end of the lake.
- ○ **E** The shallow end of the lake had been dry for less than 30 years by the time Jeffrey pines started growing in the lake bed.

Question 6 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The environmental threat posed by the New Zealand mud snail, an invasive species, is _____ by the snail's small size, which facilitates its spread across watersheds through human activity.

- ☐ **A** initiated
- ☐ **B** ameliorated
- ☐ **C** exacerbated
- ☐ **D** extenuated
- ☐ **E** mitigated
- ☐ **F** aggravated

Question 7 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Since some contemporary western dieticians believe that the only function of food is to provide nourishment, these dieticians view an emphasis on the aesthetic dimension of the culinary art as _____.

- ☐ **A** unprecedented
- ☐ **B** unwarranted
- ☐ **C** illuminating
- ☐ **D** groundless
- ☐ **E** promising
- ☐ **F** novel

Question 8 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The writer had little interest in realism; many of his stories take place in a world either fancifully sketched out or purposefully _____.

- ☐ **A** mythical
- ☐ **B** plausible
- ☐ **C** mundane
- ☐ **D** enigmatic
- ☐ **E** banal
- ☐ **F** ambiguous

Question 9 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Terms like "mystery fiction" and "crime fiction" have connotations that may not be _____ but are hardly laudatory, at least not in the way that those of terms like "literary fiction" and "metaphysical poetry" are laudatory.

- ☐ **A** derogatory
- ☐ **B** belittling
- ☐ **C** pedantic
- ☐ **D** enviable
- ☐ **E** desirable
- ☐ **F** contemporary

Questions 10 to 12 are based on the following passage.

Some historians have recently challenged the "party period paradigm," the view, advanced by McCormick and others, that political parties—especially the two major parties—in the United States between the years 1835 and 1900 evoked extraordinary loyalty from voters and dominated political life. Voss-Hubbard cites the frequency of third-party eruptions during the period as evidence of popular antipathy to the two-party regime. He correctly credits third parties with helping generate the nineteenth-century's historically high rates of voter turnout by forcing major parties to bolster supporters' allegiance, lest minor parties siphon off their votes, and with pushing policy demands that the major parties ignored. Formisano stresses the pervasive record of nonpartisan and antiparty governance at the local level, and women's frequent participation in nineteenth-century public life, prior to their enfranchisement, in nonpartisan and antiparty ways as evidence of the limitations of the party period paradigm. Yet McCormick would deny that the existence of antiparty sentiment during the period undermines the paradigm, since he has always acknowledged the residual strength of such sentiment during the nineteenth century. In any case, the strength of the paradigm is its comparative thrust: the contrast it draws between the period in question and later political eras.

Question 10 RC

Select one answer choice.

The primary purpose of the passage is to

- ○ **A** correct a common misconception about a historical period
- ○ **B** identify a feature of a historical period that has often been overlooked
- ○ **C** challenge the validity of evidence used to support a claim
- ○ **D** discuss certain challenges to a particular view
- ○ **E** account for a particular feature of a historical period

Question 11 RC 문장선택

Select the sentence in the passage that answers the question.

Select the sentence in the passage that describes how a historian might reply to attempts to call his theory into question.

Question 12 RC

(Highlighted portion: "evoked")

Select one answer choice.

In the context in which it appears, "evoked" most nearly means

- ○**A** elicited
- ○**B** recalled
- ○**C** cited
- ○**D** suggested
- ○**E** elaborated

Section 2 15 Questions · 23 Minutes

Question 1 TC 1빈칸

For the blank, select the entry that best completes the text.

Saturn's rings seem _____, but it now appears that several decades ago, the shape of the innermost rings was altered by a mysterious event that all our telescopes and spacecraft failed to detect.

- ○**A** immutable
- ○**B** fragmentary
- ○**C** luminous
- ○**D** unique
- ○**E** concentric

Question 2 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

Not only is the field of behavioral genetics strewn with (i) _____ findings, but even among those findings managed to survive, many have turned out to be (ii) _____ a very restricted class of cases.

Blank (i)	Blank (ii)
convergent	refuted by
disparate	germane to
repudiated	subordinate to

Question 3 TC 2빈칸

For each blank, select one entry from the corresponding column of choices.

Discovering that cooler stars, which constitute three-quarters of our galaxy, can also be surrounded by habitable zones warm enough to harbor liquid water and potentially microbes and bacteria has (i) _____ the (ii) _____ the search for extraterrestrial life.

Blank (i)	Blank (ii)
assuaged	target territory in
expanded	popular discomfort with
jeopardized	primary motivation for

Question 4 TC 3빈칸

For each blank, select one entry from the corresponding column of choices.

William Newman and Lawrence Principe point out that, prior to the seventeenth century, the terms "alchemy" and "chemistry" were largely (i) _____ in European usage. It was from the third decade of the eighteenth century that the two terms began to (ii) _____. Newman and Principe suggest that a third term, "chymistry," should be used to denote the transitional early modern phase when "alchemy" and "chemistry" were becoming (iii) _____.

Blank (i)	Blank (ii)	Blank (iii)
interchangeable	coalesce	increasingly more convoluted
absent	proliferate	steadily less synonymous
misapplied	diverge	fundamentally less significant

Questions 5 to 6 are based on the following passage.

Using radar instruments to analyze the exact nature of geological features on Saturn's moon Titan is challenging, because radar images are unlike ordinary photographs. With radar, the brightness of the reflected signal correlates with the roughness of the surface. Thus, the smooth surfaces of Titan's methane-filled lakes look dark in radar images, while bright areas usually suggest rough hilly terrain. However, the data don't always follow this pattern. Many detected river valleys and lakes appear bright compared to the surrounding terrain, suggesting a generally dry riverbed or lake bed filled with gravel or cobble. As for the dark, meandering river valleys, one theory proposes that they are deeply incised bedrock channels whose steep walls shadow the signal, making the radar images appear dark.

Question 5 RC

Select one answer choice.

Based on information in the passage, it can be inferred that a radar image of Titan is most likely to be able to show

- ○**A** whether a lake is filled or mostly dry
- ○**B** whether a surface is bedrock
- ○**C** the height of a hill or mountain
- ○**D** the age of a geological feature
- ○**E** the contents of a deep canyon

Question 6 RC

Select one answer choice.

Which of the following best describes the function of the highlighted sentence in the contest of the passage as a whole?

- ○**A** It introduces a necessary consequence of the preceding sentence.
- ○**B** It qualifies a general rule by examining a particular case.
- ○**C** It poses a problem that is addressed in the following sentence.
- ○**D** It shows how a general rule applies in a particular case.
- ○**E** It proposes an interpretation that is later questioned.

Questions 7 to 9 are based on the following passage.

During the 1920s, most advocates of scientific management, Frederick Taylor`s method for maximizing workers' productivity by rigorously routinizing their jobs, opposed the five-day workweek. Although scientific managers conceded that reducing hours might provide an incentive to workers, in practice they more often used pay differentials to encourage higher productivity. Those reformers who wished to embrace both scientific management and reduced hours had to make a largely negative case, portraying the latter as an antidote to the rigors of the former.

In contrast to the scientific managers, Henry Ford claimed that shorter hours led to greater productivity and profits. However, few employers matched either Ford's vision or his specific interest in mass marketing a product—automobiles—that required leisure for its use, and few unions succeeded in securing shorter hours through bargaining. At its 1928 convention, the American Federation of Labor (AFL) boasted of approximately 165,000 members working five-day, 40-hour weeks. But although this represented an increase of about 75,000 since 1926, about 70 percent of the total came from five extremely well-organized building trades' unions.

Question 7 RC

(Highlighted portion: "reformers")

Select one answer choice.

According to the passage, the "reformers" claimed that

○**A** neither scientific management nor reduced hours would result in an improvement in the working conditions of most workers

○**B** the impact that the routinization of work had on workers could be mitigated by a reduction in the length of their workweek

○**C** there was an inherent tension between the principles of scientific management and a commitment to reduced workweeks

○**D** scientific managers were more likely than other managers to use pay differentials to encourage higher productivity

○**E** reducing the length of the workweek would increase productivity more effectively than would increases in pay

Question 8 RC

(Highlighted portion: "automobiles")

Select one answer choice.

It can be inferred that the author of the passage mentions "automobiles" primarily to suggest that

○**A** Ford's business produced greater profits than did businesses requiring a workweek longer than five days

○**B** Ford, unlike most other employers, encouraged his employees to use the products they produced

○**C** Ford may have advocated shorter hours because of the particular nature of his business

○**D** unions were more likely to negotiate for shorter hours in some businesses than in others

○**E** automobile workers' unions were more effective than other unions in securing a five-day workweek

Question 9 RC

Select one answer choice.

It can be inferred that the author of the passage would probably agree with which of the following claims about the boast referred to in the second paragraph?

○**A** It is based on a mistaken estimation of the number of AFL workers who were allowed to work a five-day, 40-hour week in 1928.

○**B** It could create a mistaken impression regarding the number of unions obtaining a five-day, 40-hour week during the 1920s.

○**C** It exaggerates the extent of the increase between 1926 and 1928 in AFL members working a five-day, 40-hour week.

○**D** It overestimates the bargaining prowess of the AFL building trades' unions during the 1920s.

○**E** It is based on an overestimation of the number of union members in the AFL in 1928.

Question 10 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The sailors realized too late that winds had shifted the ice in such a way as to obstruct the ship's path; this process had been so _____ that it was completed by the time they discovered the effect.

☐**A** gradual

☐**B** negligible

☐**C** unpredictable

☐**D** time-consuming

☐**E** inconsequential

☐**F** imperceptible

Question 11 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

Noise suppression in phones can play an important role in making cellphone networks more efficient, since when sounds that are _____ to the meaningful signal are transmitted, precious network bandwidth is wasted.

☐**A** unsuitable

☐**B** detrimental

☐**C** irrelevant

☐**D** confined

☐**E** limited

☐**F** extraneous

Question 12 SE

Select the two answer choices that produce completed sentences that are alike in meaning.

The 1966 Mexican art exhibition "Confrontation 66" seemed to define the Mexican art world as one in which political alignment was _____, yet painter Joy Laville rose to prominence with paintings devoid of contentiousness.

- ☐ **A** inconsequential
- ☐ **B** ineluctable
- ☐ **C** requisite
- ☐ **D** perilous
- ☐ **E** pointless
- ☐ **F** obsolete

Question 13 is based on the following passage.

> When rats are placed under conditions of stress, their adrenal glands immediately increase production of the hormone corticosterone, and soon thereafter the rats' white blood cell count drops substantially. Yet rats without functioning adrenal glands experience little decrease in white blood cell count when placed under conditions of stress. It is likely, therefore, that an increase in corticosterone produced by a rat's adrenal glands causes the rat's white blood cell count to decrease.

Question 13 CR

Select one answer choice.

Which of the following would it be most useful to know in evaluating the reasoning of the argument?

- ○ **A** Whether the drop in white blood cell count that occurs in rats under conditions of stress is sufficient to make the rats more susceptible to diseases that white blood cells normally combat.
- ○ **B** Whether normal white blood cell counts vary widely among healthy rats that are not under conditions of stress.
- ○ **C** Whether the adrenal glands of rats that are under conditions of stress increase production of any hormone other than corticosterone.
- ○ **D** Whether the adrenal glands of rats produce elevated levels of corticosterone on occasions when the rats are not under conditions of stress.
- ○ **E** Whether rats' adrenal glands are affected by hormones produced by any of the rats' other organs.

Questions 14 to 15 are based on the following passage.

Bat studies in Indiana between 1961 and 1993 recorded bat roost locations. All of the roosts of evening bats were in buildings. Consequently, the fact that all evening bats radio-tracked since 1993 have roosted in trees was notable. The building roosts may have been the result of spillover from large populations of evening bats in the woods along rivers, where, prior to 1993, scientific data were not collected. The building roosts may also indicate that this species had adapted well to human structures. However, the disappearance after 1993 of previously known roosts in buildings suggests that this adaptation became less successful. Big brown bat populations have been increasing in Indiana, and perhaps evening bats do not compete successfully with them for roosts in buildings.

Question 14 RC

(Highlighted portion: "the fact that all evening bats radio-tracked since 1993 have roosted in trees was notable")

Select one answer choice.

The author mentions the fact that evening bats radio-tracked since 1993 have roosted in trees primarily in order to

- ○**A** account for a puzzling aspect of evening bat behavior mentioned earlier in the passage
- ○**B** introduce evidence that indicates a change in evening bat behavior discussed later in the passage.
- ○**C** undermine a theory about evening bat behavior presented earlier in the passage
- ○**D** provide a contrast between evening bat behavior and big brown bat behavior
- ○**E** provide an example of evening bat behavior that fits well-established scientific views of the species

Question 15 RC

Select one answer choice.

According to the passage, the disappearance after 1993 of known evening bat roosts in buildings suggests which of the following?

- ○**A** After 1993 evening bats in Indiana were less likely to live near rivers.
- ○**B** Humans and their structures became increasingly threatening after 1993.
- ○**C** The spillover of large bat populations from woods near rivers increased after 1993.
- ○**D** Evening bats in Indiana inhabited the roosts previously used by big brown bats.
- ○**E** In Indiana, evening bats' adaptation to buildings was ultimately undermined by other factors.
